 Claims Bundling

## Real Time Claims Bundling

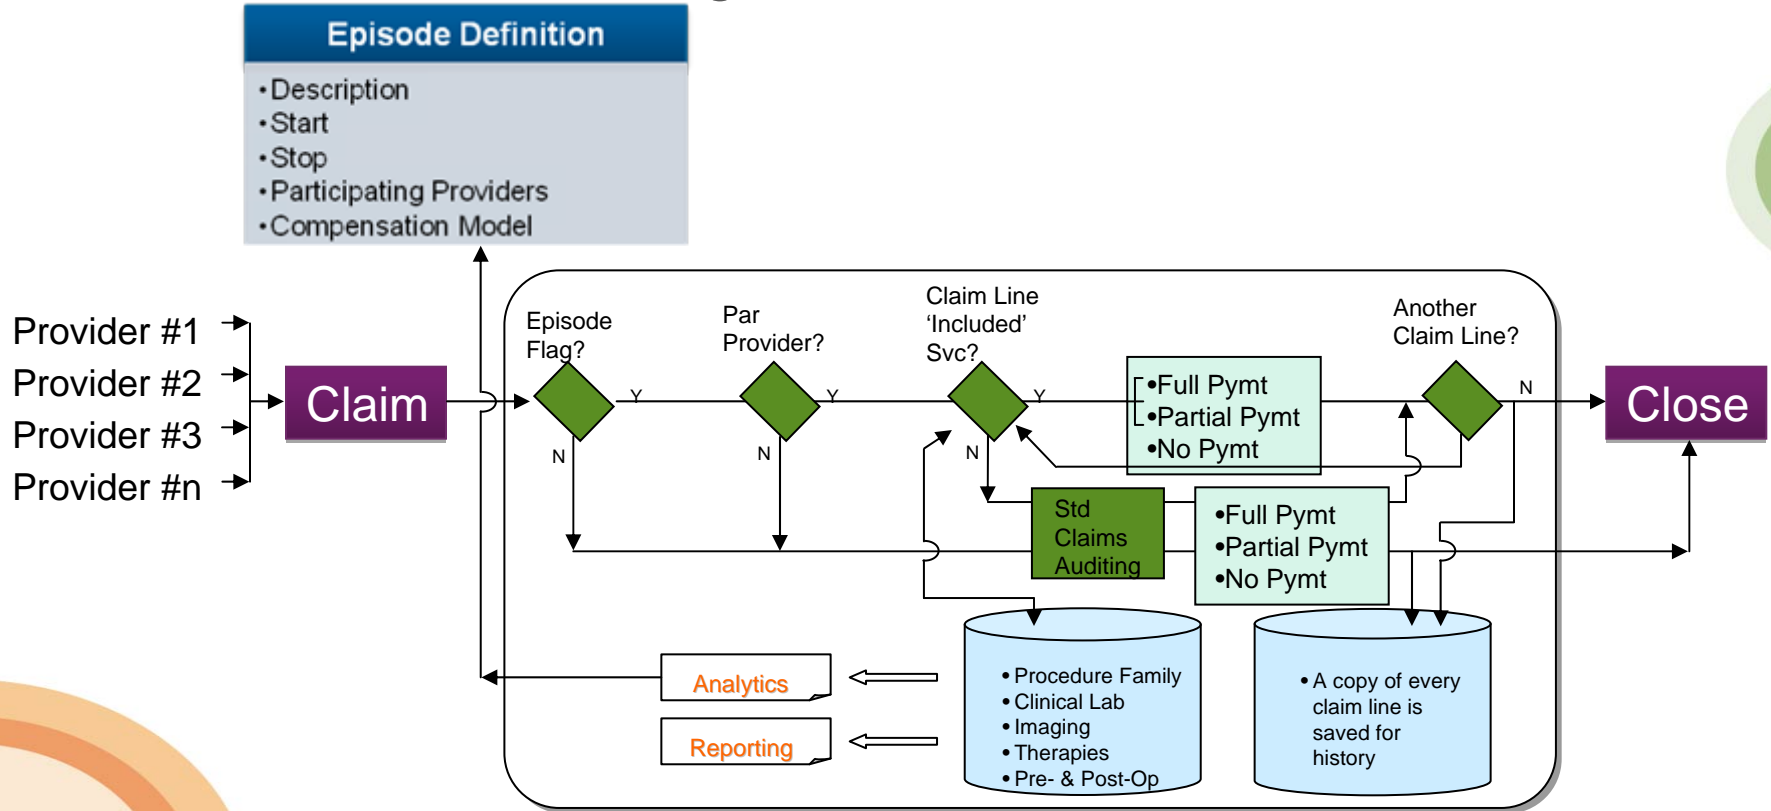

- Automates claims-based episode definitions and prospective bundled payments based on fee for service claims
- Deploys flexible, customizable content and rules to bundle and pay claims in real time, within current claims workflows
- Provides expert clinical support for episode definitions
- Prebuilt content based on PROMETHEUS ECR logic available
- Accurately prices claims based on episode contracts and rates through integration to Reimbursement Manager
- Detailed reports to assist users in analyzing and researching claims data, provider data, and episode program data associated with bundled payments
- Interactive dashboards provide view of key performance metrics associated with episodes such as utilization, cost, leakage, and complications

