

# The 21st National HIPAA Summit

*Healthcare Privacy and Security After HITECH  
and Health Reform*

February 19 - 21, 2013 • Washington, DC

## Day II – Afternoon Plenary **HIPAA, HITECH and Health Reform**

### **Introduction**

Bill Braithwaite, MD, PhD  
(Co-Chair)

# Future of Healthcare

- **Goal:** Best Care at Lower Cost (Sept. 2012 IOM Report)
- **Means:** Clinician/Patient direct interaction with Clinical Decision Support System (CDSS) (“Meaningful Use”)
  - In a continuously learning healthcare system.
- **Enablers:** EHR + HIE + CDSS (=> SAVES LIVES and \$\$\$)
- **Requires:**
  - Interoperability with sources of clinical data and sources of computable rules for best clinical practices (Standards).
  - Incentives to incorporate HIT into healthcare practice (Resources and Regulations).
  - Investigations of systemic failures to enable systems that detect and prevent errors through best practices at the point of decision making (Research).
  - Trust through interoperable security and privacy (including patient consent).
