

ACA Operating Rules Update

February 2014

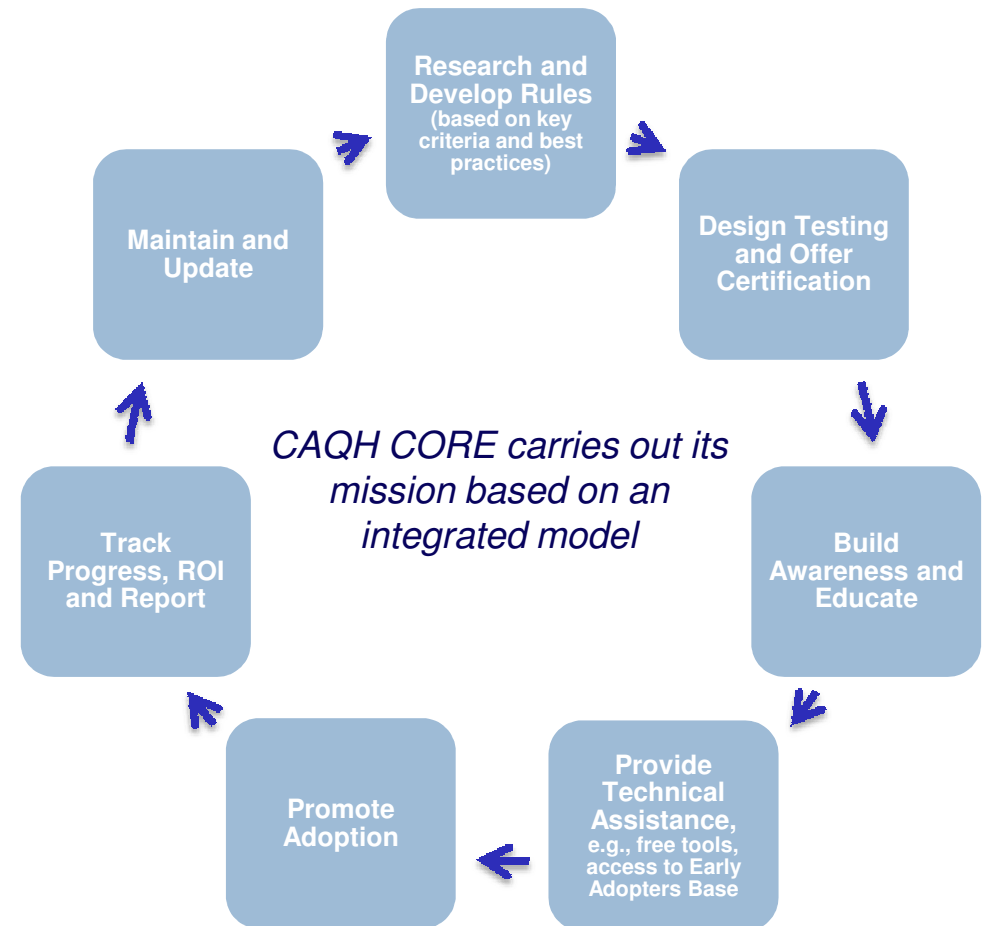

22nd National HIPAA Summit

Status: ACA Mandated Operating Rules and Certification

CAQH CORE

- Established in 2005.
- **Mission:** Build consensus among healthcare industry stakeholders on operating rules that facilitate administrative interoperability between providers and health plans, and drive adoption of operating rules and the affiliated standards through testing-based certification.
- **Vision:** Streamlined, robust, efficient, and trusted administrative data exchange based on a set of Guiding Principles such as alignment of clinical and administrative.
- **Participants:** 140+ multi-stakeholder entities with multi-stakeholder Board.

Implementation Status:

Progress and Change in Daily Operations

EFT & ERA Operating Rules:

