

Medicare's Next Voyage: Encouraging Physicians to Adopt Health Information Technology

July 19, 2006

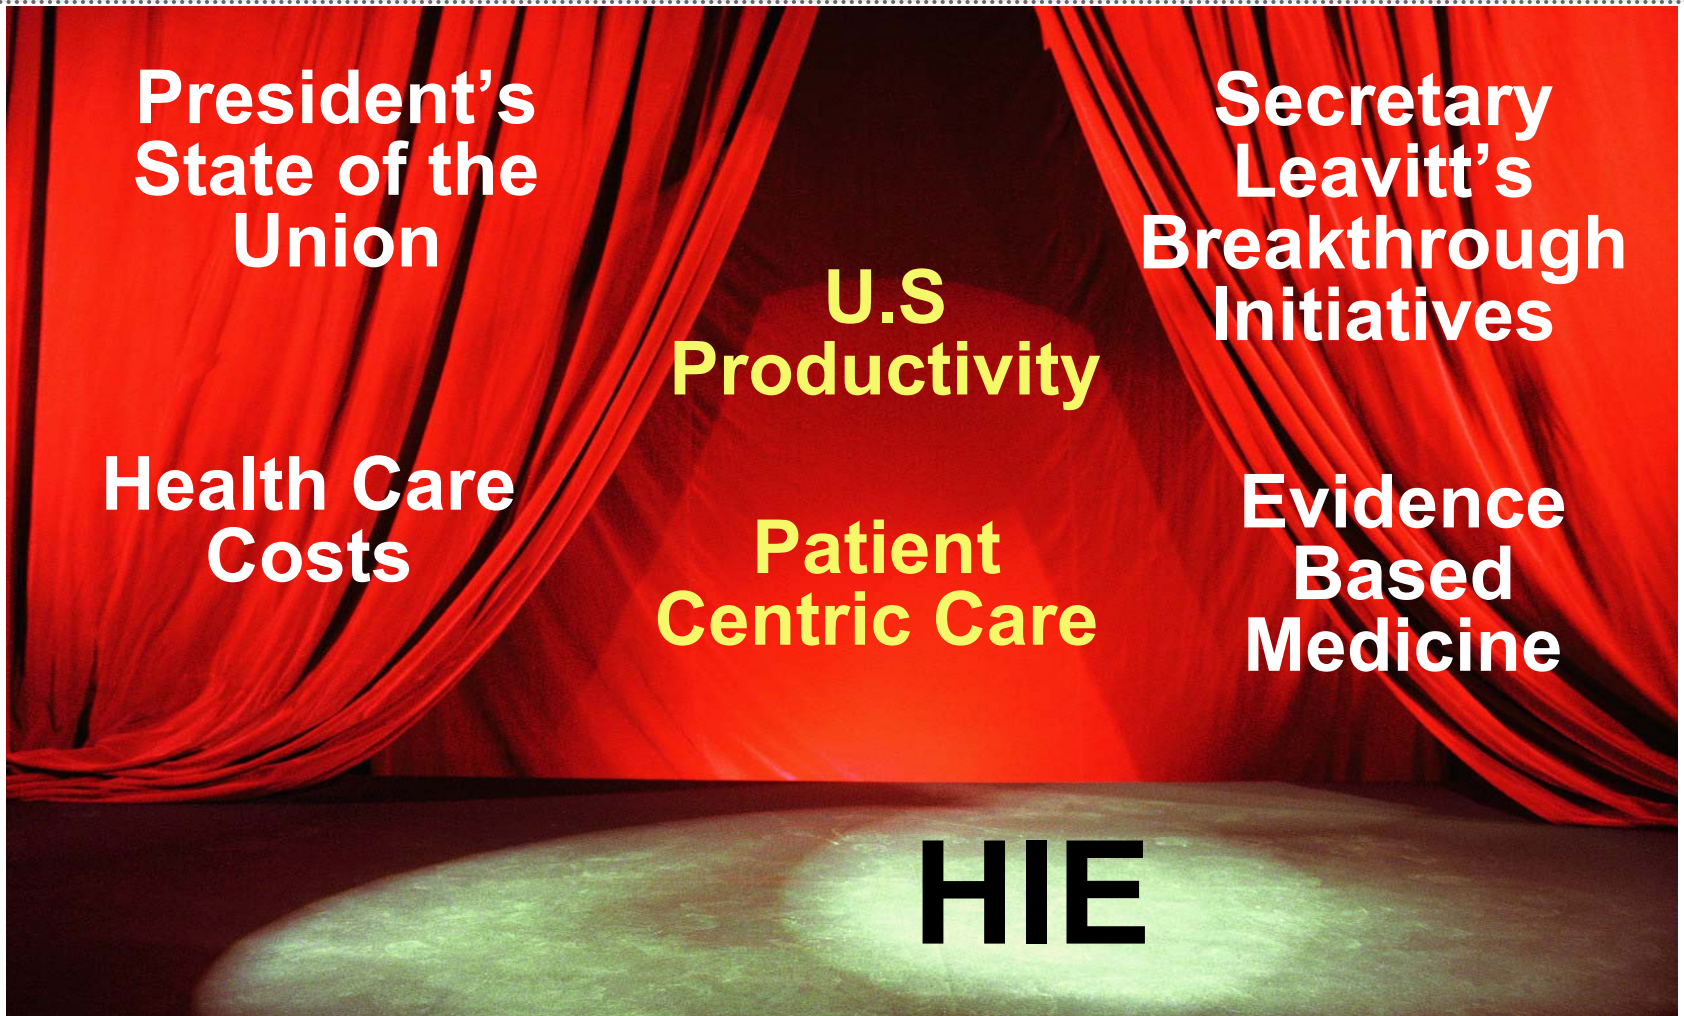

Shannah Koss
Vice President, Health Information Technology
Avalere Health LLC

Agenda

- Health Information Exchange (HIE) Overview
- Recommendations in “Medicare’s Next Voyage: Getting Physicians to Adopt HIT”
- Medicare’s increasing role in promoting physician HIT adoption
- Will the current initiatives be enough?

■ ■ ■
Automated Health Information Exchange (HIE) has Come Center Stage

Many Benefits are Anticipated, but Barriers Still Exist

- Benefits
 - » Quality improvement
 - » Increased efficiencies
 - » Enhanced access
 - » Increased patient support

- Barriers
 - » Interoperability standards
 - » Misaligned incentives
 - » Sustainable business model
 - » HIT adoption rates particularly for physicians

Growing Attention on HIE Value has Led to Increased Focus on Medicare

Administration

Office of the National Coordinator (ONC) and the American Health Information Community (the Community)

President's declaration on nationwide EHR adoption

CMS and AHRQ activities

Congress

MMA: e-Rx provisions
CCIP/MHS, many HIT demonstrations

Recent legislation (e.g.,
Frist/Clinton S. 1418 and
Johnson H.R. 4157)

Growing interest and
consensus on HIE/HIT
benefits

Private Sector

Formation of RHIOs,
plans and large
employers promoting
EHRs and PHRs

Financial incentive
programs

Increased investment

“Medicare’s Next Voyage: Getting Physicians to Adopt HIT”

The intersection of business
strategy and public policy

