The Fundamentals of HIPAA for Clinicians, Trustees Etc.

Jim Moynihan
McLure-Moynihan Inc.
www.mmiec.com

For Second National HIPAA Summit
March 1, 2001

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

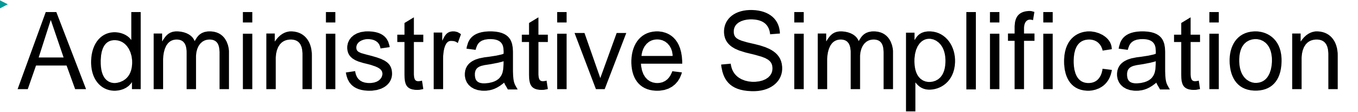
HIPAA

- Introduction to HIPAA
- Primer on Electronic Commerce (EC)
- Primer on Financial EC
- Healthcare EC
- The HIPAA Transaction Sets

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

- HIPAA is all about Standards!
- Standards for automating the business process of Claims Administration
- Standards for the security and confidentiality of Health Information

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.



Healthcare Insurance Portability and Accountability Act

Privacy

Security

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Administrative Simplification

- New England Journal of Medicine article claims 19-24% of US Healthcare Costs are Administrative.

- Private Sector Response - the Bush Administration and WEDI.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

1993 WEDI Recommendations

- To automate the claims process will require:
  - Standards for key Employer-Health Plan data exchanges.
  - Standards for key Payer-Provider data exchanges.
  - Uniform Code Sets
  - National Identifiers
    - Patient
    - Provider
    - Payer
    - Employer

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

1993 WEDI Recommendations

- National Guidelines to preempt state standards
  - Signatures
  - Security

- The Clinton Reform Initiative incorporated many of the WEDI recommendations with some embellishments.

- Support for Administrative Simplification survived the death of the Clinton Healthcare Reform Initiative

Created by McLure-Moynihan Inc.

© 2001 MMI All rights reserved.

Privacy

The "leak" of the HIV Positive Diagnosis led to an alarmed public and a series of hearings on Privacy.

- Bipartisan consensus on administrative simplification found its expression in HIPAA legislation of 1996. WEDI recommendations were incorporated with additional requirements related to Privacy.

Created by McLure-Moynihan Inc.

Who Has to Comply?

Organization	Directly Affected	Indirectly Affected
All qualified health plans, ERISA, Medicare, Medicaid	✓	
Healthcare clearinghouses	✓	
Providers	✓	
Employers		✓

Created by McLure-Moynihan Inc.

© 2001 MMI All rights reserved.

Monetary Penalty	Term of Imprisonment	Offense
$100	N/A	Single violation of a provision
Up to $25,000	N/A	Multiple violations of an identical requirement or prohibition made during a calendar year
Up to $50,000	Up to one year	Wrongful disclosure of individually identifiable health information
Up to $100,000	Up to five years	Wrongful disclosure of individually identifiable health information committed under false pretenses
Up to $250,000	Up to 10 years	Wrongful disclosure of individually identifiable health information committed under false pretenses with intent to sell, transfer, or use for commercial advantage, personal gain, or malicious harm

Failure to implement transaction sets can result in fines up to $225,000 per year ($25,000 per requirement, times nine transactions)

Failure to implement privacy and security measures can result in jail time

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

1996-2001 Waiting for Rules

- **NCVHS**
  - DHHS charged National Committee on Vital Health Statistics (NCVHS) to hold hearings on:
    - Transaction Standards
    - Code Sets
    - Identifiers
    - Final Rule on Transaction Sets and Code Sets issued 8/00 effective 10/02
- **Security and Privacy Proposed Rules**
  - Security Guideline 8/98
  - Privacy Proposed Rule 11/99
  - Final Rule on Privacy issued 12/00 effective 2/03

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

National Identifiers

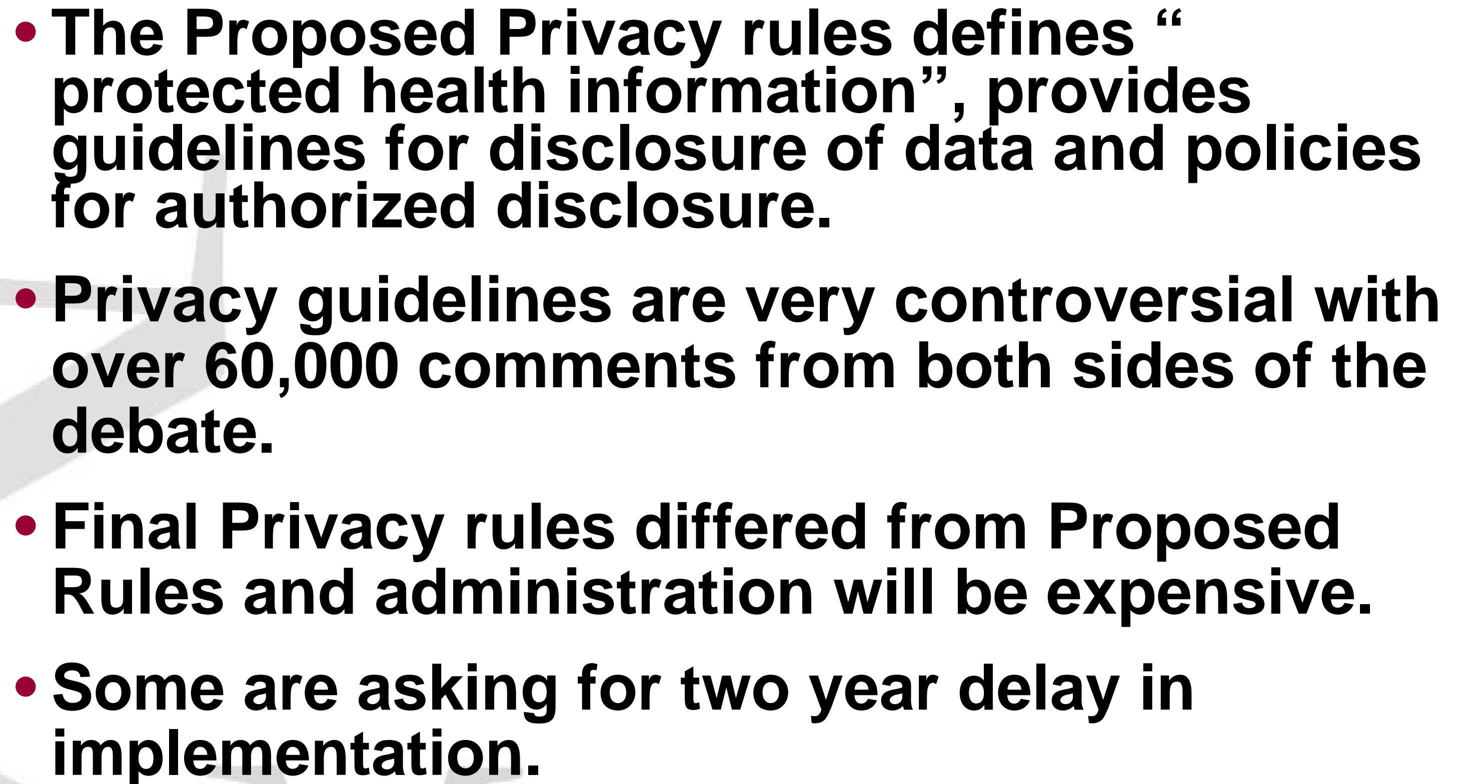
- Patient ID
  - No NCVHS recommendation
- Provider ID
  - HCFA-maintained Provider ID# recommended
- Payer ID/HealthPlan ID
  - HCFA-maintained database may be recommended by October 2000.
- Employer ID
  - Tax ID #

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

- Security rules deal with how data is stored and accessed.
- Privacy rules deal with how and to whom data is disclosed.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Privacy



- The Proposed Privacy rules defines " protected health information", provides guidelines for disclosure of data and policies for authorized disclosure.
- Privacy guidelines are very controversial with over 60,000 comments from both sides of the debate.
- Final Privacy rules differed from Proposed Rules and administration will be expensive.
- Some are asking for two year delay in implementation.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Are You A Business Associate?

- Section 162-923
- **A covered entity may use a business associate, including a healthcare clearinghouse, to conduct a transaction covered by this part. If a covered entity chooses to use a business associate to conduct all or part of a transaction on behalf of the covered entity, the covered entity must require the business associate to do the following:**
  - Comply with all applicable requirements of this part
  - Require any agent or subcontractor to comply with all applicable requirements of this part.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Security

- **"Protected Health Information"**
  - **individually identifiable that has ever been:**
    - **electronically transmitted**
    - **electronically stored**
- **Administrative procedures**---documented general practices for establishing and enforcing security policies
- **Physical safeguards**---documented processes for protecting physical computer systems, buildings, and so on
- **Technical security services**---processes that protect, control, and monitor access
- **Technical security mechanisms**---mechanisms for protecting information and restricting access to data transmitted over a network

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Security

- HCFA Internet Policy Change represented major shift for agency and presented policies for secure transactions. Security NPRM released 8/98.
- Providers/Payers/Employers all face significant process changes with regard to data access, vendor relationships and business processes.
- New keywords for all involved include Encryption, Public Key Infrastructure (PKI), Digital Certificates.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Security

- Authentication
  - Did the sender of the message (user of the system) really send this message or was it sent by a "bad guy".
- Encryption
  - Scrambling a message so that only the sender and the receiver can "unscramble" the message using a Key.
- Public Key Infrastructure (PKI)
  - Use of public and private keys to encrypt messages.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Are You In The "Chain of Trust"

- "a contract entered into by two business partners in which the partners agree to electronically exchange data and protect the integrity and confidentiality of the data exchanged."

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Security

- First assign responsibility for HIPAA security compliance.
- Self assessment tool kits are available from multiple sources.
- "For the Record" published by NACI is an excellent book that was a source book for the security proposed rule.
- Most people and literature overemphasize the technology and underemphasize the cultural and physical aspects of security.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Eliminating Paperwork