Rules in Action

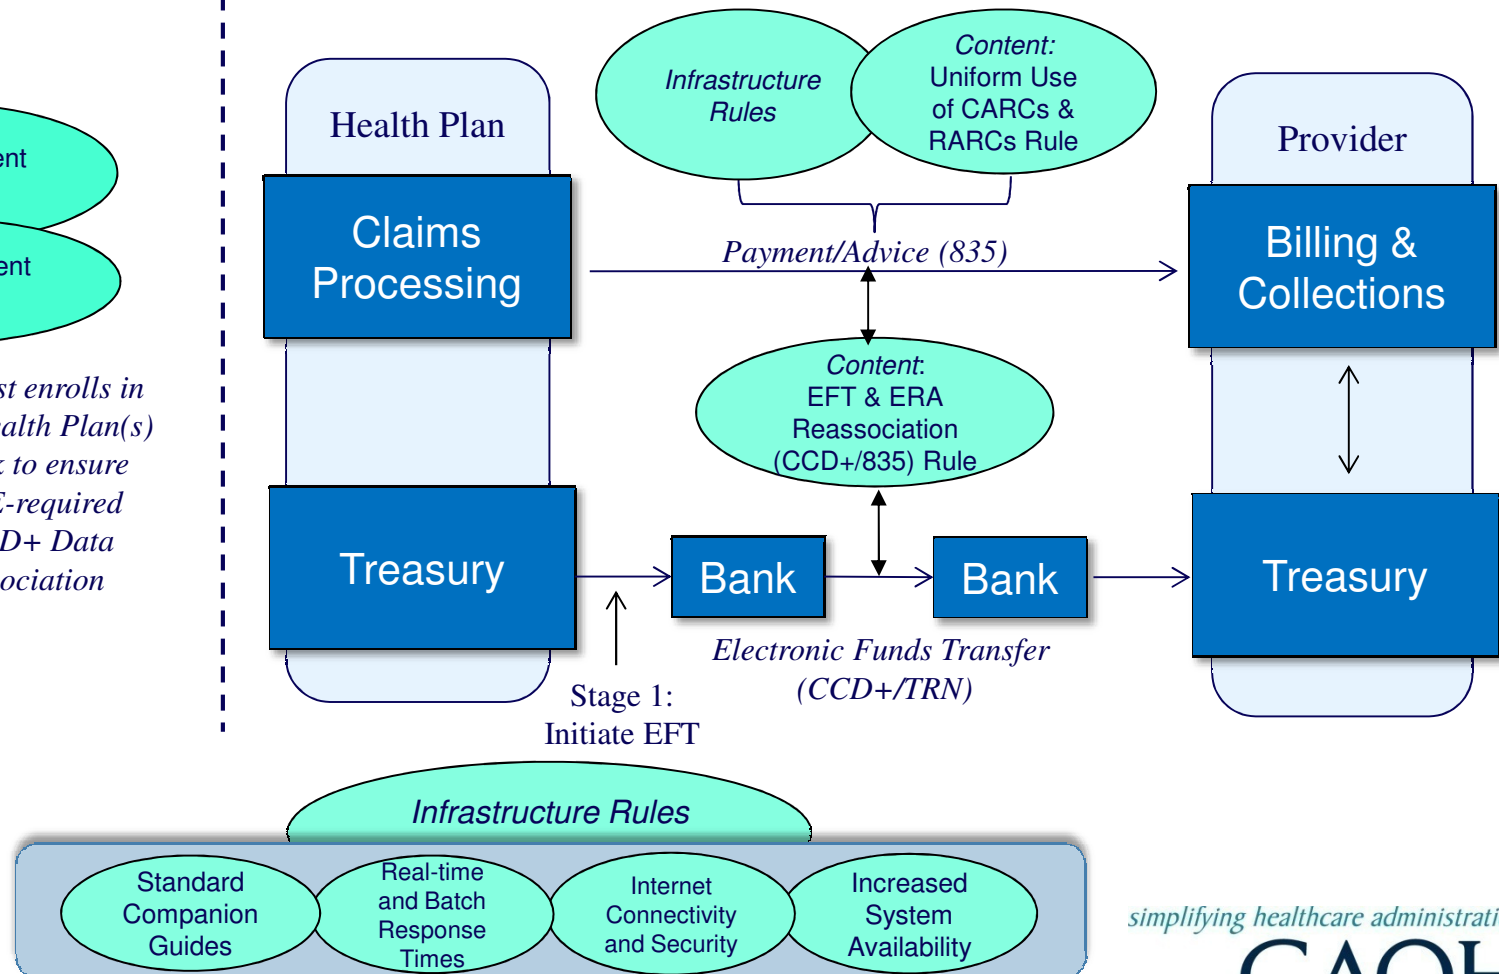

Indicates where a
CAQH CORE
EFT/ERA Rule
comes into play

Pre- Payment: Provider Enrollment

Content: Provider first enrolls in EFT and ERA with Health Plan(s) and works with bank to ensure receipt of the CORE-required Minimum ACH CCD+ Data Elements for reassociation

