## CORE Certification

**Test and prepare to receive CORE certification.**

Claredi provides the most effective method to test and demonstrate compliance with the CORE certification requirements, a CAQH initiative.

The Claredi CORE site allows you to conduct a comprehensive test of your eligibility system to make sure you meet the requirements specified by CORE. Claredi has created a process that takes you step by step through the CORE requirements. This process is designed to help you obtain the CORE certification and uncover any potential problems and differences between your eligibility system and the CORE requirements. At the end of the certification process you will be ready to submit your CORE Seal application with all appropriate documentation, included testing results, to CORE as the final step in seeking CORE certification. This web site will guide you, step by step, in meeting each of the certification criteria.

Click on "New Account" on the menu at the top of this page to get started.

In addition to the CORE certification process, Claredi offers the Claredi Classic certification and testing process for HIPAA compliance; the Faciledi system for on-site HIPAA transaction validation, routing, and reporting; the Connectedi system as your electronic data gateway; and a complete set of products and services to help you manage the interoperability of your data interchanges.

## Open a New Account

Welcome! To help you get started creating your CORE-Certification account we need you to provide some information. This information will be used to create the type of account that will best suit your needs and to adjust the requirements for your CORE-Certification process. Please enter the information below. If you have questions or problems, please feel free to call Customer Support at (866) 444-0339, option 5.

Before you begin, you must familiarize yourself with the [CORE Phase I Rules and the requirements for achieving the CORE Certification](#).

Please download and review the 'Creating Your Account' section in the **User Manual** prior to opening a new account.

[Click here](#) for the **User Manual** for this site.

Select the CORE-Certification type your organization is seeking.

**Company Type:**

CORE Certification - Clearinghouse  
CORE Certification - Endorser  
CORE Certification - Payer  
CORE Certification - Provider  
CORE Certification - Vendor - Payer  
CORE Certification - Vendor - Provider

## Welcome Test Account Clearinghouse!

### Getting Started

Claredi's CORE Certification testing product has been designed to follow the CORE Phase I Rules and the requirements for achieving the CORE Certification Seal. The following steps will assist you in successfully getting started with your CORE Certification testing.

1. Before you begin, you must familiarize yourself with the CORE Phase I Rules and Certification requirements. [Click here](#) to be taken to the CORE Certification website.
2. Claredi's CORE Certification testing follows each of the sections outlined in the CORE Phase I Certification Testing Suite.pdf. CORE Certification testing for the CORE Phase I 270/271 Data Content Rules as well the Real Time and Batch Acknowledgement Rules requires you utilize the CORE Master Test Bed created by CORE. [Click here](#) to download the CORE Phase I Certification Testing Suite.pdf, the CORE Certification Testing Suite Version 1.0.0 Supplement.pdf and the CORE Master Test Bed Data in both wrapped and unwrapped formats. The CORE Certification Testing Suite Version 1.0.0 Supplement.pdf contains instructions on how you are to utilize the CORE Master Test Bed data for populating your databases for CORE Certification testing.
3. It is recommended that you download the [User Manual](#) for this site as it will provide you with additional assistance in guiding you through your CORE Certification efforts.
4. Once you are familiar with the CORE Certification testing documentation, you will need to customize your account with appropriate identifiers, passwords, delimiters, etc in your [Trading Partner Profile](#).