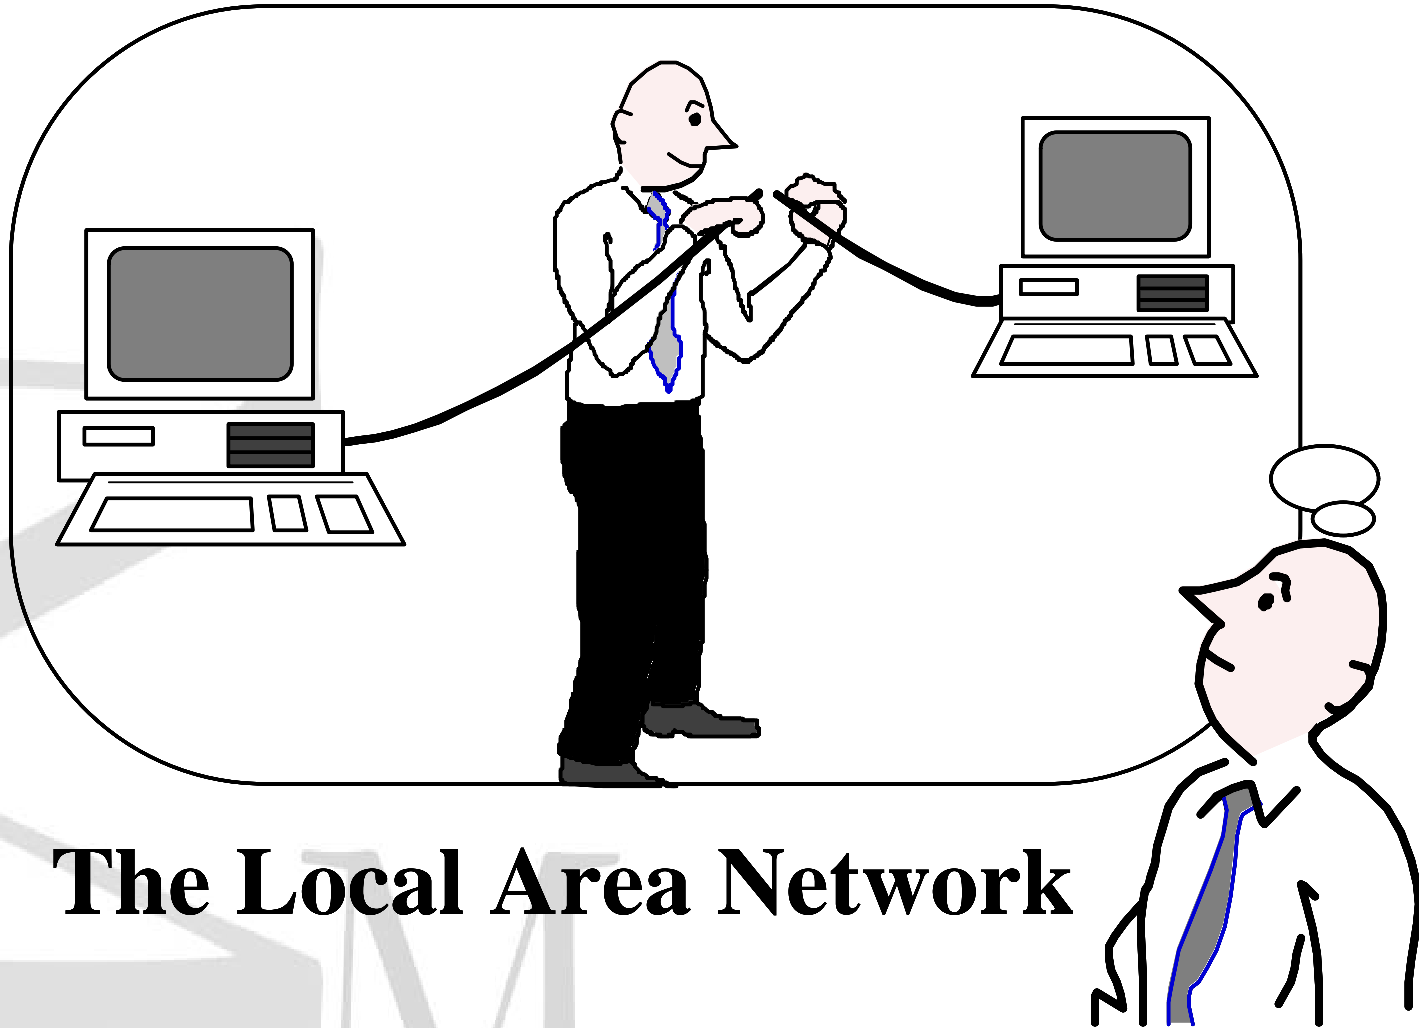
- A Decades-Old Quest
  - 1950s First Steps
  - 1960s Tape-based standards
  - 1970s Industry-Specific Standards
  - 1980 Cross-Industry Standards
  - 1990s EDI evolves into EC
  - 2000s Stay Tuned!

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

What Took So Long?

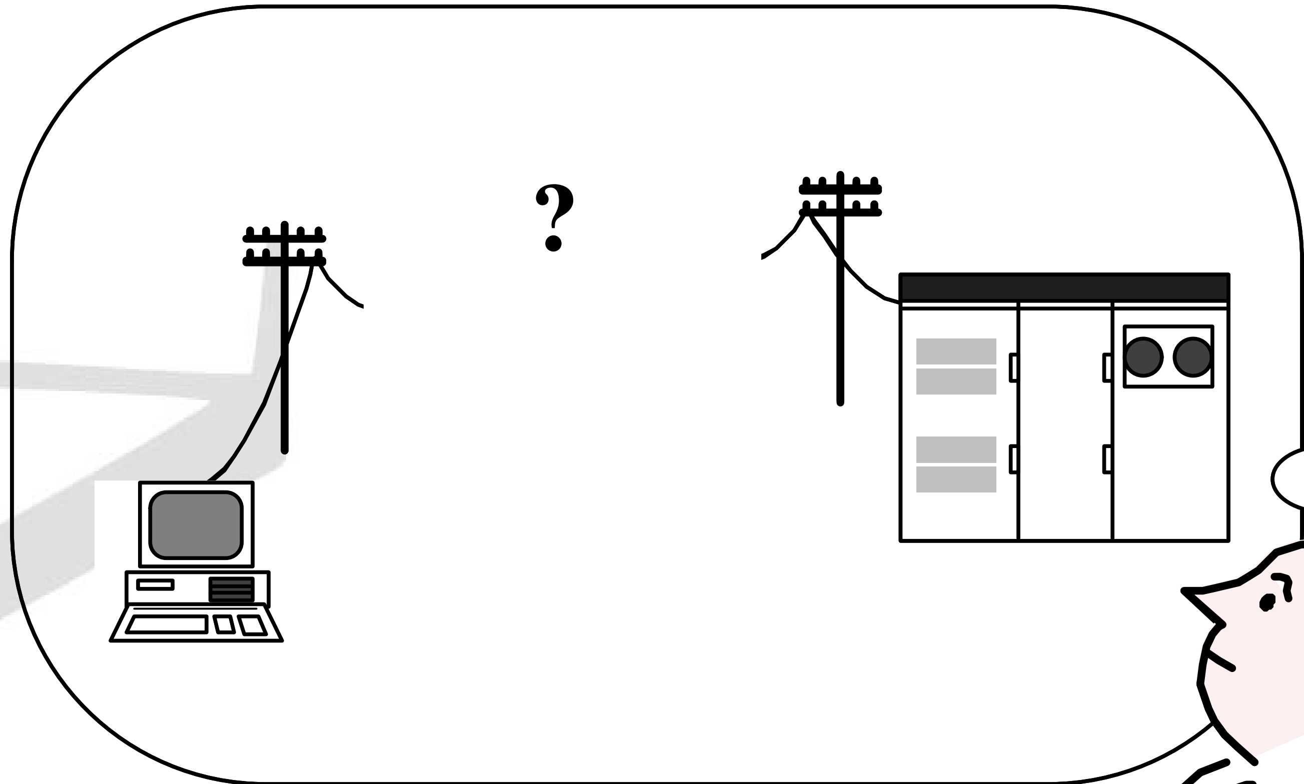
- Primitive networks.
- Lack of electronic format standards.
- Expensive hardware and software.
- Lack of consensus among trading partners.

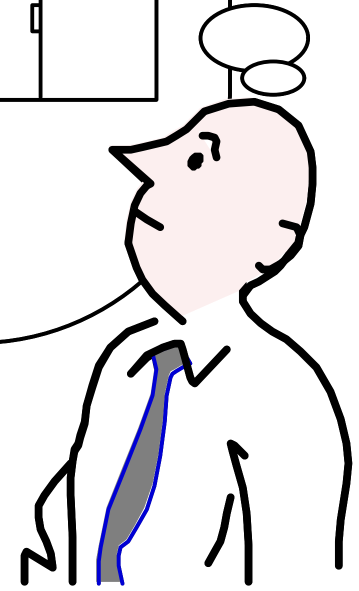
Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.



The Local Area Network

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.



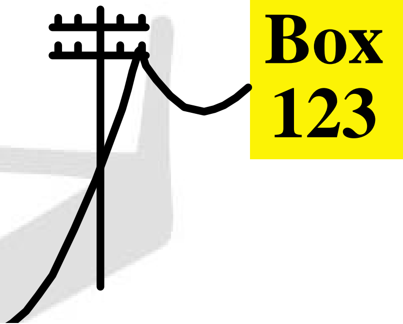


The Wide Area Network

Created by McLure-Moynihan Inc.

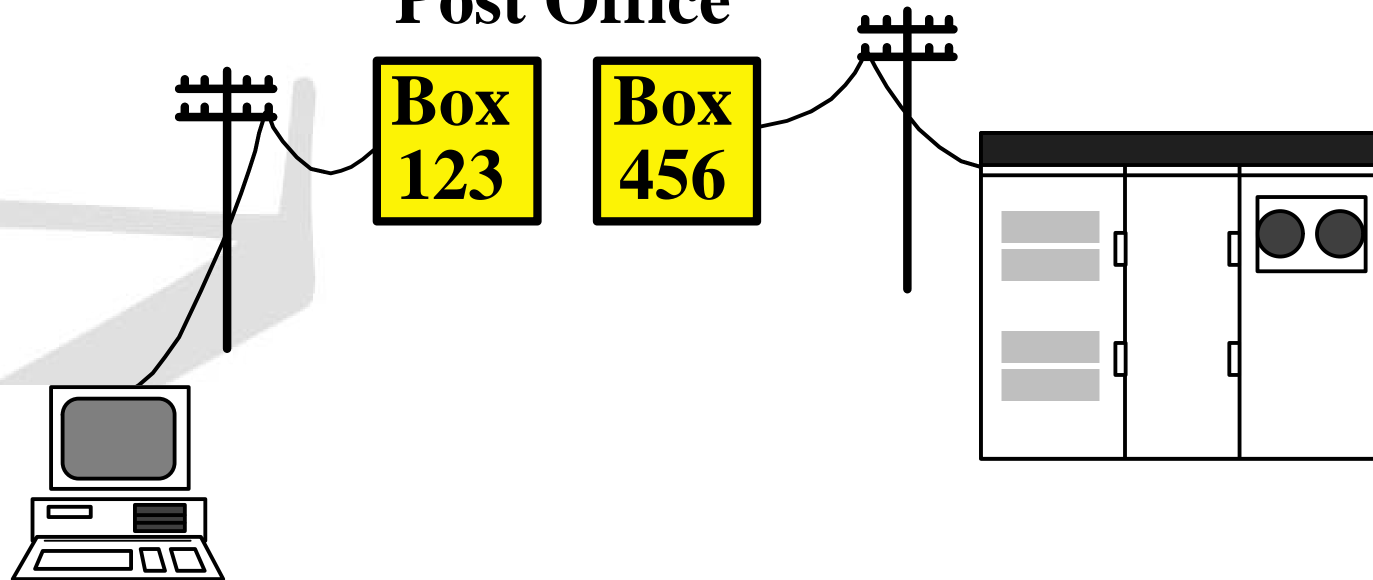
© 2001 MMI All rights reserved.