Claims Payment Process

simplifying healthcare administration
CAQH

Clearinghouse EFT & ERA Implementation Progress:

Sample CAQH CORE Polling Data

Roughly 75% of Clearinghouse respondents are either Well Underway, Nearing Completion or fully Complete with implementation of the EFT & ERA Operating Rules; Almost half of all Clearinghouse respondents (48%) identified their implementation process as being Complete

	June 2013 N=82	January 2014 N=42
Not Started	1% (1)	2% (1)
Planning & Analysis	40% (33)	24% (10)
Well Underway	49% (40)	14% (6)
Nearing Completion	10% (8)	12% (5)
Complete*	-	48% (20)

NOTE: The data is all in aggregate based on polling responses and per CAQH CORE policy, individual names are never shared; polling does not verify respondents stakeholder type.

simplifying healthcare administration

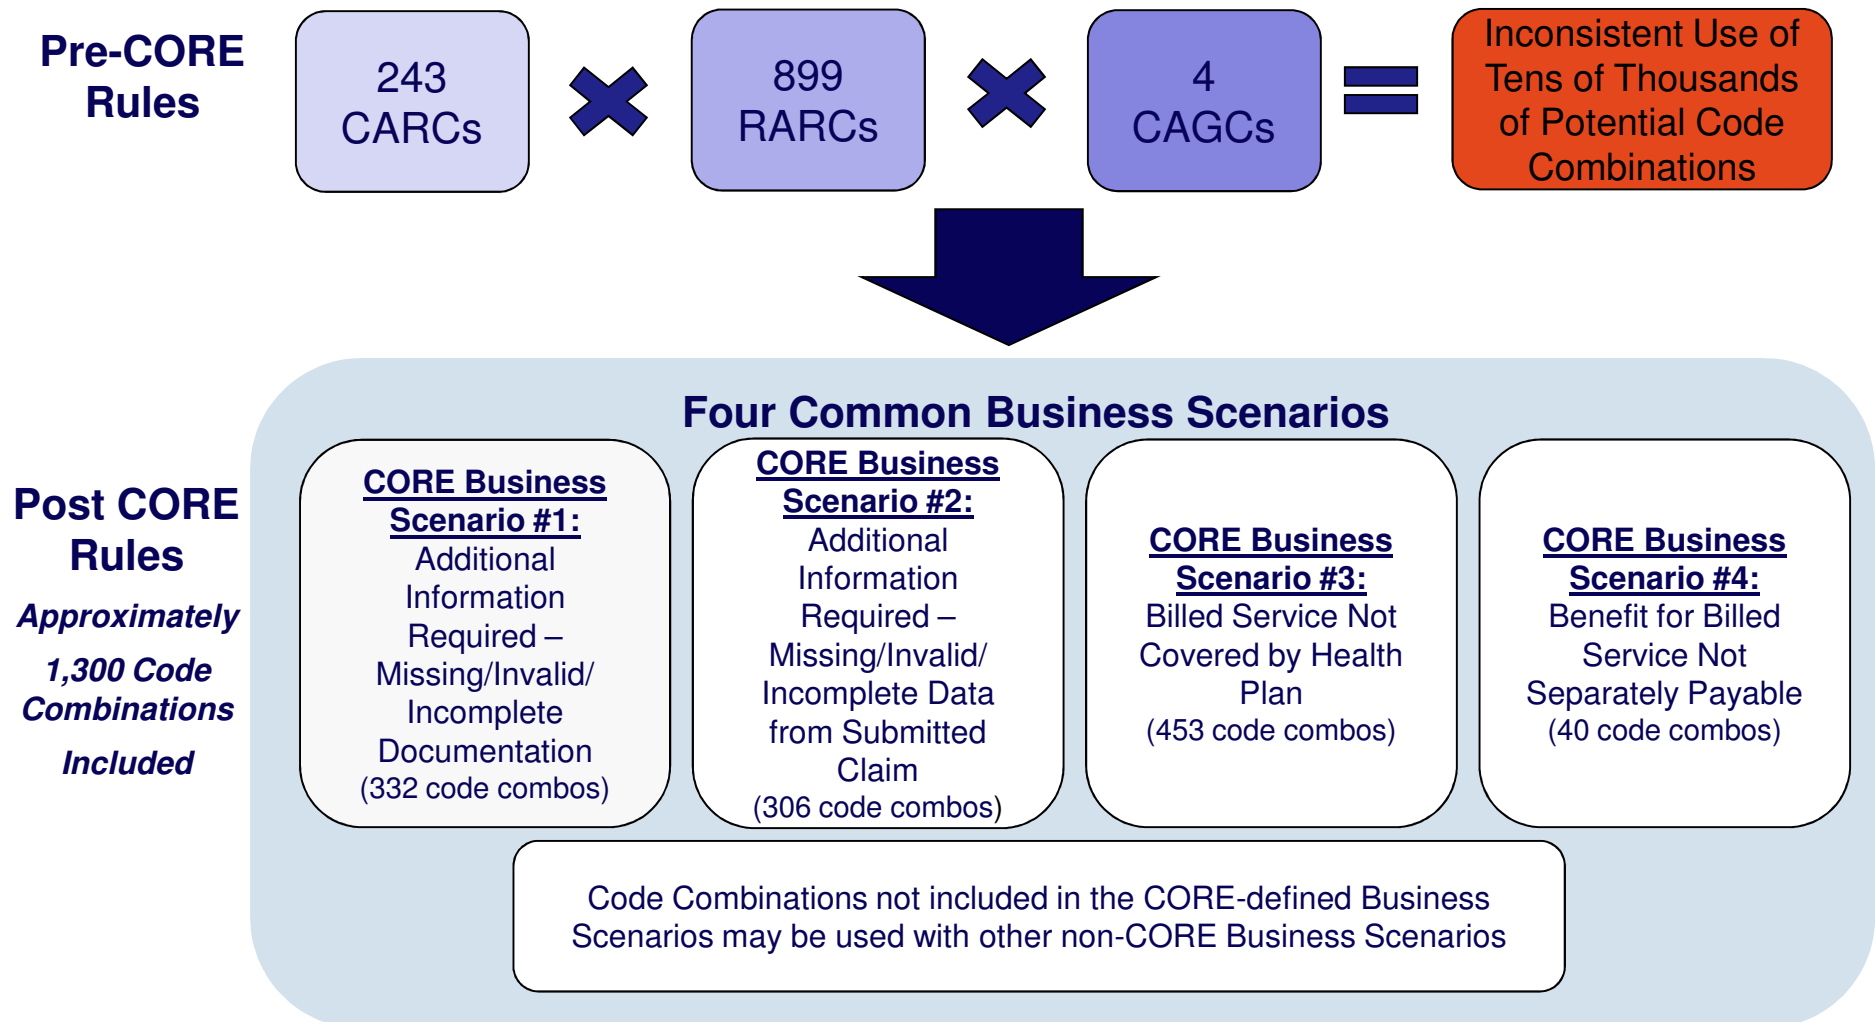

Example of Healthcare EFT CCD+ Statistics NACHA Is Tracking Given ACH Network Configuration

“Credit” is a deposit by health plan to provider for services rendered by the provider. January growth over December in number of payments was 10.0%.

	Sep-13	Oct-13	Nov-13	Dec-13
Number of Forward CCD Credits	1,319,207	5,628,162	6,177,825	7,403,758
Total \$ Value of CCD Credits	\$ 7,467,200,858	\$25,090,277,619	\$27,222,083,672	\$ 34,678,572,215
Avg # of credit trans per business day	188,458	255,826	325,149	389,671

