

New York State Health Information Technology Summit Initiative Overview and Update

Rachel Block, Project Director United Hospital Fund

- United Hospital Fund
 - Celebrating 125th Anniversary
 - Mission: Shape positive change in health care for New Yorkers
 - Policy development and analysis, grant making, convening and collaboration
 - Quality Strategies Initiative focal point for coordination on standardized measures and improvement models
 - Information technology is essential to advancing this agenda

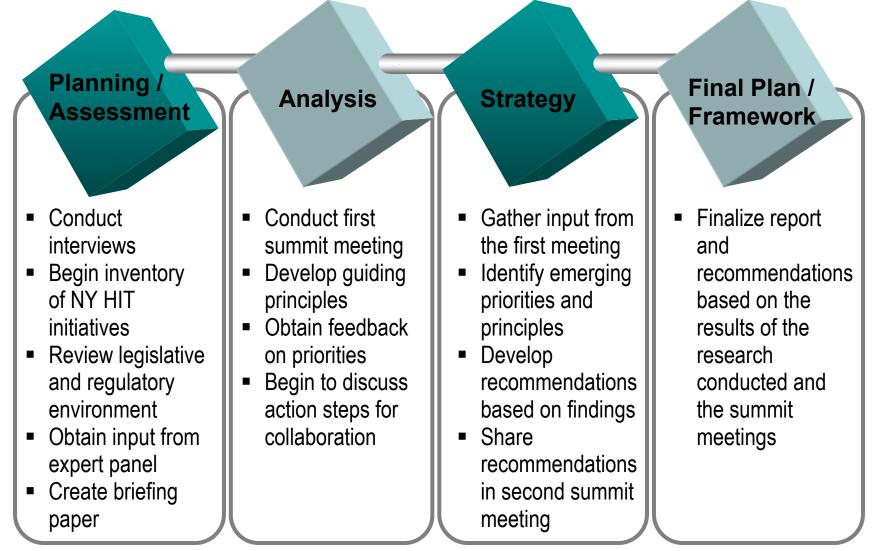

Background

- eHealth Initiative and Foundation sponsoring State HIT Summit Initiative
 - Help state and local leaders to formulate HIT policy agendas that take into account key national, state and local developments
 - Establish the "value proposition" for HIT adoption and use
 - Identify and resolve key barriers at state and local levels (e.g., legal issues, coordination of incentives)
 - Each Summit will include pre-meeting research, one or more summits as needed, and final report
 - Funding for NY Summits provided by the United Hospital Fund; Manatt, Phelps and Phillips LLP provided strategic and technical assistance

NYS HIT Policy Summit: Goals and Objectives

- To establish a forum for New York leaders to discuss and achieve points of agreement related to the usage of health information technology to address New York healthcare challenge
- To catalog the many health information technology-related initiatives currently existing or planned within the state
- To review, discuss and validate findings and feedback received from New York stakeholders regarding the opportunities and barriers related to the use of HIT to address healthcare issues
- To review and discuss priorities and principles for HIT deployment and investment in the state
- To explore ongoing methods of communication, collaboration and coordination to support the development and implementation of a shared vision and plan for addressing healthcare challenges through HIT in the state

New York HIT Policy Summit Approach

Participating Organizations

- Physician organizations
- Health plans
- Hospital CEOs and CIOs
- Employers
- Community health centers
- Consumer organizations
- Associations
- State and local health departments

Interview Findings - "What We Heard"

- Key Themes
 - Leadership
 - Building Trust and the Need for Collaboration
 - Financing
 - Standards

First Summit – Broad Areas of Agreement

- Ensure that there is ongoing communication and collaboration to establish shared vision, set priorities and provide ongoing leadership
- Establish a resource center to share practical tools and resources across New York and with other communities/states
- Secure funding and establish policy environment to support local innovation

Value Proposition for HIT

- CITL published report and article in Health Affairs
- Model developed by CITL staff and panel of national experts, national data sources and homegrown estimates
- Estimates costs and benefits from utilizing standardized electronic health care transactions in 6 categories
- United Hospital Fund made grant to CITL to conduct the same analysis using NYS data
- Net benefit for NYS = \$12.4 billion!

- Broad support for statewide multistakeholder HIT organization – different views on form and function
- Work toward consensus on a framework to guide priority-setting, taxonomy and basic functional requirements
- Develop incremental roadmap for interoperable data exchange at state and regional level

State Agenda Taking Shape

- HEAL- NY
- Hospital restructuring commission
- New 1115 waiver
- Disease management
- Pay for performance
- Electronic prescribing
- State government coordinating council

- UHF will provide state with report and recommendations on statewide HIT leadership group
- Develop NY web portal leveraging eHI Connecting Communities website
- Provide technical assistance on business and technical models, and information sharing policies
- Explore opportunities to expand and refine value modeling

- Helpful to have a catalyst to get started
- Sustained and coordinated leadership is needed – federal, state and regional
- Major deficits in basic infrastructure still need to be addressed
- Too much emphasis on IT, not enough on value
- Provider or payer centered strategies versus consumer or patient centered strategies
- Need to establish metrics and evaluation strategy soon