The Electronic Post Office



Electronic Mail Boxes

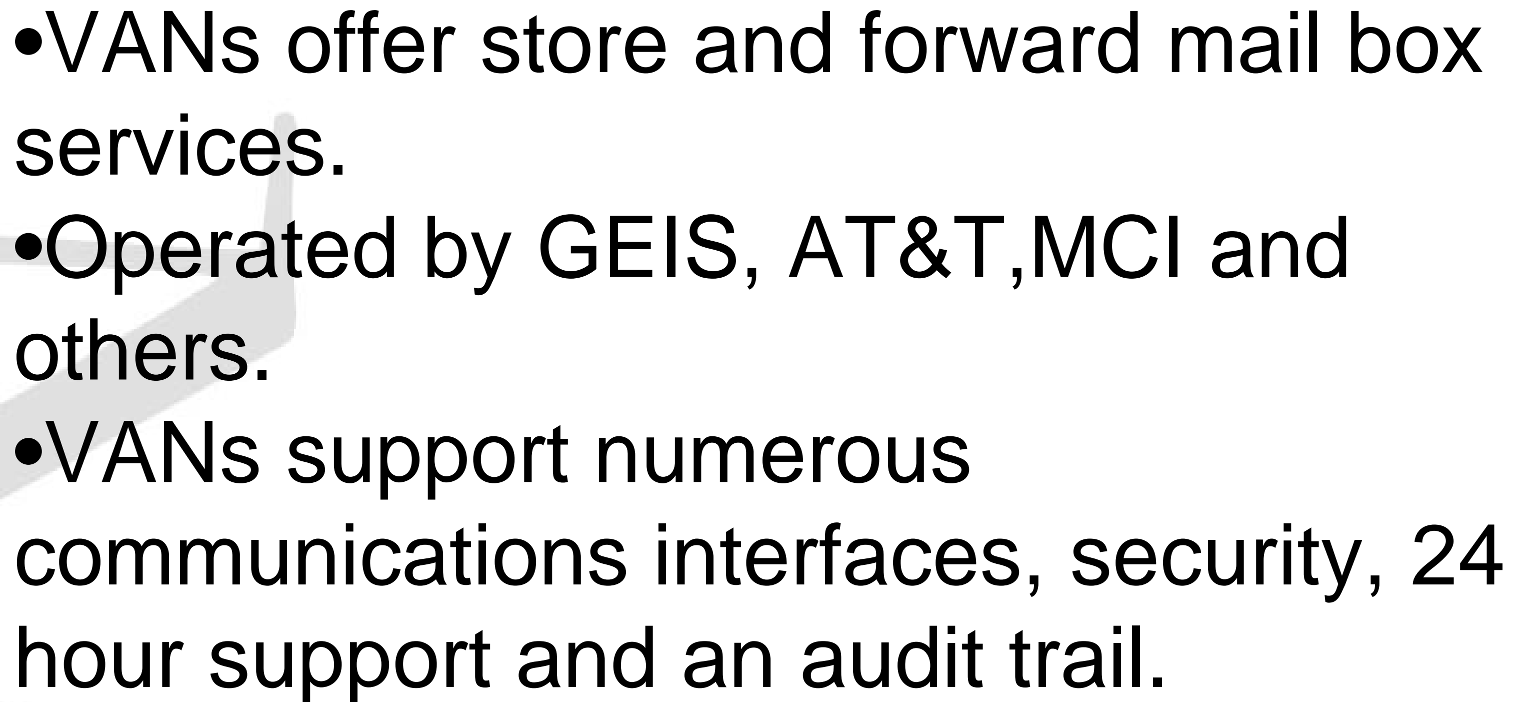
Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.



... And Other Mail Boxes

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

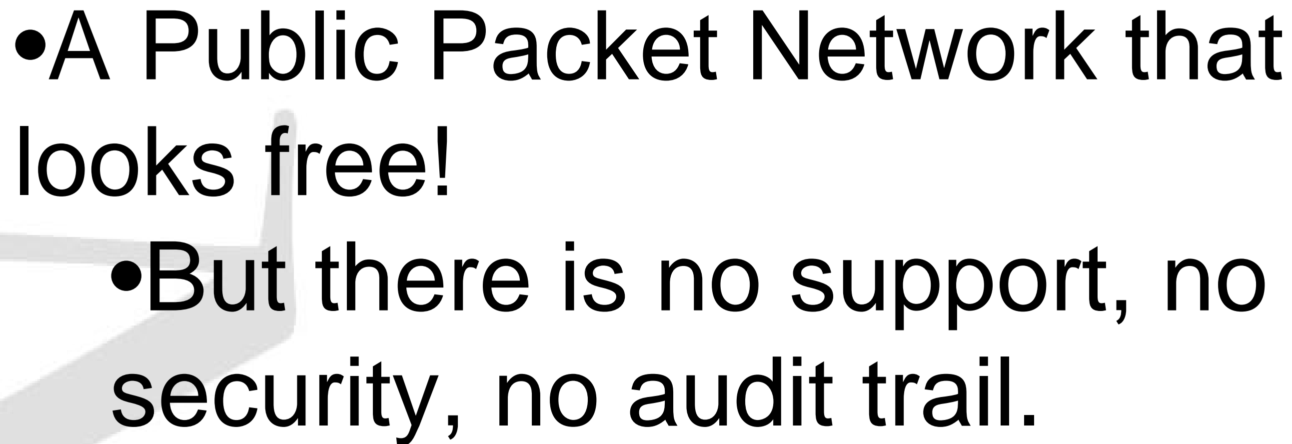
Value Added Networks



- VANs offer store and forward mail box services.
- Operated by GEIS, AT&T,MCI and others.
- VANs support numerous communications interfaces, security, 24 hour support and an audit trail.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

The Internet



- A Public Packet Network that looks free!
  - But there is no support, no security, no audit trail.

Despite shortcomings, the Internet and its protocols appear to be the dominant network of the future.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Let's Define Our Terms

- Electronic Data Interchange:
  - The exchange of computer-processable data in a standardized format between two enterprises.
- Electronic Commerce:
  - Any use of a variety of technologies that eliminate paper and substitute electronic alternatives for data collection and exchange. Options include Interactive Voice Response, Fax, Email, Imaging, Swipe Cards and multiple Web-based Internet tools.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

EDI and EC: A Place for Both

- EDI
  - Standards-based data exchange - the foundation of quality transaction processing.
  - System to system exchanges of highly *structured* data.
- Electronic Commerce:
  - Multiple ways to communicate unstructured data.
  - People-to-system or people-to-people exchanges.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

X12 Standards

"X12 Standards do not define the the method in which interchange partners should establish the required electronic media communication link, nor the hardware and translation software requirements to exchange EDI data."

Source = HIPAA Implementation Guidelines

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Is Getting Paid Important?

- Banks are involved with two HIPAA transactions, claims payments and premium payments.

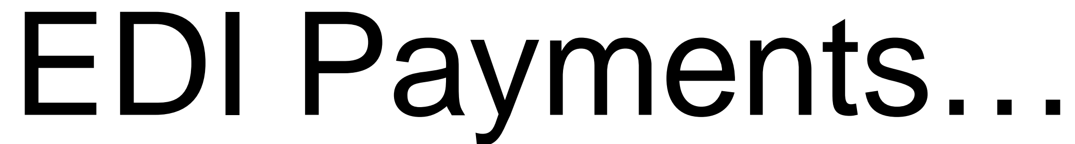
- Banking industry networks are secure, widely used and as familiar as direct deposit of payroll and social security payments.

- Electronic Funds Transfer (EFT) is the transfer of value through the banking system.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

… transfer value from payer to payee and provides the remittance information need to relieve the receivable account of the payee.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.



… are Trade Payments that

- transfer value using EFT
- exchange remittance detail via EDI

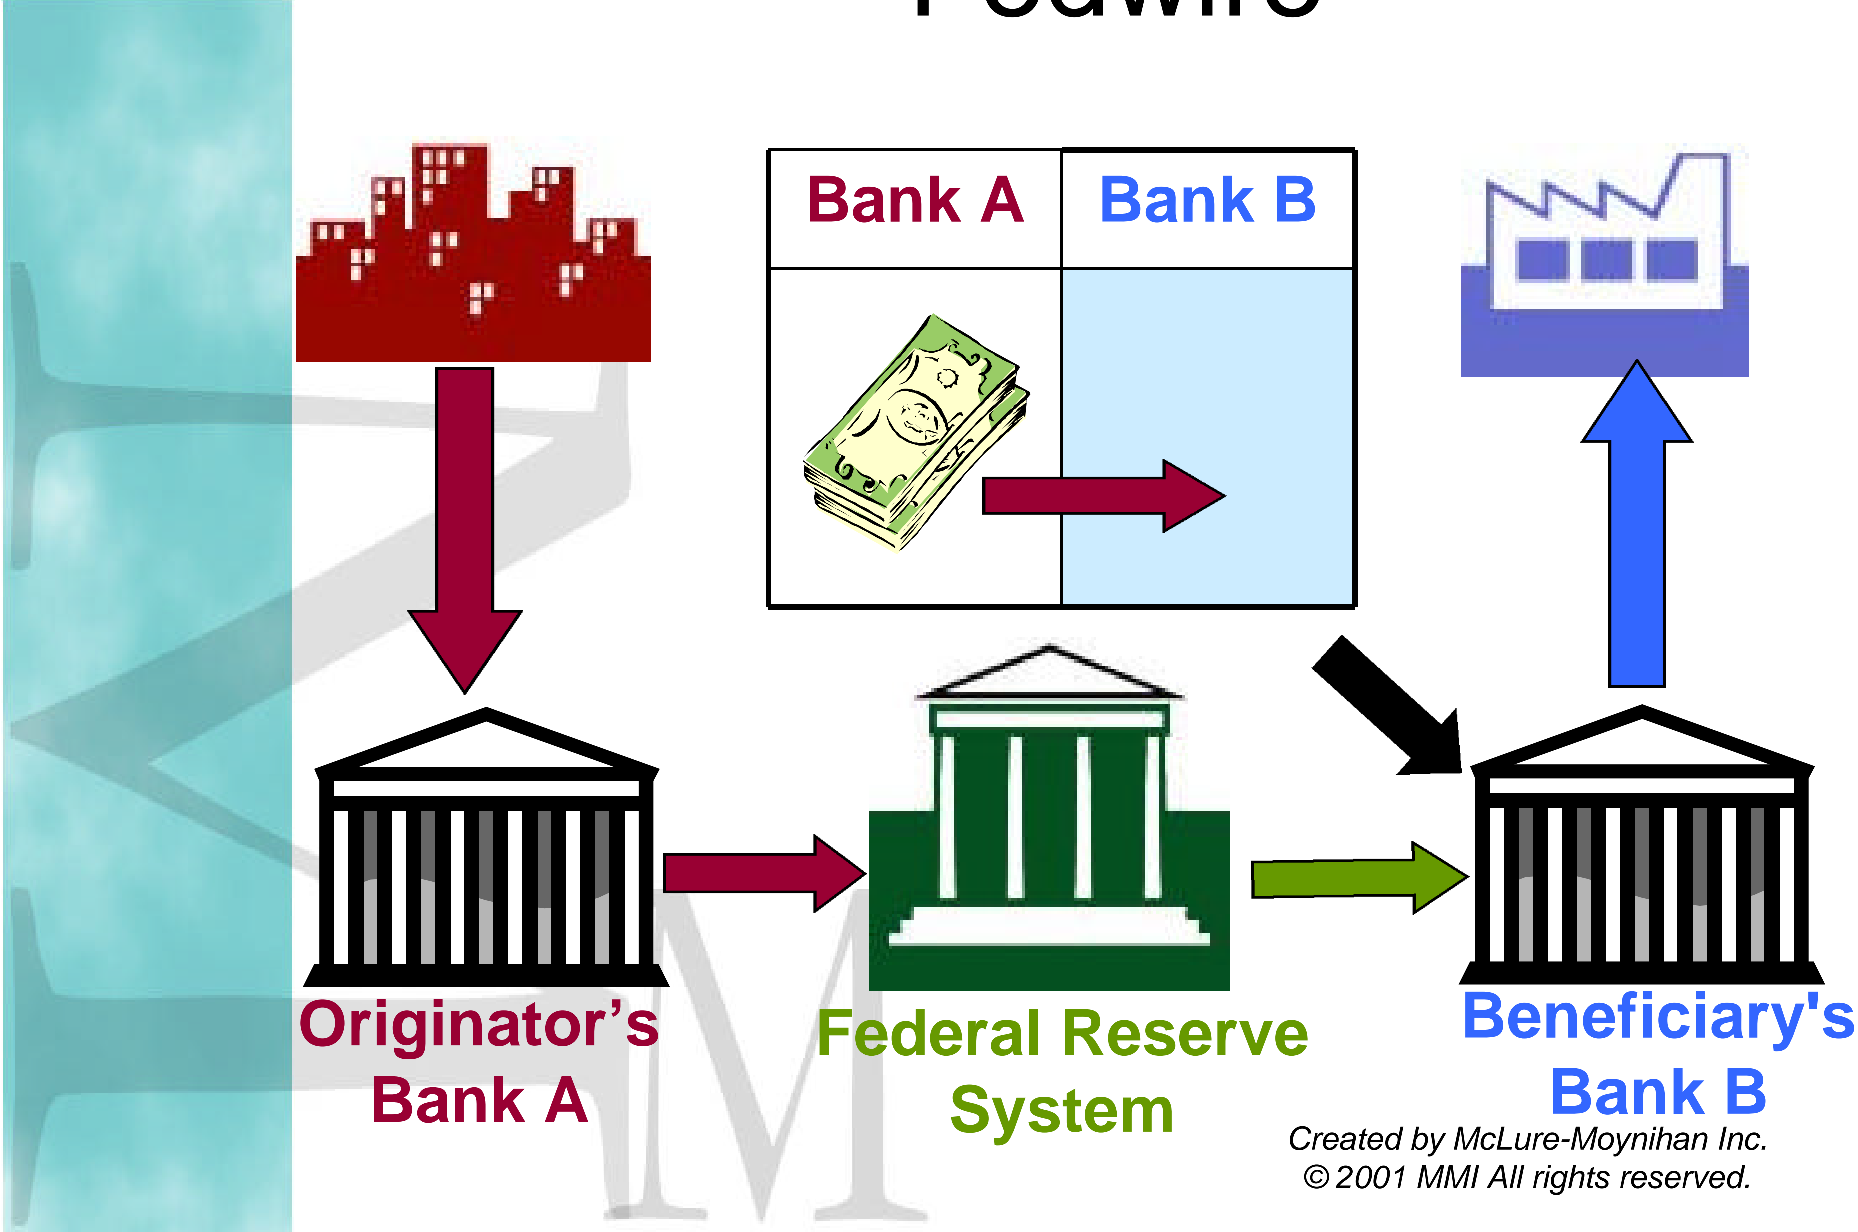
Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Funds Transfer Systems

