

Agenda

## Remote Patient Intelligence

Leveraging the revolution in biosensors and machine learning  
to eliminate all preventable hospitalization

Martin S. Kohn, MD, MS, FACEP, FACPE  
Chief Medical Scientist

## Remote Home Monitoring

- ▶ First Generation
  - ▶ Limited Value
  - ▶ Overly simplistic model of chronic disease
    - ▶ One size fits all
    - ▶ One disease, one parameter
    - ▶ One day change
- ▶ Real World Home Monitoring
  - ▶ More realistic model of chronic disease
  - ▶ All impactible diseases
  - ▶ Multiple measures, multiple time frames
  - ▶ Machine learning