CORE Rule Uniform Use of CARCs and RARCs: *Four Business Scenarios*

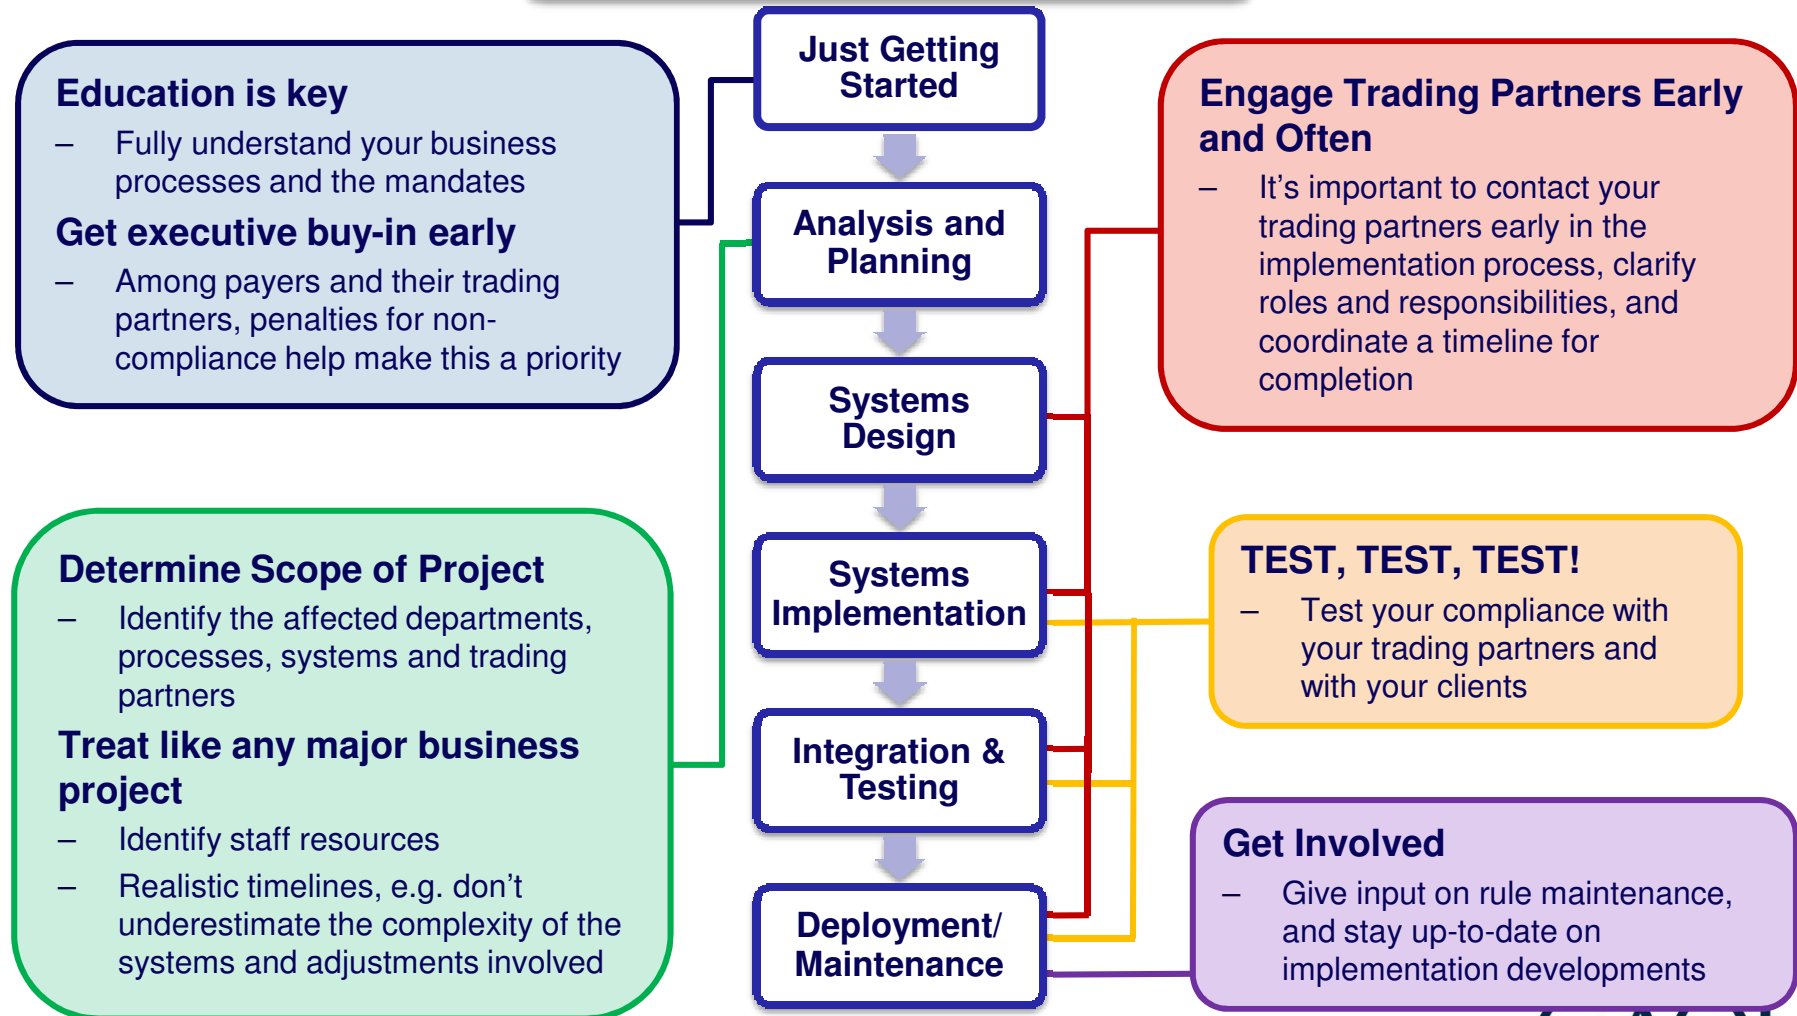

Code Combination Maintenance:

Market-based Review (MBR) Additions and Removals

- This is detailed work: No pain no gain!
 - Given massive use of codes and their impact on claim denials/adjustment, industry needs a uniform set for simplification and identification of areas for improvement/alignment/resource allocation
 - Example of Code Combination under Business Scenario #1
 - **CARC:**
 - *Attachment/other documentation referenced on claim was not received*
 - **RARC:**
 - *Missing post-operative images/visual field results*
- Any HIPAA covered entity can submit code combinations
 - 60 day submission period (ends February 15th)
 - Submissions MUST meet criteria
 - The 2013 online MBR Form will only consider the addition/removal of *CORE Code Combinations* in the existing four CORE-defined Business Scenarios.

Implementation Steps for HIPAA Covered Entities: *Best Practices and Lessons Learned*

Communication is Critical!

Initial Step of HHS Health Plan Certification

Identifying Meaningful Comments

HHS NPRM on Health Plan Certification:

Steps During Comment Period

Public Deliverables (See website)	Examples of Key Substantive Comments to Date
GOAL: Generate meaningful and constructive comments for HHS	
List of Initial Observations	<ul style="list-style-type: none"> • HPID Use in Certification vs. Other Efforts: How can industry ensure that HPID identifier used in certification isn't confused for what may be in the actual transaction? • Engaging Vendors: For proposed HIPAA Credential, how to formally engage and involve the vendors that support health plan compliance? • Terminology and Involved Parties: Are self-insured health plans included, and if so, what role can their Third Party Administrators (TPA) play in the certification of this large volume of health plans? • Audit and Penalties: Is there a reasonable method to recognize that complex IT systems need some tolerance level, e.g. 99.5%? • Stages after Initial Stage: Certify not just health plans, but also PMS and others entities essential to end-to-end success.
Open CAQH CORE Call on Initial List of NPRM Observations	
Draft model comment letter: <i>Contains requests for changes, clarifications and recommendations</i>	
CAQH CORE-only call	
Final model comment letter for entities to use as they deem appropriate	

A CAQH Initiative

CORE-Certified or Pledged Entities

- Already over 80 entities CORE-certified on Phase I and II (eligibility and claim status), e.g.
 - Aetna, United, WellPoint, Availity, Mayo, NextGen, Passport, RelayHealth
- Recent certifications or pledges include:
 - *BCBS Nebraska
 - BCBS Puerto Rico
 - Excellus
 - Florida Division of Medicaid
 - *Humana
 - *InstaMed
 - MaineCare
 - MEDITECH
 - Tufts Health Plan

*All current CORE Certification phases completed including EFT/ERA

New Operating Rule Development

Aligning Efforts and Momentum

Connectivity, Infrastructure & Security Industry Landscape: *Legislative, Market Movements, & National Initiatives*

Legislative and National Initiatives Movement towards increased adoption of Standards

Legislative Movement

- ✓ HIPAA covered entities are implementing CAQH CORE Connectivity for ACA Section 1104 compliance
- ✓ Meaningful Use Stage 2 has transport requirements for Providers/EHR systems such as use of ONC DIRECT
- ✓ HITECH Act has greater security requirements, penalties for lack of security

Interoperability Initiatives

- ✓ CAQH CORE
- ✓ eHealth Exchange (formerly NwHIN)
- ✓ ONC S&I esMD has adopted CAQH CORE Connectivity
- ✓ Trust policy frameworks developed by DirectTrust, white papers by ONC S&I esMD Author of Record

Market Movement towards increased Connectivity, new Business Needs

Market Movement

- ✓ Market movement from paper based to Internet based electronic transactions.
- ✓ Efficiencies of scale gained as more trading partners support electronic transactions
- ✓ Improved efficiency as more electronic transactions become standards based

Technical Impact of Direct Connectivity

- ✓ Need to support standards in new areas such as attachments
- ✓ Need for reliability and security in support of the new business transactions