- Fedwire
- Automated Clearinghouse

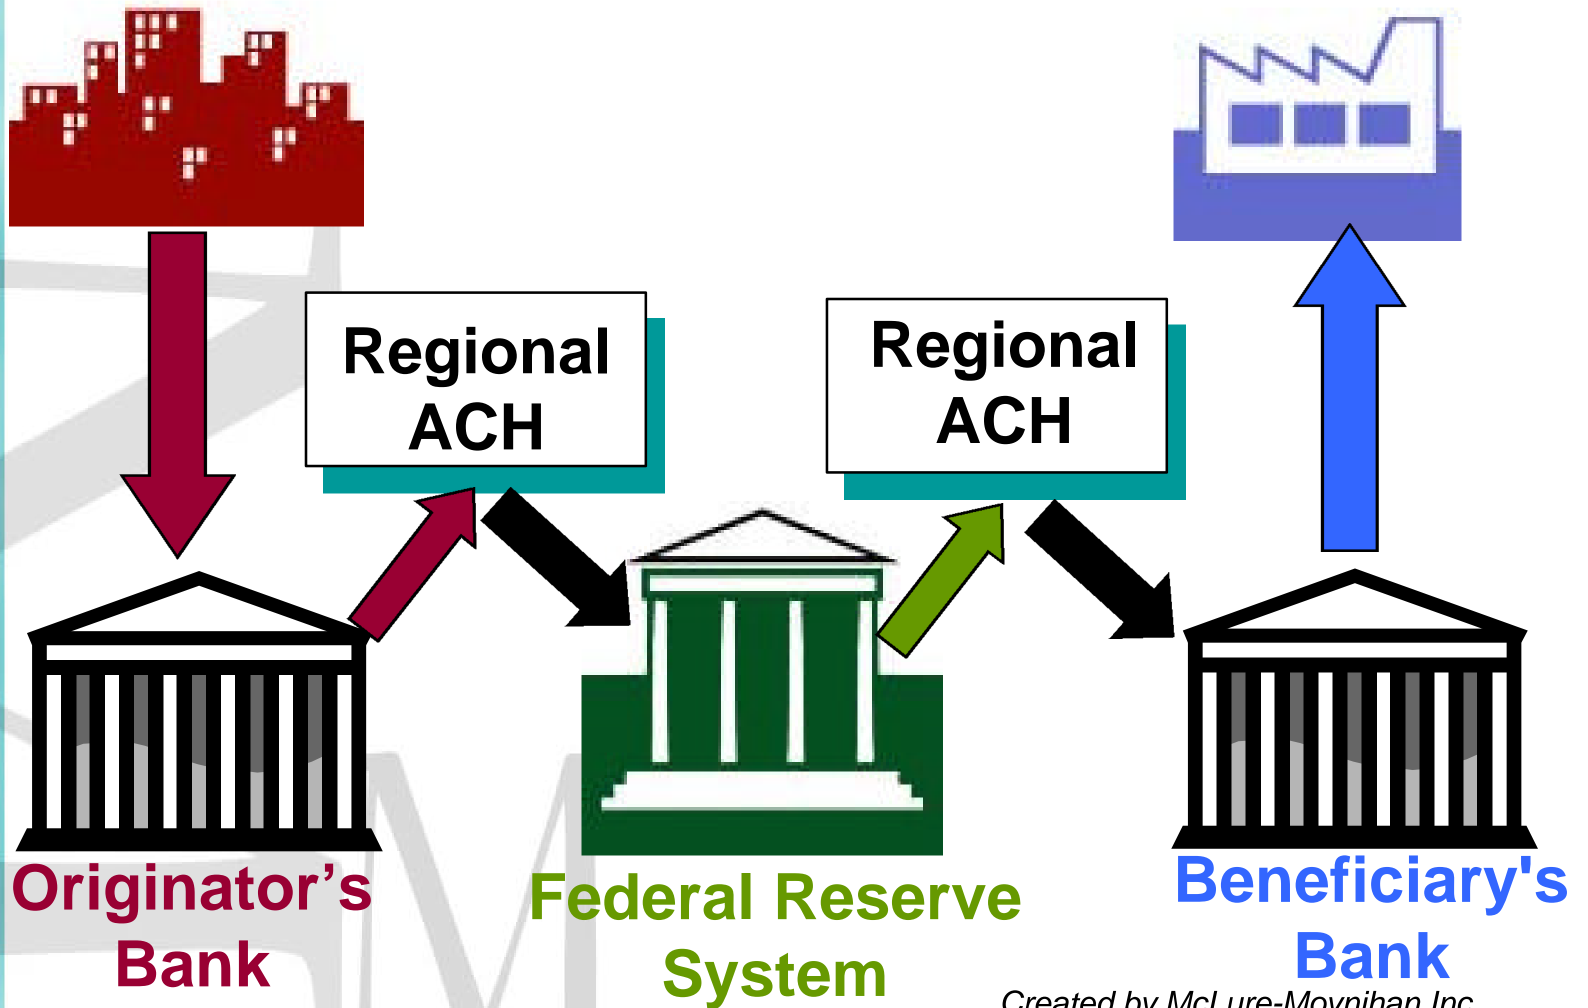
Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Fedwire



Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Automated Clearing House



Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Fedwire vs. ACH

- Fedwire
  - Immediate funds transfer.
  - Limited data carrying capability.
  - Expensive to send and receive.
- ACH
  - Good funds arrive the day after payment origination.
  - Extensive Data carrying capability in CTX.
  - Inexpensive to send and receive.

Created by McLure-Moynihan Inc.

X12 Standards

X12 Standards establish standards for the "enveloping" of data for successful message routing.

EDI allows "trading partners to use the electronic equivalent of "return receipt mail" with a transaction set called the Functional Acknowledgement (997).

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

EDI Standard/Document

The outer envelopes are crucial to support of the Functional Acknowledgement (997) standard.

As will become apparent the 997 and message tracking are crucial for making HIPAA standards work.

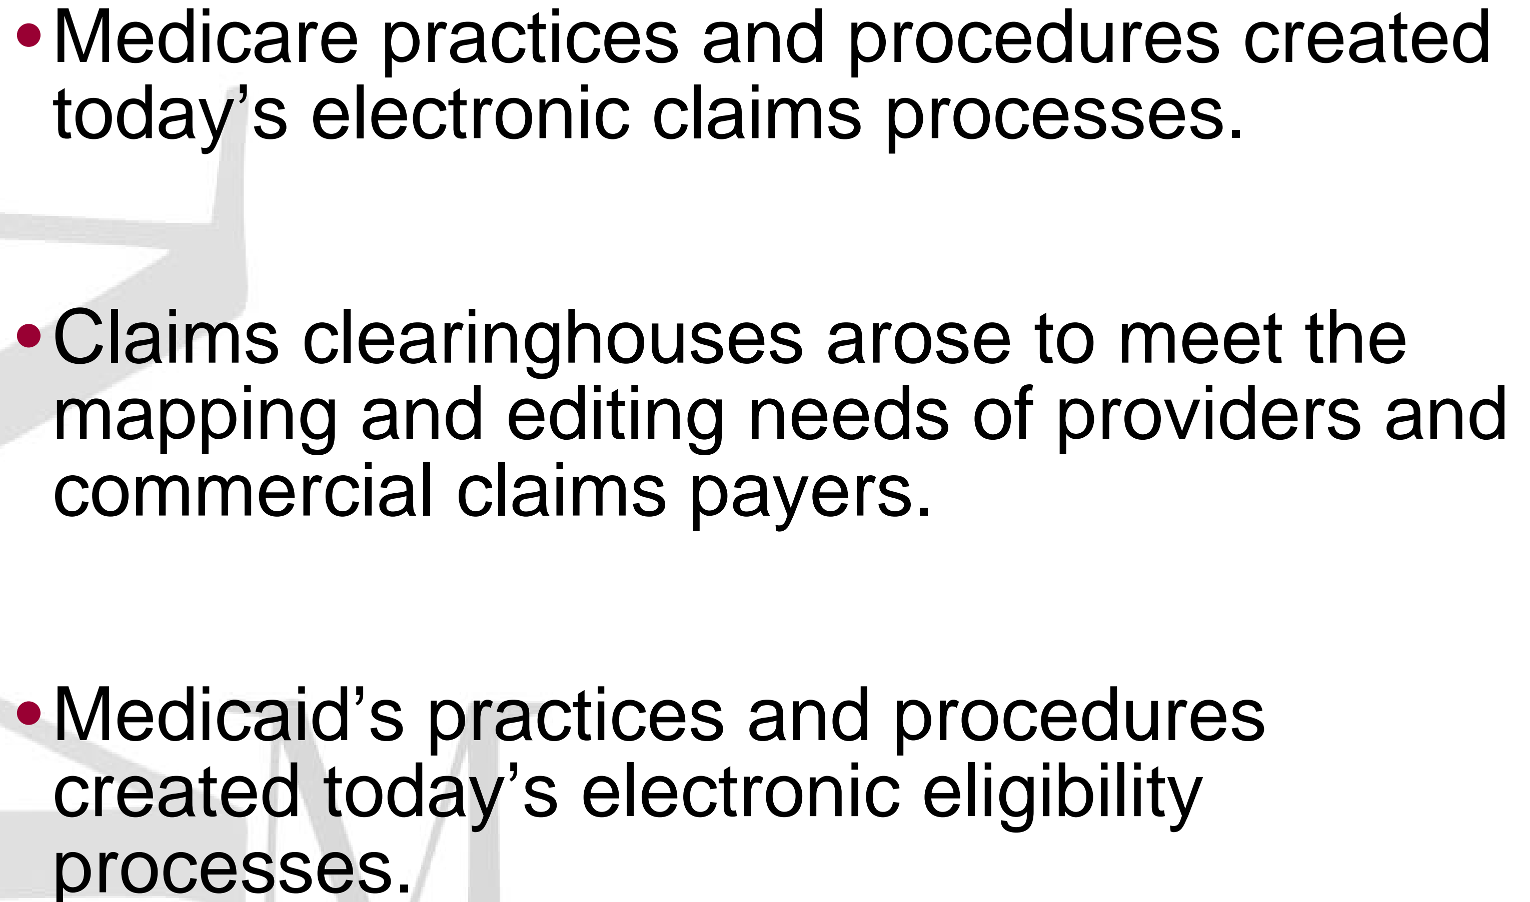
Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