5. During testing, if you would like Claredi's Customer Support staff to have access to your account, please [click here](#) and check the Allow Claredi Customer Support access to my account box. You may also access this at anytime from the Support tab at the top of each screen.
6. **CORE Pre-Certification Testing**  
The CORE Pre-Certification Testing area is an optional area that allows you to pre-test your system using the CORE Test Bed Data prior to beginning your CORE Certification testing. This area only tests the CORE Phase I 270/271 Data Content rules. You may also continue to use this area after you have completed your CORE Certification to ensure your system retains its capabilities. Testing done in this area does not apply towards CORE Certification, nor are you required to pre-test your system through this area.
7. **CORE Certification Testing**  
The CORE Certification Testing area allows you to test your system using the CORE Test Bed Data for all the test scripts required to apply for your CORE Certification Seal. You must complete all of the tasks in the CORE Certification Testing area successfully prior to applying for your CORE Certification Seal. You may also continue to use this area after you have completed your CORE Certification to ensure your system retains its capabilities.
8. **Production Testing**  
The Production Testing area is an optional area that is accessible once you have successfully completed your CORE Certification Testing. This area will allow you to test your systems capability of conforming to the CORE Phase I 270/271 Data Content Rules using your own production data. The Production Testing area also contains additional test scripts for some of the CORE Phase I 270/271 Data Content Rules that are not required for CORE Certification. You may also continue to use this area after you have completed your CORE Certification to ensure your system retains its capabilities. Testing done in this area does not apply towards CORE Certification, nor are you required to test your system through this area.
9. We always want your input. Use the [Feedback](#) form to help us help you better.
10. The [Logout](#) option is available from the left side menu as well as at the top right hand corner of all screens for your convenience.

CORE Pre-Certification Testing

The CORE Pre-Certification Testing area allows you to pre-test your system using the CORE Master Test Bed Data prior to beginning your CORE Certification testing. You may also continue to use this area after you have completed your CORE Certification to ensure your system retains its capabilities.

Testing done through this area will not be applied to your CORE Certification testing. [Click here](#) to be taken to the CORE Certification Testing page.

The CORE Pre-Certification Testing area only validates CORE Phase I Rules for 270/271 Data Content. Please refer to CORE Certification Test Suite documentation for detailed requirements of each test script. The 270/271 Data Content test scripts in the CORE Pre-Certification Testing area rely on the use of the CORE Master Test Bed created by CORE. [Click here](#) to be taken to the CORE Master Test Bed page to download the CORE Certification Test Suite documentation and the CORE Master Test Bed data.

The 270/271 Data Content Test Scripts require you to download files to be processed by your system. You may download the files on an individual basis from within the test script, or you may download all 270/271 test files at one time [here](#).

## Welcome Test Account Clearinghouse!

### CORE Certification Testing

The CORE Certification Testing area allows you to test your system using the CORE Test Bed Data for all the test scripts required to apply for your CORE Certification Seal. You must complete all of the tasks in the CORE Certification Testing area successfully prior to applying for your CORE Certification Seal. You may also continue to use this area after you have completed your CORE Certification to ensure your system retains its capabilities.

Each of the CORE Certification Testing sections below corresponds to sections of the CORE Certification Test Suite. Please refer to CORE Certification Test Suite documentation for detailed requirements of each test script. The 270/271 Data Content as well as the Real Time and Batch Acknowledgement test scripts in the CORE Certification Testing area rely on the use of the CORE Master Test Bed created by CORE.

[Click here](#) to be taken to the CORE Master Test Bed page to download the CORE Certification Test Suite documentation and the CORE Master Test Bed data.

**You must set up your trading partner profiles before you can start performing some activities**

**A link will be created here after you have defined your trading partner profile that will allow you to download all of the required 270/271 test files.**

## Payer Connectivity Testing

Payers and clearinghouses can set up their remote host connection parameters [here](#).

Health Plan Subscriber ID Routing Prefix ... [More Info](#)

## Trading Partner Profile

The Claredi CORE Certification system allows you to define the trading partner information used to populate the test files with data that will work with .

In order to allow you to test your system with real-world trading partner information you can modify any of the information below to meet your system requirements. For example, if you are a Health Plan and require your Interchange Receiver ID to be your Federal Tax ID number, you would select the Interchange Receiver ID for ISA07 to "30" from the drop-down list and enter your Federal Tax ID number in the Interchange Receiver ID for ISA08. For additional information about Interchange Sender and Receiver IDs and the associated codes, see the X12N 004010X092 270/271 Implementation Guide Appendix B.

Values for ISA06 and ISA08 can be from 1 to 15 characters in length. Claredi will space fill any needed characters to ensure ISA06 and ISA08 meet the requirements.

