

# How Technology is Transforming California Healthcare

Molly Coye, MD, MPH  
CEO and Founder, HealthTech

It's not.

It's not.

Much...yet...

The transformation of healthcare in California has been driven by:

- Health Plans                      Utilization controls, capitation of providers
- Medical groups,                Full and partial-risk capitation  
    IPAs
- Employers                        Quality measurement and reporting  
    Pay for performance
- State government                Medi-Cal managed care, DSH
- Hospitals                         Hospitalists

*But not – information technology*

- Cutting-edge demonstrations of potential transformation by medical groups, IPAs
- Larger investments underway by delivery systems, health plans

How might we measure the transformation of healthcare by technology?

## Experience

36 million Californians in 2004:

- \_\_\_ %: online appointment scheduling
- \_\_\_ %: pharmacy refills
- \_\_\_ %: email with physician
- \_\_\_ %: pay medical bills online
- \_\_\_ %: customized health education
- \_\_\_ %: personal health record online

## Experience

36 million Californians in 2004:

- \_\_\_ %: online appointment scheduling
- \_\_\_ %: pharmacy refills
- \_\_\_ %: enroll in health plan online
- \_\_\_ %: email with physician
- \_\_\_ %: pay medical bills online
- \_\_\_ %: customized health education
- \_\_\_ %: personal health record online

## Infrastructure

- \_\_\_ %: administrative data integrated
- \_\_\_ %: integrated clinical data within IDNs
- \_\_\_ %: integrated data: plan - IDNs
- \_\_\_ %: community health data shared
- \_\_\_ %: telemedicine-enabled

## Clinical Care

36 million Californians in 2004:

- \_\_\_ % : clinical order entry - inpatient
- \_\_\_ %: clinical order entry - ambulatory
- \_\_\_ %: clinical results online, shared
- \_\_\_ %: EMR light
- \_\_\_ %: full EMR
- \_\_\_ %: community health data shared

## Clinical Care

36 million Californians in 2004:

- \_\_\_ % : clinical order entry - inpatient
- \_\_\_ %: clinical order entry - ambulatory
- \_\_\_ %: clinical results online, shared
- \_\_\_ %: EMR light
- \_\_\_ %: full EMR
- \_\_\_ %: community health data shared

## Clinical Care II

- \_\_\_ % : remote patient management
- \_\_\_ %: remote ICU management
- \_\_\_ %: point of care testing
- \_\_\_ %: bar coding, RFID
- \_\_\_ %: remote video translation

“Mrs. Marshall, get on the scale...”

HealthTech

### Home-based Telemedicine for Uninsured, High-risk Diabetic Population

Inpatient Admissions	▼ 32%
Emergency Room Encounters	▼ 34%
Outpatient Visits	▼ 49%

*(Diabetes Technology & Therapeutics Journal, 2002)*

### Asthma Self-management for High-risk Pediatric Population\*

Activity Limitation	▼ (p = .03)
High Peak Flow Readings	▲ (p = .01)
Urgent Calls to Hospital	▼ (p = .05)

*(Arch Pediatr Adolesc Med. 2002)*

### Care Coordination: Hypertension, Heart Failure, COPD, and Diabetes\*

Emergency Room Visits	▼ 40%
Hospital Admissions	▼ 63%
Hospital Bed Days of Care	▼ 60%
Nursing Home Admissions	▼ 64%
Nursing Home Bed Days of Care	▼ 88%