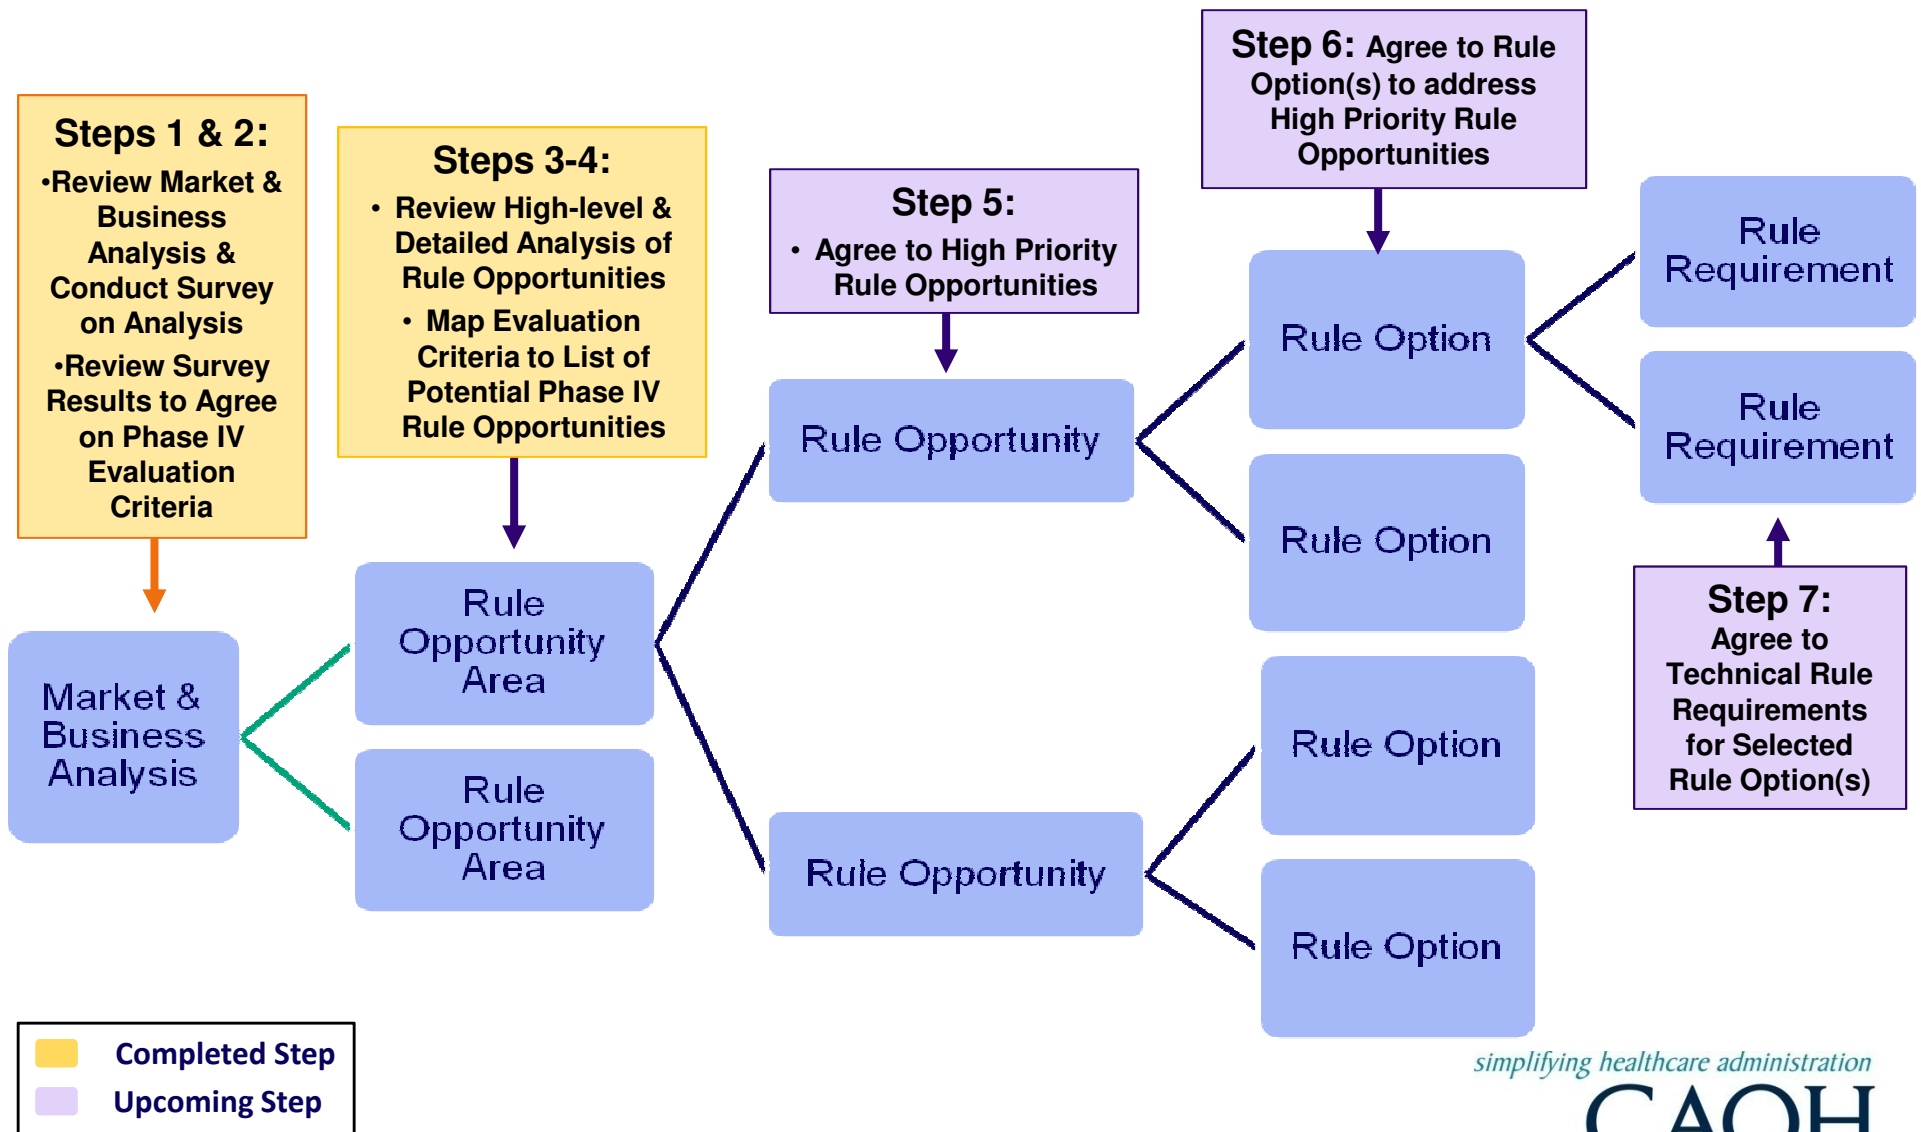

Government PKI Infrastructures

- ✓ Federal Bridge is built and operational supporting cross-certification of trusted PKIs

3rd Set of Operating Rules and CORE Connectivity

Rule Development Work Flow

3rd Set of Operating Rules:

Examples of Potential Rule Opportunities Under Discussion

How can connectivity and infrastructure Operating Rules drive selected criteria such as clinical/administrative alignment, adoption?

Examples of Identified Rule Opportunities

Transport and Enveloping

- Convergence of Authentication Standards for Safe Harbor, e.g. SOAP
- Explore support for ONC DIRECT as an additional transport option for Attachments

Enhancing Reliability and Security/Authentication

- Industry-wide policy for uniform use of digital certificates
- Enhanced envelope level security (e.g., Signature, SAML Authorization), determining B2B nature of transactions and that some signatures may be applied at the document (payload) level.

Message Interaction and Response Times

- Define transaction Specific Message Interaction (e.g., Real time, Batch) Requirements; likely will vary by transaction, e.g. claims may be only batch

3rd Set of Operating Rules:

Existing Draft CAQH CORE Operating Rule for Consideration

Health Care Claim Acknowledgment (277) Rule

- **Connectivity:** Requires entities to support the Connectivity Rule
- **System Availability:** Specifies system availability must be no less than XX percent per calendar week for both real time and batch processing modes
- **Downtime Reporting:** Includes reporting requirements for scheduled, non-routine, and unscheduled system downtime plus holiday schedule
- **Companion Guide Template:** Specifies use of the CAQH CORE Master Companion Guide Template for the flow and format of such guides
- **Acknowledgements:** Includes batch and real time Acknowledgement requirements
- **Response Time:** Specifies response time requirements for availability of Acknowledgements
- **Receivers of the X12 v5010 277:** Requires receivers of Acknowledgments to recognize and pass all error conditions to the end user and display text describing the specific error condition