EDI Management Software

- Translation
- Trading Partner Profiles
- Interchange Control
- Mapping

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

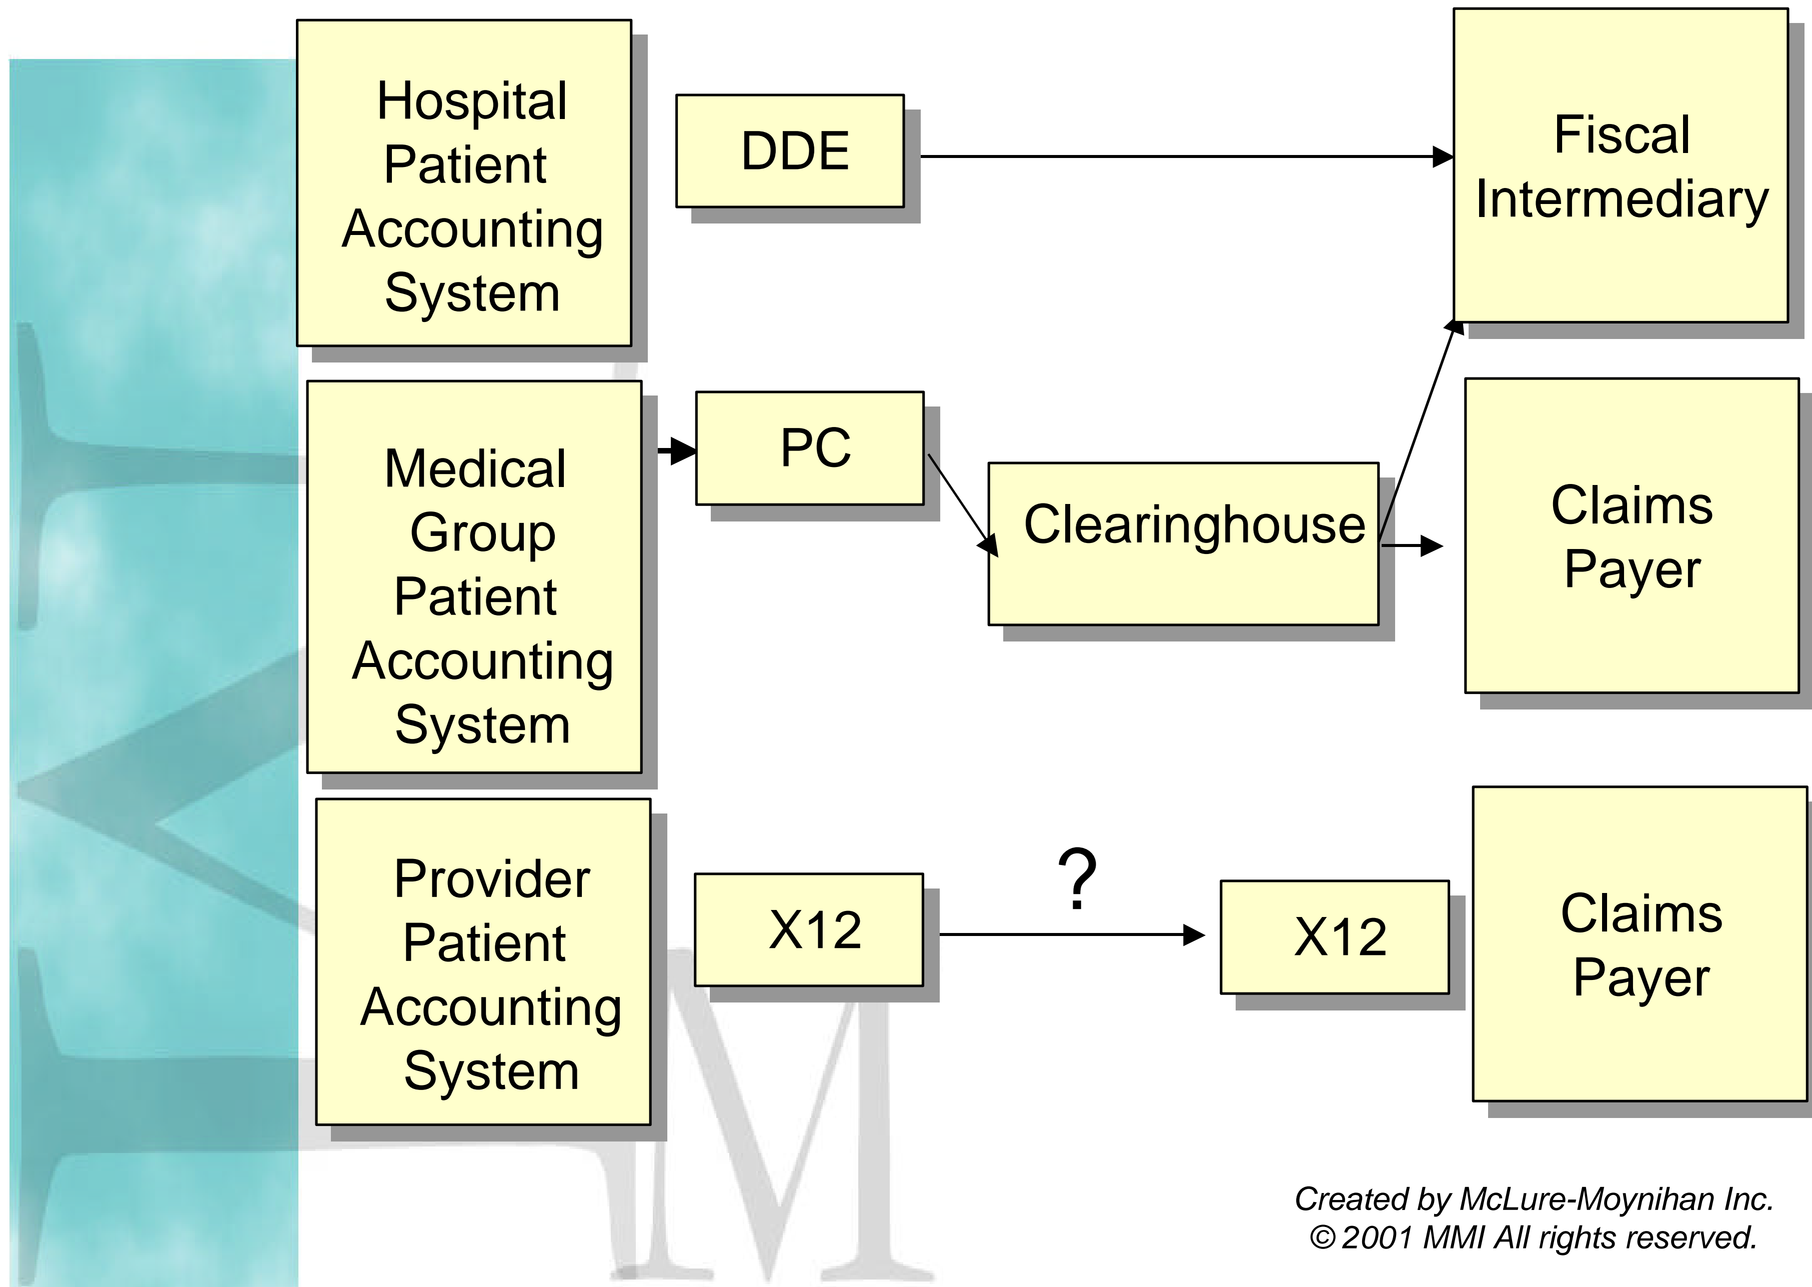
Healthcare EDI/EC



- Medicare practices and procedures created today's electronic claims processes.
- Claims clearinghouses arose to meet the mapping and editing needs of providers and commercial claims payers.
- Medicaid's practices and procedures created today's electronic eligibility processes.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Electronic Claims Processing



Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Transaction Set Standards

- Healthcare Claim or Encounter (837)
- Enrollment and Disenrollment in a Health Plan (834)
- Eligibility for a Health Plan (270-271)
- Claim Payment and Remittance Advice (835)
- Premium Payments (820)
- Healthcare Claim Status (276-277)
- Referral Certification and Authorization (277)
- Coordination of Benefits (837)
- Later…
- Healthcare Claim Attachment (275)
- First Report of Injury (148)