*(Disease Management, 2002)*

## The Vision

*Advancing the use of new technologies to make people healthier.*

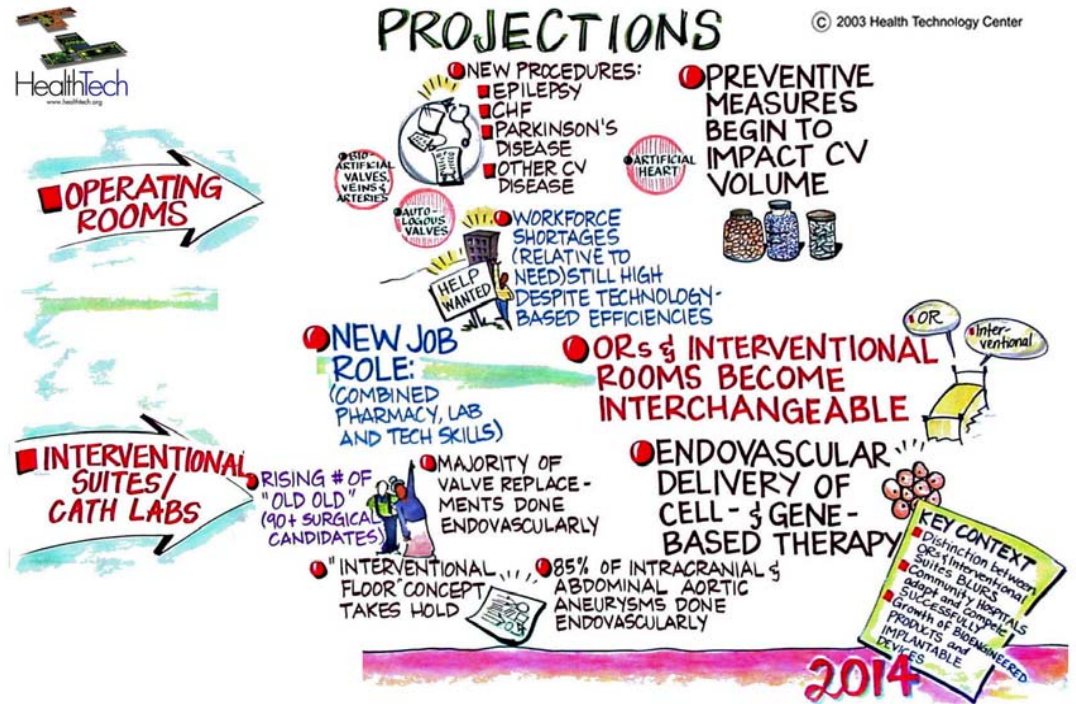

## The Mission

*To create a trusted source of expert information about the future of healthcare technologies.*

## The Means

*A nonprofit pooled research center for delivery systems and health plans.*

*Funding independent of developers and vendors of technology.*

## HealthTech's California Partners are Adopting:

- Vocera Direct voice communications systems
- I-Stat Point of care laboratory testing
- UC-Davis Remote video translation services in ED
- Visicu Remote management of ICU
- Bridge Medical Barcoding
- UC-Davis Telemedicine services for institutionalized,  
Blue Cross ambulatory, inpatient