Medicare has the Power to Promote Physician Adoption

Largest Single Purchaser of Health Care Services

- Over 41 million beneficiaries
- More than \$290 billion in expenditures
- 700,000 participating physicians

Leader in Shaping US Health Care Policy But....

- Lags behind private sector: disease management, health information technology/exchange (HIT/HIE)
- Not using power of entitlement program

■ ■ ■ CMS Leadership is Essential to Identify Priorities and Payment Strategies

Clarity Around Medicare-specific HIT Goals for Physicians is Key Step

- Expectations for physicians around necessary technological capabilities
- Impact HIT and HIE should have on health outcomes and health care system
- Time frame for action
- Incentives
- Physician qualification requirements

Various Initiatives Could Drive New Medicare HIT Incentives But All Require CMS to Consider Key Questions

Examples of Initiatives

Issue/Implications

Adopt Implementation Plan

- What is the time frame for physicians to present a plan and begin implementation?
- What level of detail will be required in the plan?

Adopt Certain Type of HIT

- What criteria will be used to certify HIT?
- Who will run process?

Meet Designated Quality Improvement Outcomes

- What information will physicians be expected to report and/or fully automate?
- How will quality outcomes be identified/prioritized?

Adopt Technology along Requisite Schedule with Reporting, Quality, and HIT Requirements

- Will requirements vary depending on physician demographics?
- What types of technical and other implementation support will physicians require?