You may also choose to leave any or all of the default values for your test files.

X12 Element	270 Real-Time	271 Real-Time	270 Batch	271 Batch
Interchange Sender ID Qualifier .. ISA05:	<div>ZZ</div>	<div>ZZ</div>	<div>ZZ</div>	<div>ZZ</div>
Interchange Sender ID .. ISA06:	<div>PROVIDER A</div>	<div>PLANA</div>	<div>PROVIDER A</div>	<div>PLANA</div>
Interchange Receiver ID Qualifier .. ISA07:	<div>ZZ</div>	<div>ZZ</div>	<div>ZZ</div>	<div>ZZ</div>

X12 Element	270 Real-Time	271 Real-Time	270 Batch	271 Batch
Interchange Sender ID Qualifier .. ISA05:	<input type="text" value="ZZ"/>	<input type="text" value="ZZ"/>	<input type="text" value="ZZ"/>	<input type="text" value="ZZ"/>
Interchange Sender ID .. ISA06:	<input type="text" value="PROVIDER A"/>	<input type="text" value="PLANA"/>	<input type="text" value="PROVIDER A"/>	<input type="text" value="PLANA"/>
Interchange Receiver ID Qualifier .. ISA07:	<input type="text" value="ZZ"/>	<input type="text" value="ZZ"/>	<input type="text" value="ZZ"/>	<input type="text" value="ZZ"/>
Interchange Receiver ID .. ISA08:	<input type="text" value="PLANA"/>	<input type="text" value="PROVIDER A"/>	<input type="text" value="PLANA"/>	<input type="text" value="PROVIDER A"/>
Application Sender Code .. GS02:	<input type="text" value="PROVIDER A"/>	<input type="text" value="PLANA"/>	<input type="text" value="PROVIDER A"/>	<input type="text" value="PLANA"/>
Application Receiver Code .. GS03:	<input type="text" value="PLANA"/>	<input type="text" value="PROVIDER A"/>	<input type="text" value="PLANA"/>	<input type="text" value="PROVIDER A"/>
Information Source .. 2100A->NM103:	<input type="text" value="PLANA"/>	<input type="text" value="PLANA"/>	<input type="text" value="PLANA"/>	<input type="text" value="PLANA"/>
Information Source Qualifier .. 2100A->NM108:	<input type="text" value="PI"/>	<input type="text" value="PI"/>	<input type="text" value="PI"/>	<input type="text" value="PI"/>
Information				

2100B- >NM105:				
Information Receiver Qualifier ..	SV	SV	SV	SV
2100B- >NM108:				
Information Receiver Identification Code ..	ABC123DEF	ABC123DEF	ABC123DEF	ABC123DEF
2100B- >NM109:				

## Delimiters

You may also define the delimiters used in creating your test files. It is recommended that you use the default values unless your system requires other additional information about delimiters see the X12N 004010X092 270/271 Implementation Guide Appendix A, section A.1.2.7.

Element Delimiter:	*
Sub Element Delimiter:	:
Segment Terminator:	~

CORE Certification Group: CORE Seal Documents

**Request for Claredi to forward all CORE Seal Application materials and test results to CORE**

Upon successful completion of the CORE Certification scripts, if you would like Claredi to forward all of your test results and any of the documents below to CORE, please upload a written request asking Claredi to forward your results to CORE. You may also send your results directly to CORE.

☐ Required Activity Pending

**CORE Seal Application Uploaded**

If you have indicated you wish Claredi to forward your test results to CORE, upload a signed CORE Seal Application. You may also send your application directly to CORE.

☐ Required Activity Pending

**Upload Attestation Form**

If you have indicated you wish Claredi to forward your test results to CORE, upload a signed HIPAA Attestation Form. You may also send your signed HIPAA Attestation Form directly to CORE.

☐ Required Activity Pending

**IT Exemption Form**

If you have indicated you wish Claredi to forward your test results to CORE, and if your organization needs to request an exemption for one or more of your systems, upload a signed IT Exemption Form. You may also send your signed IT Exemption Form directly to CORE.