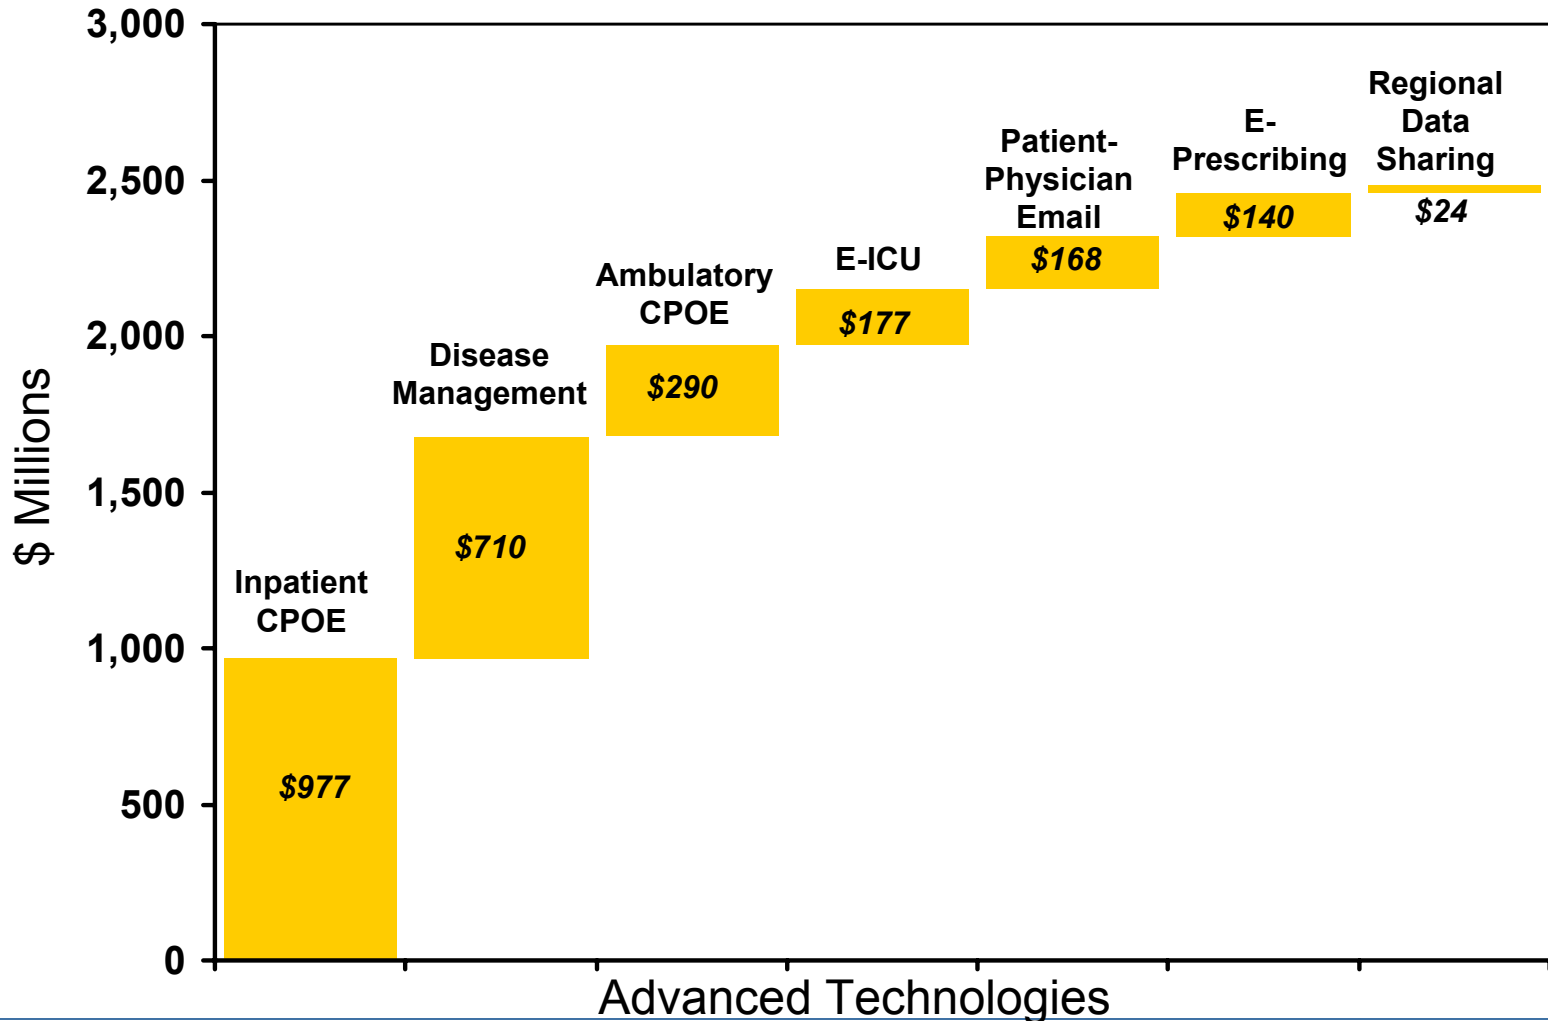

### *Not yet...*

- Radianse RFID
- NEHEN Regional data exchange
- Visicu Remote management of ED, acute care, LTC

Projected net annual benefit, at 75% adoption rate, for Massachusetts:  
\$2.48 billion

- ✓ Electronic communication between patients and their physicians
- ✓ Electronic prescribing
- ✓ Ambulatory computerized physician order entry
- ✓ Inpatient CPOE
- ✓ Regional data sharing
- ✓ Intensivist onsite 24x7 in ICUs
- ✓ Disease management

## Total Net Annual Benefit: \$2.5 Billion

## Highly cost-effective vs. standard care

- 32% reduction in hospitalizations
- 25% cost savings of approximately \$1,800/patient

## Effective and efficient care management

- Leverages use of RNs
- Targets care to those who need it

## Improvement in patient quality of life

- Fewer hospitalizations
- Increases patient education and contact with care managers
- High patient satisfaction levels