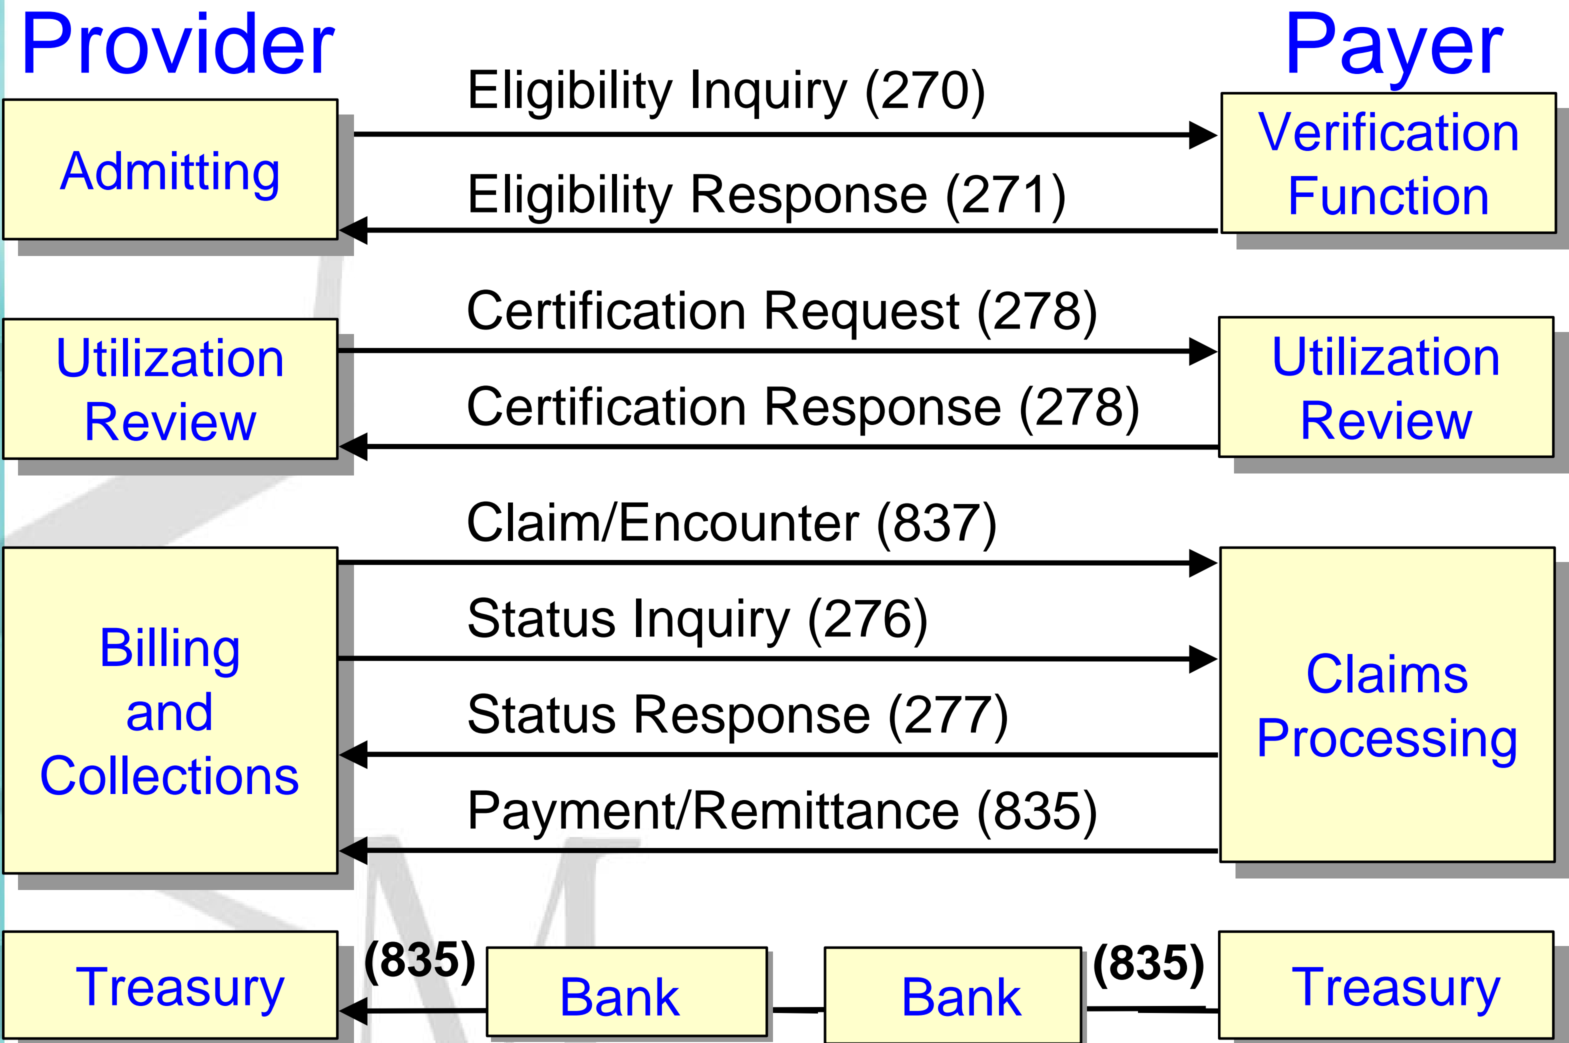
Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Beyond Formats

- Data Element Standards
  - Existing groups such as NUBC, ADA, NUCC continue to define data elements of a claim
- but…
- X12 and HHS determine data elements for claims status, eligibility, treatment authorization, remittance messages.
- Code Sets
  - HIPAA aims to standardize code set adoption.
  - NCVHS endorsed “defacto” standards ICD-9 CM, CPT-4, HCPCS, CDT-2 and NDC code sets.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

The Claims Process



Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

X12 Standards

HIPAA Implementation Guidelines, to be issued when updates to the standards are promulgated by DHHS, are the standard for purposes of HIPAA-compliance. They are subsets of the complete standard as approved by ANSI X12.

HIPAA standard transmissions must incorporate other X12 standards used for message management in order to function in commercial software.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

HIPAA Transactions Sets

834	**Benefit Enrollment and Maintenance**
820	**Payment Order/Remittance Advice**
270	**Eligibility, Coverage or Benefit Inquiry**
271	**Eligibility, Coverage or Benefit Information**
278	**Health Care Services Review Information**
837	**Health Care Claim**
835	**Health Care Claim Payment/Remittance Advice**

Created by McLure-Moynihan Inc.

