HIPAA Security...

- Today
 - Spotty compliance
 - Is 2008 a “Perfect Storm” year for enforcement?
 - Federal audits
 - OIG/CMS
 - State data protection laws
 - Changing political pressures
 - GAO/OMB scrutiny

HIPAA Security...

- Today
 - Increasing number of breaches
 - Identity theft/medical identity theft
 - Changing technology
 - Mobile devices
 - Remote access
 - Changing regulatory landscape
 - E-discovery
 - National Privacy

HIPAA Security...

- Today
 - Push toward E-Health
 - EHRs, PHRs, HIEs, ...
 - Whose data is it? ... MS/Google/Dossia
 - Responsibility for safeguarding
 - E-prescribing
 - CPOE
 - HIT initiatives
 - Quality outcomes
 - Pay-for-performance/reducing costs
 - Etc.

HIPAA Security

- Tomorrow
 - Reasons to comply
 - Corporate governance/compliance becoming performance metrics
 - Incentives
 - Patient safety
 - Consumer-driven healthcare
 - New approaches/safeguards

In Conclusion...

- We hope that this afternoon that we can explore some of the issues and come up with some of the answers to the changing world of healthcare security and, in particular, what constitutes good HIPAA Security.
- We encourage you to listen, think, and contribute your thoughts and perspectives during the course of the afternoon's sessions and throughout and after the conference.

Thank You !