## National Savings

- At 25% adoption = \$500 million
- At 50% adoption = \$1 billion

## Veterans Administration

- HealthHero 'Buddy'
- National program

## California Medi-Cal

- Reimbursement: RPM
- Resistance – Home care practitioners
- Reimbursement – Telemedicine
- Resistance - Specialists

## California as laggard

→ *“I thought when I came to California I’d be seeing the most advanced systems...”*

→ Legislation: Wyoming, Florida, Delaware

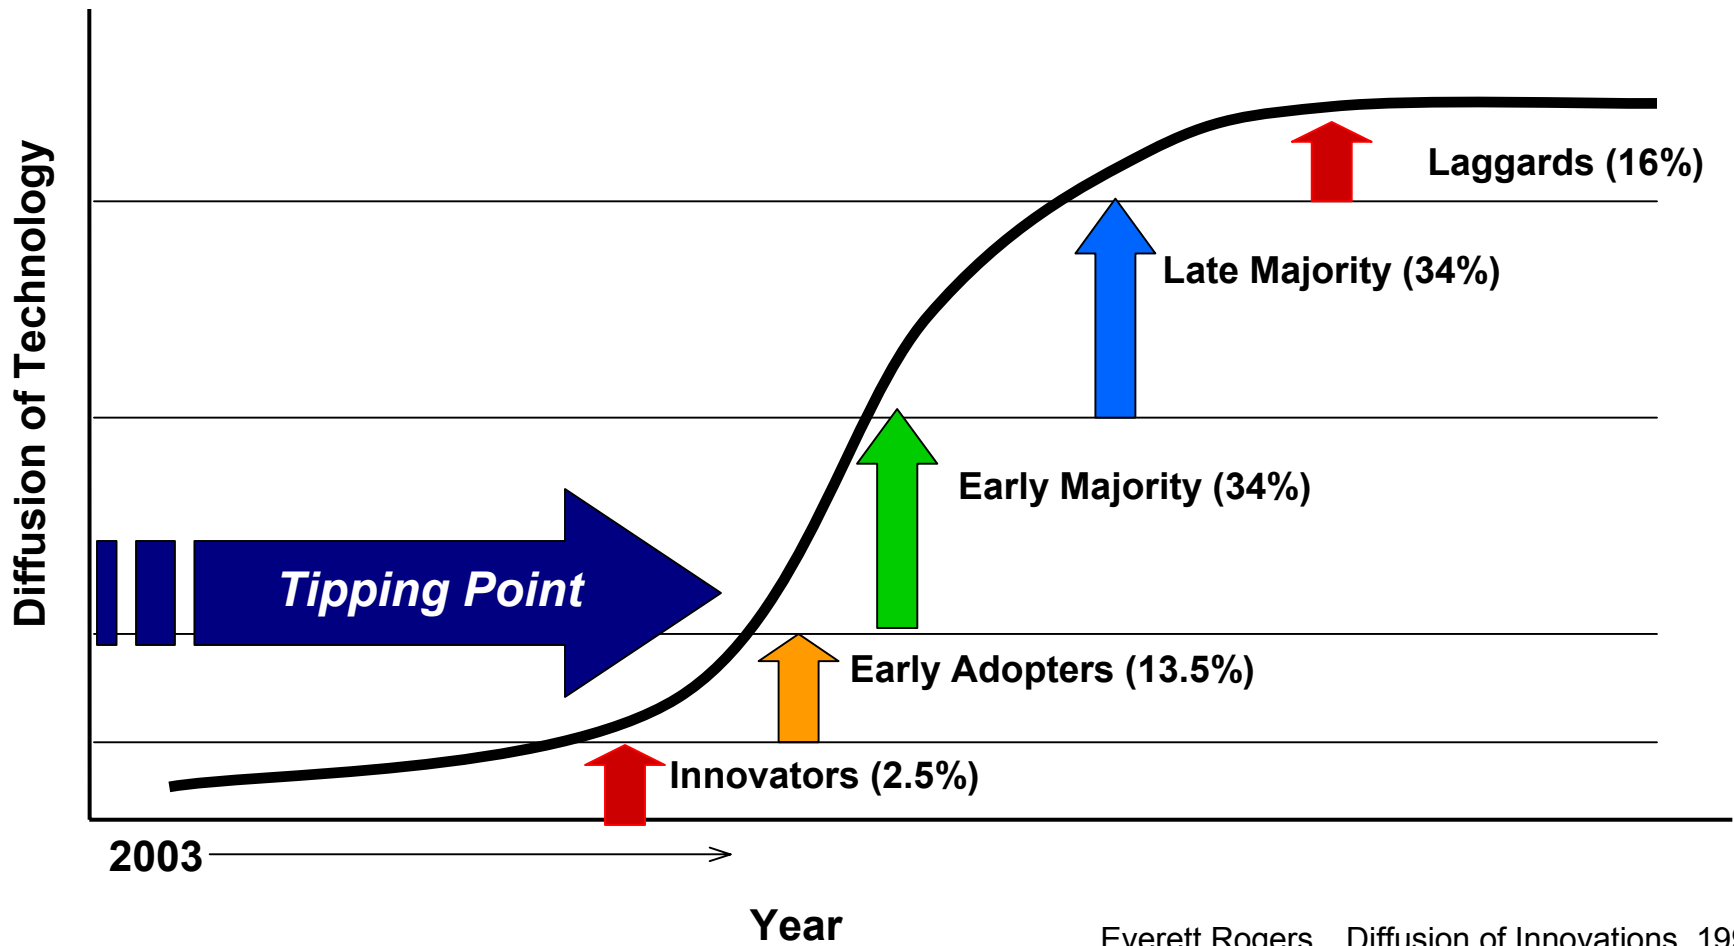

- Planning bodies
- Funding
- Stakeholders brought to the table

→ Medicaid and indigent care:

- Disease management
- Investment in IT as administrative match

## Experience

36 million Californians in 2004:

RANGE	AVERAGE
• 2 - 35 %	10 %: online appointment scheduling
• 5 - 30 %	20 %: pharmacy refills
• 5 - 60 %	40 %: enroll in health plan online
• 2 - 20 %	5 %: email with physician
• 2 - 25 %	5 %: pay medical bills online
• 5 - 30 %	10 %: customized health education
• 1 - 20 %	5 %: personal health record online

*Source: Structured inquiry of California health care leaders, November 2004*

## Infrastructure

### RANGE

### AVERAGE

- 2 - 85 %      ?60 %: administrative data integrated
- 5 - 20 %      10 %: physicians using 'EMR light'
- 2 - 50 %      30 %: integrated clinical data within IDNs
- 2 - 50 %      5 %: integrated data: plan - IDNs
- 0 - 10 %      <2 %: community health data shared
- 3 - 10 %      <5 %: telemedicine-enabled

