Comparative Effectiveness A step to improved patient outcomes?

Peter Pronovost, MD, PhD Johns Hopkins University

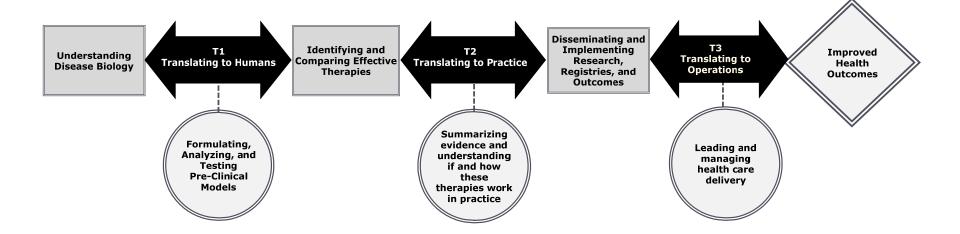

Outline

- Discuss a systems view of research
- Explore CE role in improving health
- Offer strategies to improve the efficiency and effectiveness with which patients receive recommended therapies

Start with the End in Mind

Translational Research Model

Decision X implementation = outcome

Decision = information X the call

Approaches to Summarizing Evidence

Static

Do not prioritize

Ambiguous

No tacit knowledge

The Call Is knowledge enough?

- Are physicians rationale decision makers?
- Does behavioral economics apply to medicine?

Implementation Science

- Correct decision
- Context
- Measurement and feedback

Michigan Case Study

CRBSI Rate Over Time

Median and Mean CRBSI Rate

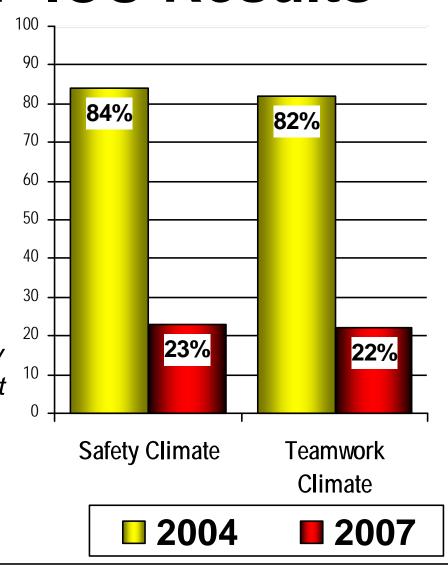

Time (months)

"Needs Improvement" Statewide Michigan CUSP ICU Results

- •Less than 60% of respondents reporting good safety climate ="needs improvement"
 - •Statewide in 2004 84% needed improvement, in 2006 41%
 - Non-teaching and Faith-based
 ICUs improved the most
 - •Safety Climate item that drives improvement: "I am encouraged by my colleagues to report any patient safety concerns I may have"

Keystone ICU Safety Dashboard

	2004	2006
How often did we harm (BSI)	2.8/1000	0
How often do we do what we should	66%	95%
How often did we learn from mistakes	100s	100s
% Needs improvement in		
Safety climate	84%	43%
Teamwork climate	82%	42%
