Foreign Aid and Development using Information and Communication Technology for Health

## Other places we work...

Third HIT Summit Washington, DC September 25 - 27, 2006

Track 4.05 Developing HIT: The Role of Philanthropy, NGOS and International Aid Agencies in Promoting Better Health in the Developing World

## **USAID HIT Activities**

- Handling surveillance and epidemiological information
- Disseminating public health information
- Facilitating the management of health services
- Accessing and evaluating knowledge and medical literature
- Expanding access to diagnostic and prognostic information in the treatment of patients

## **USAID** -eHealth

# Field use of Information Technology

Over the past 2 years, has the USAID program in your country supported any of the following functions using electronic "information technologies" of any kind?	YES
-disease surveillance	62%
-tabulation/transmission of service statistics	58%
-budgeting or financial reporting	58%
-logistical data – inventory, shipments	53%
-personnel management	15%
-ordering commodities	53%
-patient referrals	26%
-remote medical consultations	1%
-patient medical records	34%
-distance education/training of staff	43%

Over the past two years, has the USAID Health program in your country made use of any of the following technologies?	YES
-Rural telephones or cell phones	55%
-Two way radios	42%
-Desktop Computers	91%
-Laptop computers	75%
-Personal Digital Assistants (eg. Palm Pilots)	19%
-Wireless transmission – WiFi	11%
-Internet	87%
-GIS	53%

#### Places we work...

## **USAID** e-Health in Bolivia

Reproductive Health Project is supporting the development of

- technology-assisted learning centers linked to a trainer network.
- cost recovery mechanisms and work toward sustainability.
- Central Learning and Performance Support Office works
   closely with regional office staff and host institutions, using
   technology tools such as a needs assessment questionnaire, to set up processes that
   both fulfill immediate needs and provide for long-term sustainability. (JHPIEGO in
   partnership with USAID)

#### Places we work...

## **USAID** e-Health in Albania

- Participatory approach in reforming and strengthening the primary health care delivery system.
- Bottom-up approach, pilot effort to produce evidence for informed decision-making at the local and central level.
- Health Information System (HIS). Every patient encounter is entered on a form, read directly by a scanner, and transformed into data. This tracks patient demand and facility utilization, diagnosis, prescription, and referrals, etc.
- Regularly discussed results...strengthening accountability and transparency of the local health system.

## **USAID** e-Health

## Other examples of partnerships...

- DOT-COM Alliance partnerships in Health
   Nepal
   Myanmar
- United States Telecommunications
   Training Institute (USTTI)
- Johns Hopkins INFO Project

## **USAID** -eHealth

## On the Horizon...

- More leveraging of existing technology
- Promotion of enabling technology and capable partners
  - WiMax
  - VSAT
  - Point-to-Point broadband cellular
  - WiFi
  - Other Cellular (SMS)
- Improvements to health care access
  - open knowledge sharing
  - personal health care knowledge and practice

## ...Thank you.