*Source: Structured inquiry of California health care leaders, November 2004*

## Clinical Care

36 million Californians in 2004:

RANGE	AVERAGE
• 1 - 90 %	?70 %: clinical order entry - inpatient
• 2 - 30 %	20 %: clinical order entry - ambulatory
• 2 - 25 %	25 %: clinical results online, shared
• 4 - 20 %	10 %: EMR light
• 1 - 20 %	20 %: full EMR
• 1 - 2 %	1 %: community health data shared

*Source: Structured inquiry of California health care leaders, November 2004*

## State agenda:

- 'Bank accounts' for all
  - EHR, direct access for all Californians
  - Security and confidentiality
  - Access for underserved
- Neural networks across the state
  - Providers, ancillary, plans, patients
  - Regional data exchange networks coalesce
  - Establish RHIOs to provide governance, financing
- State investment in IT and IT-enabled programs
  - Medi-Cal financing and savings
  - Uninsured, county responsibilities
  - Private public infrastructure model
  - Remote management approaches
  - Rapid research and deployment mechanisms
- Focus on chronic care, disabled, rural and underserved, and SNF populations
  - Reduce risk
  - Generate savings
- Need for leadership

## Federal role:

- Clear the underbrush
  - Standards and certification
  - Fraud and abuse, Stark
  - Enable RHIOs
- Build the highways
  - Network certification for data exchange
  - Public use data:
    - Public health
    - Quality and safety
    - Defense
  - Health quality and efficiency reports
- Reimbursement?