# McKesson Episode Management™

## Claims Transaction Management

# Episode Management Rule Options

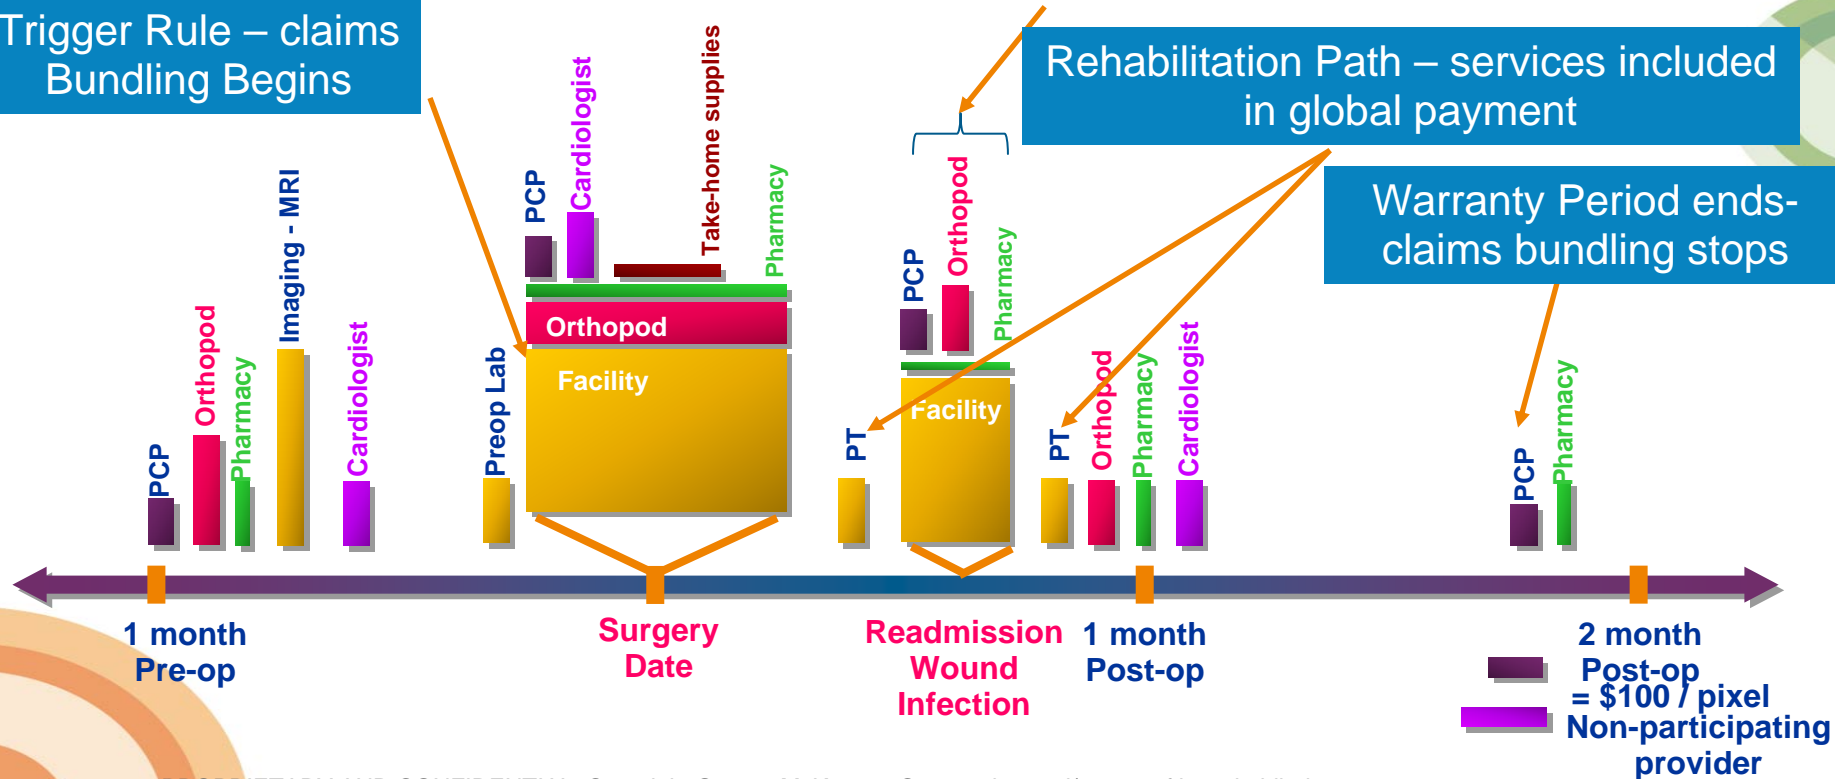

## Total Knee Replacement

Trigger Rule – claims Bundling Begins

Readmission/Potentially Avoidable Complication Path – services included in global payment

Rehabilitation Path – services included in global payment

Warranty Period ends-claims bundling stops

## Bundled Payment Consulting and Analytics Services

- Historical data runs using Episode Management for bundled payment planning
- Data analysis to identify potential target providers and geographical regions for bundled payment programs
- Assessment of potential impact of inclusion/exclusion criteria, episode duration, and included services on clinical and financial aspects for episode definitions for provider discussions
- Use of analysis for examining capabilities for bundled payments, contracting requirements, and detailed implementation plans
- Analytic services using Episode Management for operationalizing retrospective bundled payment programs