CMS Development of HIT Blueprint is an Essential Building Block for Physicians

Blueprint Options

- Adopt Implementation Plan
- Adopt Certain Type of HIT
- Meet Designated Quality Improvement Outcomes
- Adopt Technology along Requisite Schedule with Reporting, Quality, and HIT Requirements

HIT Financial Incentive Approaches

- **New Conditions of Participation**
 - » High upfront costs and misaligned incentives may require long time horizon for physician acceptance
- **Differentiated Payment**
 - » Financial support rewards physicians but budgetary issues may limit support reality
- **Cost Sharing Approach**
 - » Budget-neutral program could ensure equal return on government investment in 10 years

Medicare is Essential to Driving Broad Scale Physician Use of HIT and HIE

- Continue to grow and build on existing initiatives, pilots, activities
- Flex muscles and use purchasing power to create massive shift
- Develop blueprint for physicians with clear goals and direction
- Consider array of questions and issues and debate publicly
- Be wary of other implementation challenges (e.g., work flow)
- Work with other stakeholders (e.g., Congress, private sector) to put forth sustainable, politically acceptable financial options

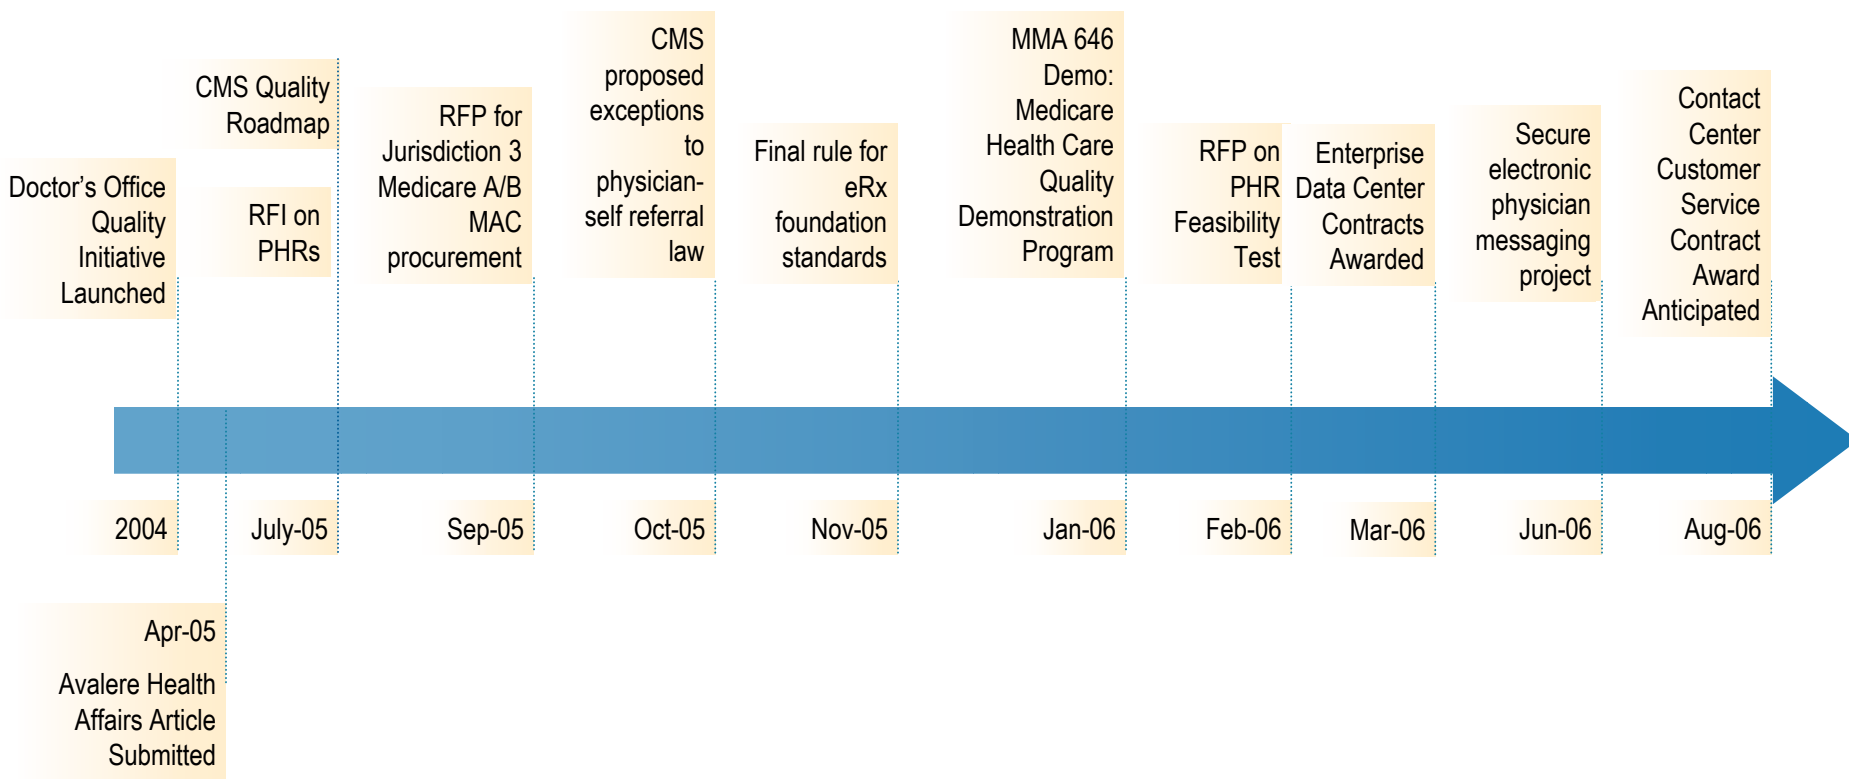

Medicare's Increasing Role in Fostering HIT Adoption

The intersection of business
strategy and public policy

CMS' Efforts Towards Advancing HIT Adoption has Rapidly Progressed

CMS' Quality Improvement Roadmap Establishes the Framework for CMS Involvement

- Reflects agency's commitment to improving health care quality for Medicare and Medicaid beneficiaries
 - Goal: right care for every person every time that is safe, effective, efficient, patient-centered, timely, and equitable
 - Advances a vision for:
 - » Creating and Using Better Evidence
 - » Measuring Quality
 - » Paying for Quality
 - » Fostering HIT
 - Strategy: Assist practitioners in making care more effective and less costly, especially by promoting the adoption of HIT
-

■ ■ ■ CMS is Sponsoring a Number of Demonstrations with HIT Components

- Medicare Health Support (formerly Chronic Care Improvement Program)