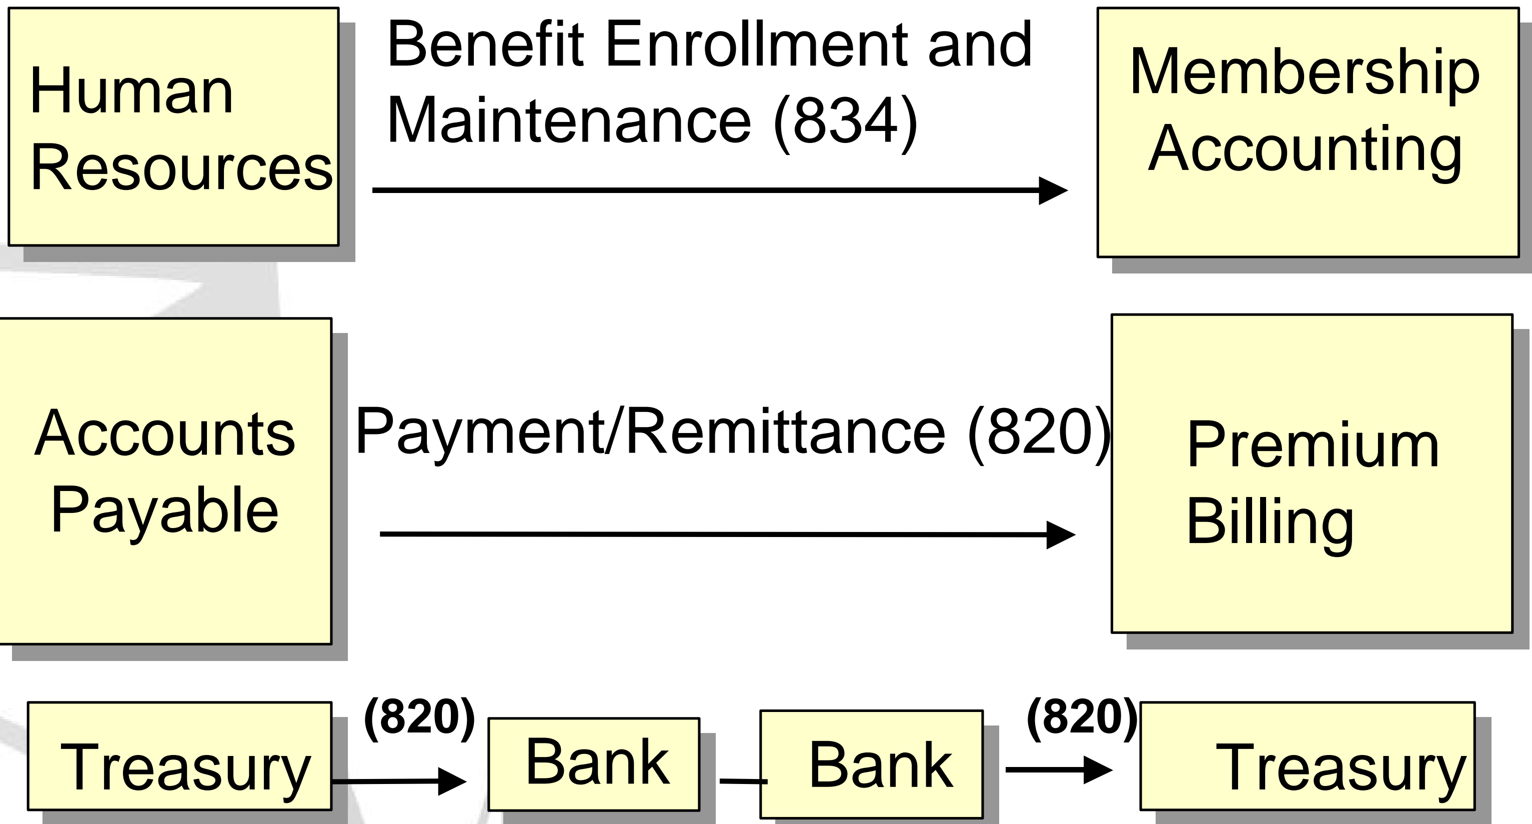
Employer/

Plan Sponsor

Health Plan



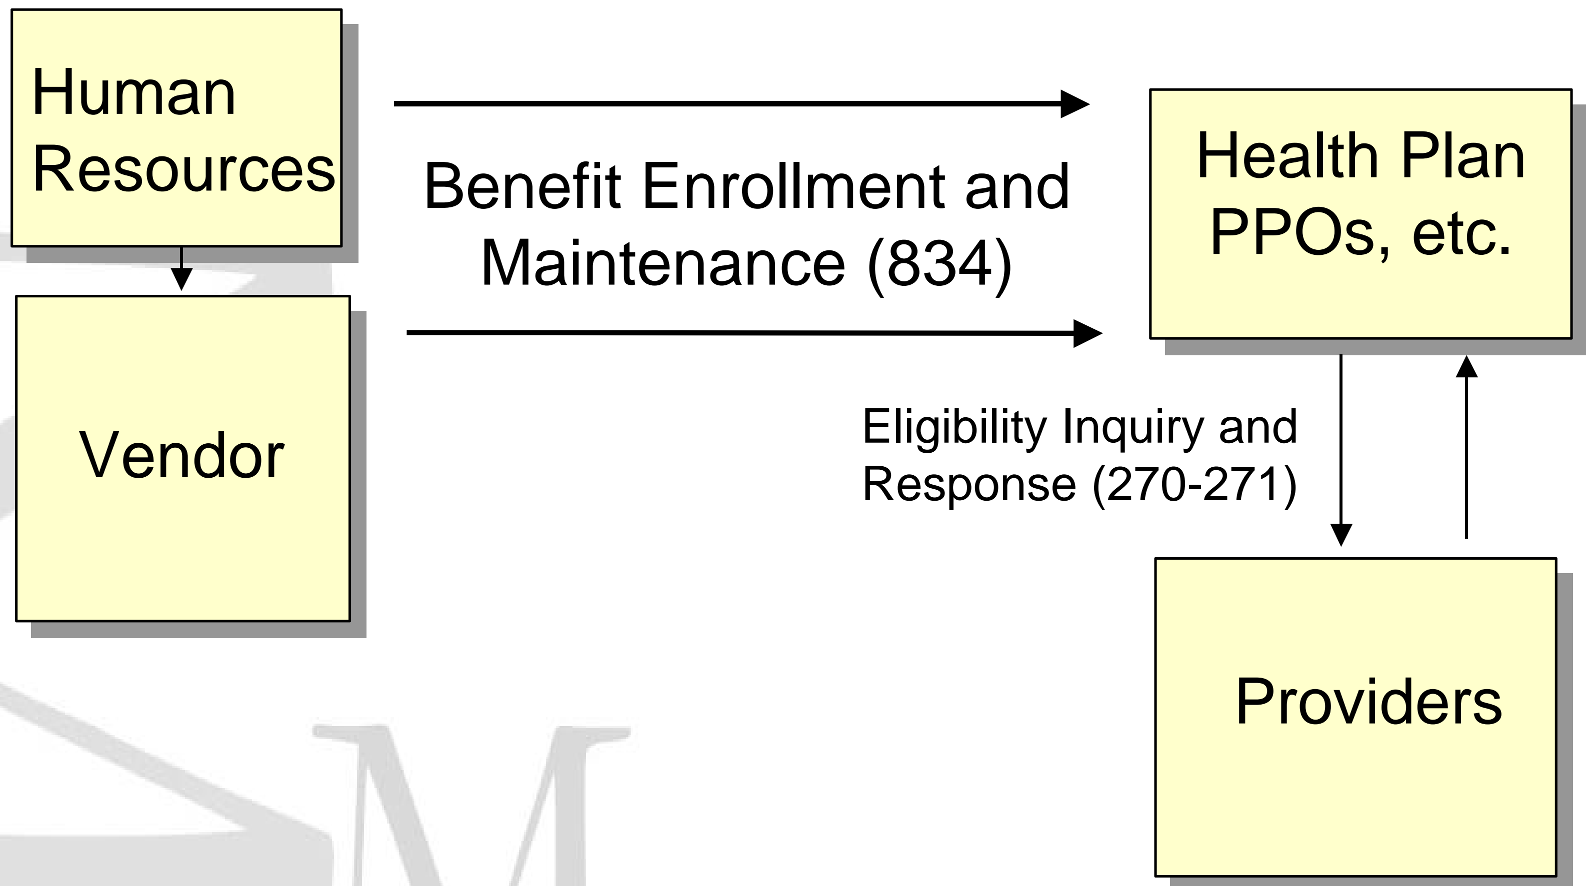
Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Employers Achieve High ROI

- **AT&T**
  - **Saved $15 million in first year of EDI enrollment.**
    - WEDI pilot in 1993
    - Substantial decrease in claims paid to ineligible claimants
- **Regents of the University of California**
  - Implemented HIPAA compliant enrollment
  - Found and corrected $1million billing error
- **Pacific Business Group on Health/CALINX**
  - Workgroup examined and adopted X12 standards as part of CALINX initiative. CALPERS, UC System, SBC and others using HIPAA transactions.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

834 Benefit Enrollment and Maintenance



Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

834 Benefit Enrollment and Maintenance

Enrollment Updates can be of two different types; Updates or Full File Audits

•Updates contain additions, changes and deletions. X12 developers recommend transmissions as often as daily.

•Full File Audits are a complete list of all covered lives and related coverage details. These are often sent monthly or quarterly.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

834 Benefit Enrollment and Maintenance

- Table 1, the header area, is simple. It contains the name and identification numbers of the Plan Sponsor, the Health Plan and possibly an intermediary broker or TPA.
- The Master Policy Number is also sent.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

834 Benefit Enrollment and Maintenance

- Information in Table 2, detail section, includes the Subscriber name, address and ID #'s plus dates of coverage. Premium amounts can be sent.
- Dependent demographic data can also be sent including the name of the school attended by dependent.
- The HIPAA implementation Guideline only describes the standard's use when passing healthcare coverage selections. The full standard is more robust.
- Primary Care Physician information and Coordination of Benefit data can also be passed.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

834 Benefit Enrollment and Maintenance

See Handout!

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

834 Benefit Enrollment and Maintenance

Opportunities

The 834 is the standard of choice for the Human Resource Department, linking HR to all benefit administrators. Lower claims expense and improved customer service for employees and dependents are key benefits.

Related Risks

Mistakes in implementation may have an impact on many employees.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

834 Benefit Enrollment and Maintenance

Steps for Implementing

•Determine if the source data comes from HR or Payroll systems or both.

•Determine if add, change and delete files can be obtained.

•Determine if current benefit plans and contract codes fit within HIPAA-compliant 834.

•Develop a Project Plan to use either internal EDI resources or outside service bureau.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

820 Payroll Deducted and Other Group Premium Payment for Insurance Products

This transaction set can be used to:

- **make a payment,**
- **send a remittance advice,**
- **or make a payment & send a remittance advice.**

The 820 can be an order to a financial institution to make a payment to a payee. It can also be a remittance advice identifying the detail needed to perform cash application to the payee's financial institution, or through a third party agent.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

820 Payroll Deducted and Other Group Premium Payment for Insurance Products

The Table 1 header area of the 820 is identical to the Table 1 of the 835 which we will cover later.

Table 1 contains the name of the payer and the payee and instructions to the bank about the movement of money.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

820 Payroll Deducted and Other Group Premium Payment for Insurance Products

In Table 2, the detail area, Remittance Detail Information can be delivered in two ways:

- a summary bill payment,
- or an individual or “list bill” payment.

Individual payments are of two types. The first type is a Payment made for each subscriber that includes amounts due for dependents.

The second Individual Payment type includes a payment amount for each subscriber and each dependent.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

820 Payroll Deducted and Other Group Premium Payment for Insurance Products

Opportunities

Automation of premium payments beings discipline and standardization to business practices.

Automated Health Premium Payments lay the groundwork for benefits that are paid through all premium deduction. The 820 can also be used for all EDI payments other than claims payments.

Related Risks

Errors in implementation can cause problems for many employees.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

820 Payroll Deducted and Other Group Premium Payment for Insurance Products

Considerations for implementing.

- Review contracted terms for premium calculation.
- Determine if output file is available.
- Consider in context of enrollment, invoicing and payment.
- Consider use of outside service bureau if there is no corporate EC/EDI department.
- Determine if financial EDI delivery is required by payees and review your bank's capabilities.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

270

Eligibility, Coverage or Benefit Inquiry

271

Eligibility, Coverage or Benefit Information

Eligibility Transaction Processing is captured in the back and forth exchange of 270 and 271 Transactions.

The 271 can also be the capitation roster but that is not a HIPAA mandated transaction.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

270/271

These transaction sets can be sent in both a batch and real time mode.

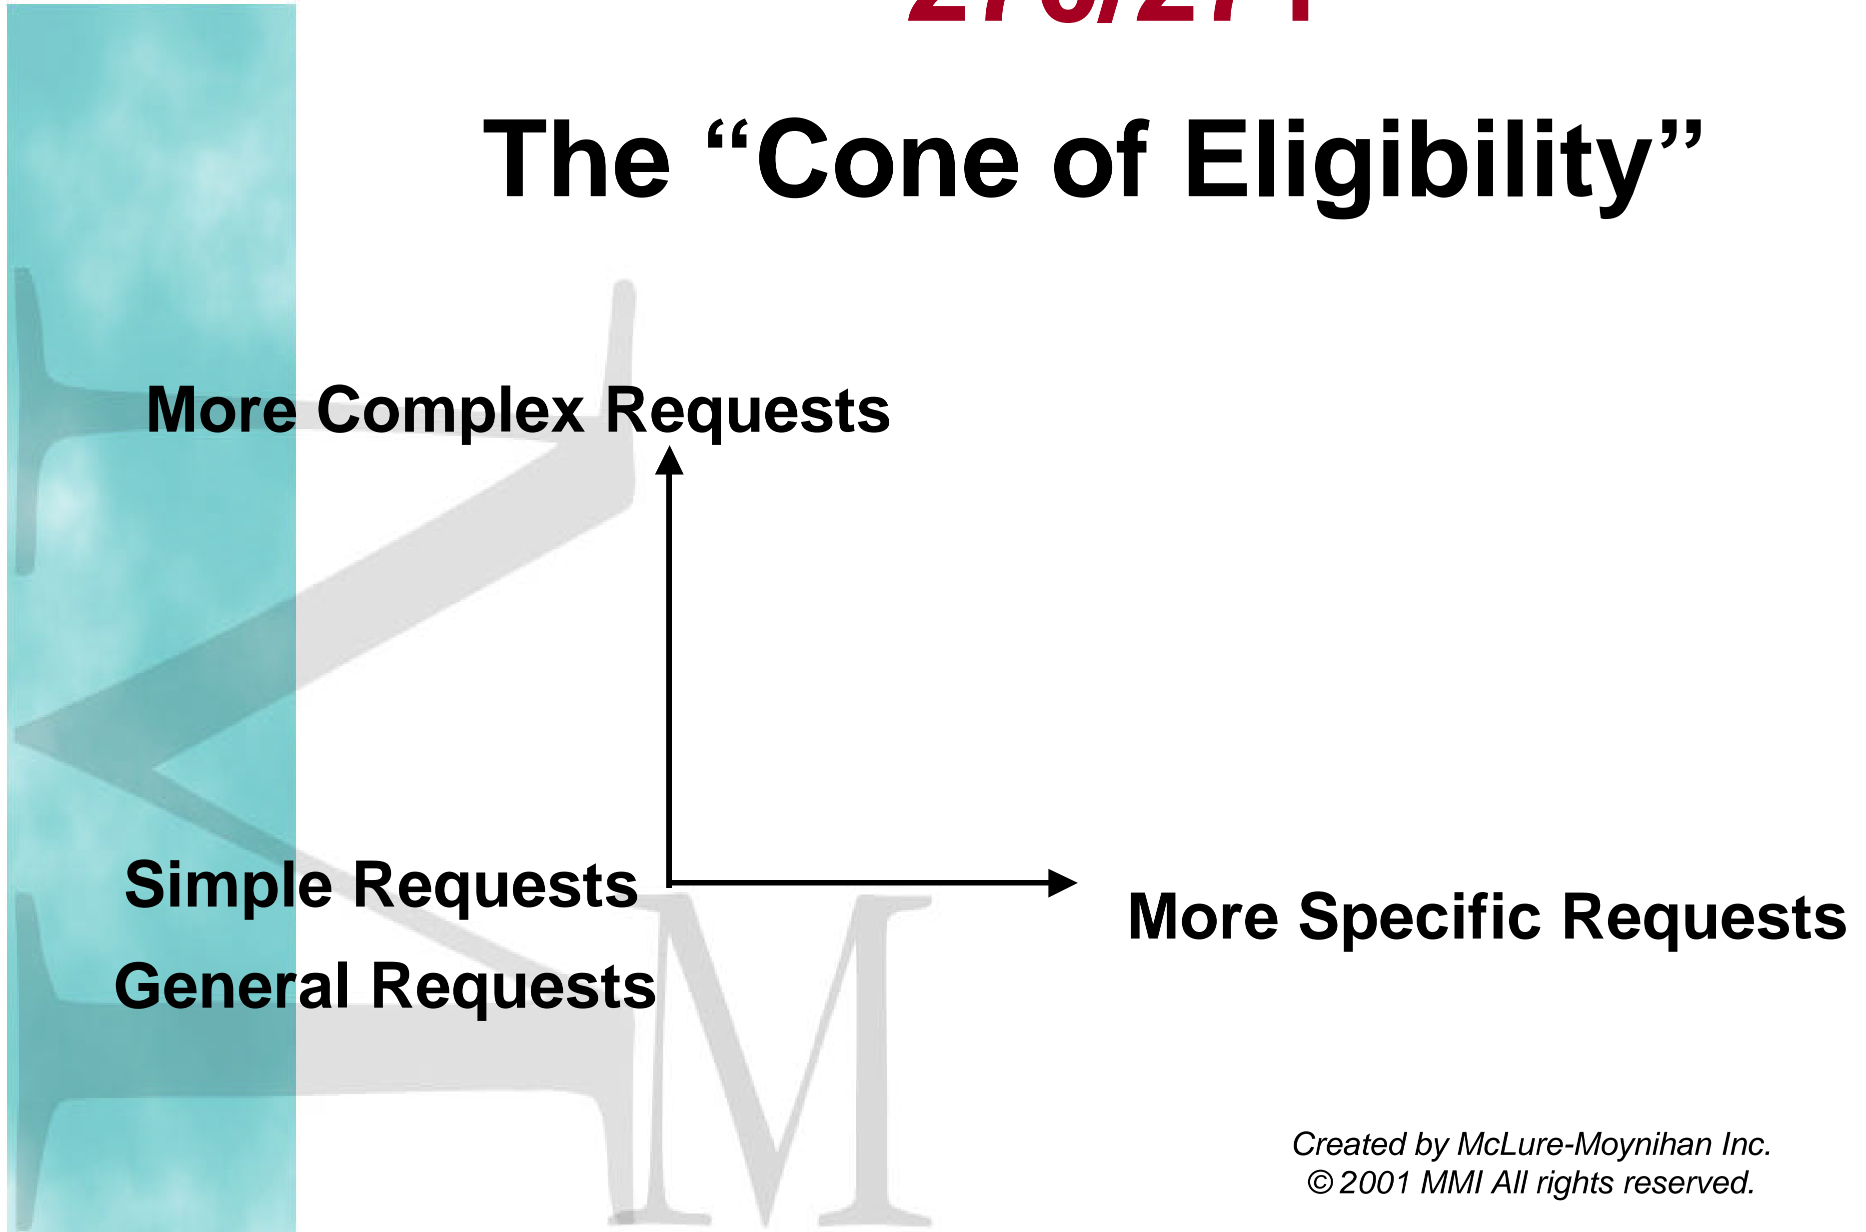
Batch files are often sent in a "store and forward" mode with receipt of a response occurring in a separate communication session.

