

Legislative Report: 5010/ICD-10

WEDI EHR Work Group:

Electronic Health Record Product and Vendor Profile Site (Draft)

> Robert M. Tennant MGMA Co-chair, WEDI EHR WG

Passed the House in July

- Standards Development Provision
 - SEDC. 201—Procedures to Ensure Timely Updating of Standards that Enable Electronic Exchanges
 - SEC 202 "Upgrading ASC X12 and NCPDP Standards"
- International Classification of Diseases Provision
 - SEC. 203. Upgrading ICD Codes; Coding and Documentation of Non-Medical Information.

Standards Development Provision

- Now takes four+ years to move a HIPAA standard through the regulatory approval process.
- HHS legal team believes changes to system must start with modification of the HIPAA statute
- DSMOs and other industry stakeholders support this process change to get the appropriate standards approved and implemented more efficiently

Judicial Review

- The implementation of these subsections including the determination of the

latest version under this subsection, shall not be subject to judicial review.

Standards Development Provision

Expedited process
30 days after DSMO initiates process, NPRM
30 days after DSMO prepares preliminary draft, NPRM
Final version to NCVHS
120 days for NCVHS to submit rec to

HHS

Standards Development Provision-X12

"ACCREDITED STANDARDS COMMITTEE X12 (ASC X12) STANDARD- The replacement of the Accredited Standards Committee X12 (ASC X12) version 4010 with the ASC X12 version 5010, as reviewed by the National Committee on Vital Health Statistics."

◆ Mandated compliance: April 1, 2009.

Standards Development Provision-NCPDP

 NATIONAL COUNCIL FOR PRESCRIPTION DRUG PROGRAMS (NCPDP) TELECOMMUNICATIONS STANDARDS- The replacement of the NCPDP Telecommunications Standards version 5.1 with whichever is the latest version of the NCPDP Telecommunications Standards that has been approved by such Council and reviewed by the National Committee on Vital Health Statistics.

◆ Mandated compliance: April 1, 2009.

ICD-10 Codes in HR 4157

SEC. 204. STRATEGIC PLAN FOR COORDINATING IMPLEMENTATION OF TRANSACTION STANDARDS AND ICD CODES.

The ICD Coding System

- World Health Organization (WHO) adopted the first International Classification of Diseases (ICD) for consistent reporting of Mortality and Morbidity statistics in 1948.
- Numbers identify the "versions" ICD-10 is the latest and tenth version.
- PCS-procedural coding system (procedures)
- CM-clinical modification (diagnoses)
- Current use in US—ICD-9-CM, ICD-9-PCS

National Committee on Vital and Health Statistics

HHS advisory group.
Held public hearings on ICD-10 in 2003
NCVHS Nov. 2003 letter did not recommend outpatient use of PCS but did recommend CM
No regulatory action taken by HHS so far
Several competing "impact studies" show differing costs and benefits

- * "Not later than the date that is 180 days after the date of the enactment of this Act, the Secretary of Health and Human Services, in consultation with relevant public and private entities, shall develop a strategic plan with respect to the need for coordination in the implementation of--
- (1) transaction standards under section 1173(a) of the Social Security Act, including modifications to such standards under section 1174(b)(3) of such Act, as added by section 201; and
- (2) any updated versions of the International Classification of Diseases (ICD), including the replacement of ICD-9 provided for under section 203(a)."

Code Specificity

• "...no health care provider is required to code to a level of specificity that would require documentation of non-medical information on the external cause of any given type of injury."

Provision addresses concern that providers may not be able to efficiently identify external cause of injury

Carve Outs and Implementation Date

Legislation specifically carves out "the application of classification methodologies or codes, such as CPT or HCPCS codes, other than under the International Classification of Diseases (ICD)"

Mandated compliance date: October 1, 2010 (one year following compliance`with the 5010)

Significant disagreement in the health care community in terms of:

- advantages/disadvantages to increased coding specificity
- Costs/benefits
- Impact to inpatient / outpatient / payers / government
- Timeframe for implementation

Discussions continue between staff and members
 HHS could still move forward with ICD-10, does not require legislative direction

WEDI EHR Work Group:

Electronic Health Record Product and Vendor Profile Site (Draft)

- The goal of this section of the <u>www.wedi.org</u> Website is intended to provide individuals or entities looking to procure an electronic health record product a place were they can find the following:
 - Overview of electronic health records
 - Connections to standards organizations and governing bodies
 - Considerations when looking for a product
 - A data base of vendors that have products that could meet customer needs, and company profile, and a product profile.
- The site will also provide a vendor area were vendors can create their own vendor and product profile.
- Similar in nature to the <u>www.hipaa.org/PMSdirectory</u> site
- Note: This document is a very early draft and is intended for the use of the work group as a discussion point. It is a very preliminary design primarily created to assure that it is feasible to be established on the WEDI site.

Electronic Health Record

Welcome to the WEDI Electronic Health Record customer review, vendor and product profile area. The intentions of this site are as follows:

- 1. Provide an area the vendors can describe the company and their electronic record product set.
- 2. Where electronic health record customers can review products vendors that may satisfy business requirements.
- 3. Provide links to additional resources and information to assist in the implementation of the electronic health record.
- Note: Vendor and product information that appear on this site are provided by the product vendors. The WEDI organizations makes no claim or assertions the authenticity or accuracy of the information provided by product vendors.

Electronic Health Record Vendor Profile

If you are a returning vendor performing maintenance to your product and profile you must authenticate by clicking the log in button below. If you are a new vendor, you will be creating a new vendor/product profile by clicking the initial vendor profile below. New vendors will be establishing a user ID and password to protect the integrity of their information.

Note: Vendors are responsible for adding and maintaining their own information. WEDI is not responsible for information that you place on the site. If you are experiencing technical difficulties, contact the webmaster for assistance.