 - » Chronic care disease management program for fee-for-service Medicare
 - » Integrates HIT into care delivery

 - MMA Section 646 Medicare Health Care Quality Demonstration
 - » Examines factors that encourage the delivery of improved patient care quality (e.g. reimbursement redesign via financial incentives)

 - MMA Section 649 Medicare Management Performance Demonstration
 - » Modeled after *Bridges to Excellence*, 3-year P4P demo pays physicians to adopt and use HIT and evidence-based outcome measures to promote continuity of care for chronically ill Medicare beneficiaries

 - Doctor's Office Quality –Information Technology Project (DOQ-IT)
 - » Promotes EHR and HIT adoption in small-to-medium sized physician offices
-

QIOs can Promote HIE Advancement through work with Evolving HIE Initiatives

- The 8th Statement of Work (SOW), which began in 2005, includes:
 - » Hospitals, nursing homes, home health, physician offices
 - » Surgical care, medication use
 - » Breast cancer, diabetes, and influenza
 - » Health Care disparities
- QIOs provide free, expert assistance on HIT adoption as part of their contracts with Medicare
- Some common roles for QIOs in HIE include:
 - » Educate providers and accelerate provider HIT adoption
 - » Serve as community resource for physician workflow and process change/improvement
 - » Convene stakeholders
- Many QIOs in initial discussions with HIE stakeholders to formalize their role

CMS Philosophy – No Direct Funding

Secretary Mark McClellan, HIMSS Summit: June 2006

*CMS will not reimburse solely for HIT adoption or HIT use.
Rather CMS may reimburse providers for improved quality and outcomes or for the use of e-health services (e.g., secure patient/MD messaging).**

*This is paraphrased from Dr. McClellan's HIMSS remarks and is not a direct quote.

CMS' Actions Can Shape the Market

- CMS wears multiple hats:
 - » Payer
 - » Regulator
 - » Grantor
 - » Contractor
 - » Policy thought leader

■■■ Is the Scope and Direction of Current Activity Enough?

- Will reimbursement need to change?
- Would reimbursement for e-health services be an adequate incentive?
- Is direct funding of HIT purchases necessary?
- Can CMS act alone or does Congress need to get in the game?