Real Time transactions occur with both and inquiry and a response occurring within the same communication session.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

270/271

The "Cone of Eligibility"



Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

270

Eligibility, Coverage or Benefit Inquiry

General Request Example

Submitter Type	Payer/Plan Benefits Requested
All Provider Types	All Medical/Surgical Benefits and Coverage Conditions

Categorical Request Example

Submitter Type	Payer/Plan Benefits Requested
Specific Provider Type	All Benefits Pertinent to Provider Type

Specific Request Examples

Submitter Type	Payer/Plan Benefits Requested
Ambulatory Surgery Center	Hernia Repair
DME	Wheelchair Rental

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

270

Eligibility, Coverage or Benefit Inquiry

- Information Source
  - Information Receiver
    - Subscriber
      - Eligibility or Benefit Inquiry
    - Subscriber
      - Dependent
        - Eligibility or Benefit Inquiry
        - Eligibility or Benefit Inquiry

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

Eligibility Management

Opportunities

Stanford University reports that 50% of its bad debt was attributable to bad eligibility data.

NEHEN experience shows eligibility to be the best candidate for initial EDI implementation.

Related Risks

EDI Eligibility processing changes many jobs in patient accounting. Integration may not be supported by the underlying systems and procedures.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

270/271 Eligibility Processing

Steps for Implementation

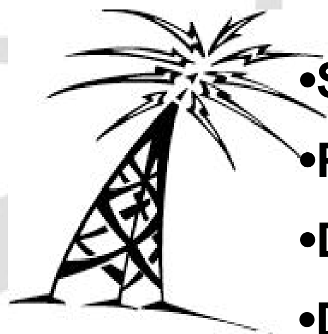
- Determine support for eligibility processing in your patient accounting system.
- Determine timing of adoption by dominant payers in your market.
- Determine if you should use a vendor or build EDI functionality yourself.
- Review Vendor solutions/develop EDI plan.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

278

Health Care Services Review Information

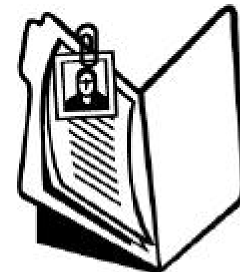
This transaction set can be used to transmit health care service information, such as:



- **Subscriber**
- **Patient**
- **Demographic**
- **Diagnosis or Treatment Data**

for the purpose of request for:

- **Review**
- **Certification**
- **Notification**
- **Reporting the outcome of a health care services review.**



Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

278 *Health Care Services Review Information*

Users of this transaction include:
- Managed Care Payors
- Providers
- Utilization Review Firms

This transaction should not be used for Medical Management/Case Review

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

278 *Health Care Services Review Information*

Opportunities

Authorization goes hand-in-glove with Eligibility.

Texas and Washington state hospital associations pushing for adoption of 278-based forms.

Related Risks

This standard has relatively little support among payers today. Don't gear up to support the 278 until your trading partners commit.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

278 *Health Care Services Review Information*

Steps for Implementation

- Determine if your system can support 278 transaction processing.
- Determine if vendors can supplement system shortcomings.
- Determine if your trading partners will support 278 exchanges.
- Review the business process change for your UR staff.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

837 Health Care Claim

This transaction set can be used to:

•submit health care claim billing information

•encounter information

•Or both

Providers of Health Care Services

Directly

Payers

Intermediary Billers & Claims Clearinghouses

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

837 Health Care Claim

It can also be used to transmit health care claims and billing payment information between payers with different payment responsibilities where coordination of benefits is required or between payers and regulatory agencies to monitor the rendering, billing, and/or payment of health care services within a specific health care/insurance industry segment.

Created by McLure-Moynihan Inc.

837 Health Care Claim

Opportunities

All providers will benefit from increased acceptance of EDI claims.

Sophisticated providers will be able to initiate direct sends more readily.

COB processing will be revolutionized… but not soon.

Related Risks

Loss of local code usage may have an impact for reimbursement from some payers (Medicaid).

837 Health Care Claim

Steps for Implementing/Planning

• Determine if your Patient Accounting System vendor is responsible for your systems compliance with HIPAA.

• Determine if you have non-compliant local transmissions.

• Evaluate impact of local code usage and discuss with your trading partners

• Interview your claims clearinghouse about its HIPAA plan.

276/277

Health Care Claim Status Request and Notification

The HIPAA Implementation Guidelines describe how Claims Status data can be exchanged in the 276 and 277 Transactions.

The Claims Status Response can be used without an related 276 preceding it. The 277 can be:

…a notification about health care claim status including front end acknowledgements and,

…a request for additional information about a health care claim by the payer.

These are important but non-HIPAA mandated uses of the Standard.

276/277

Provider Patient Accounting System

837

277

Unsolicited Claims Status Notification
Can indicate which claims in the 837 batch passed front end edits and what additional information may be needed by Payer.

276

Health Care Claim Status Inquiry
Requests claims status information from payer.

277

Health Care Claims Status Notification
Informs the receiver that about the status of claims inquired about in a preceding 276.

Claims Payer

277

Health Care Claim Status Notification

How Would It Work?

- Providers should be tracking claims received by the payer through 997 tracking. The 997 indicates acknowledgement by the company, not by the claims system.
- The 277 standard tells providers about what happened when the claim arrived at the application program.

276/277

Health Care Claim Status Request and Notification

Payers may provide claims status reports from various points in the adjudication process.

•Pre-adjudication (accepted/rejected claim status)

•During adjudication (claims pended)

•Adjudicated but not yet paid claims.

The standard provides Claim Status Category Codes for “categories” of messages. These include A for acknowledged, E for errors, P for Pending F for finalized and R for requests.

277

Health Care Claim Status Notification

About The Black Hole

- **Acknowledgement tracking with the 997 and the 277 will revolutionize patient accounting.**
- **Phone call, errors and waste will be eliminated for both payer and provider.**

276/277

Health Care Claim Status Request and Response

Business Issues

Many payers, particularly Medicaid agencies put claims status messages such as rejections on remittance advices. Payers have widely varying ability to support the standard. Providers should be aware of the payer business model and capability.

Providers must integrate status data into the accounts receivable process to automate claims tracking.

835

Health Care Claim Payment/Advice

This transaction set can be used to make a payment, send an Explanation of Benefits (EOB) remittance advice, or make a payment and send an EOB remittance advice only, from a health insurer to a health care provider either directly or via a financial institution.

One 835 describes **one** payment which may represent reimbursement for one or many claims.

835

Health Care Claim Payment/Advice

Table 1 is used to notify or instruct trading partners about the routing of the money and the claims remittance detail. Table 1 information also serves as a replacement for all the financial documents used in making a payment.

This is more than "just a check" because we are dealing with the data and documents needed for both the originator (payer) and the beneficiary (provider).

835 *Health Care Claim Payment/Advice*

Table 3

- PLB Provider Level Adjustment
- SE Transaction Set Trailer

The Provider Level Adjustment is used for adjustments unrelated to any particular claims such as a discount amount or an interest paid amount.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

835

Health Care Claim Payment/Advice Highlights

The 835 must balance at three different levels.

- At the Service Line level the Service Amount paid must equal the Service Amount submitted less adjustments.
- At the Claims Level the Claim Amount Paid must equal the Claim amount submitted less adjustments at the Claim Level plus Service Amounts Paid.
- At the Payment Level the Total Payment (BPR01) must equal the totals of all Claim Amounts Paid less any Provider Level Adjustment.

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

835 *Health Care Claim Payment/Advice*

Opportunities

For Payers, sending a secure electronic 835 can be done for less than the cost of a stamp. Many payers print and collate checks and EOBs with the potential for sending EOB data to the wrong party.

For Providers receipt of the 835 provides the opportunity to automate posting and closing tasks. Automated secondary billing is also facilitated through receipt of ERA data.

Related Risks

Financial EDI is new to most payers.

Created by McLure-Moynihan Inc.

835 *Health Care Claim Payment/Advice*

Steps for Implementing

Determine if your Bank is EDI capable for both origination and receipt of EDI payments.

Determine if your AP or Claims System has the necessary fields to support financial EDI.

Determine How your Trading Partners want to do business.

Always involve the Treasury staff early.

Compliance Planning

- Create Team, Educate the Team and Strategize
- Perform High Level Assessment
  - Security
  - Data Sets
  - Transaction Standards
  - Privacy
- Evaluate multiple options (in-house vs. outsource, build vs. buy etc)
- Develop Comprehensive Plan

Created by McLure-Moynihan Inc.
© 2001 MMI All rights reserved.

The Challenge

Change Management

- Comprehensive Analysis of Current Procedures
  - Comprehensive workflow analysis and data modeling to avoid major errors.
- Detailed Vision of Future State
  - Best Practices must be understood in detail
  - HIPAA Plan consistent with IS and Corporate Strategic Plans
- Step-by-Step Implementation Plan
- Appropriate Staffing and Funding
