# COMMUNITY HEALTH PLAN

Created in 1992 by a group of community health centers throughout the state. Our non-profit health plan is driven by a strong business and social mission to develop and administer products to serve individuals and families not served by the broader market.

# State-Sponsored Programs

- **Medicaid (Healthy Options)**
- **Basic Health (BH)**
- **State Children's Health Insurance Plan (SCHIP)**
- **Public Employees Benefits Board (PEBB)**
- **General Assistance Unemployable (GA-U) pilot**

# Medicare Programs

- Medicare Advantage
- MA - Prescription Drug (MA-PD)
- MA – Special Needs Plan (SNP) Urban
- MA – Special Needs Plan (SNP) Rural

# Provider Network

- **34 of 39 counties in Washington State**
- **Over 330 primary care clinic sites**
- **1,600 primary care providers**
- **More than 8,000 specialists**
- **Over 90 hospitals**

# Community Health Plan CHC Clinic Sites

*Community Health Network*

# What is P4P?

**“Pay for performance is not simply a mechanism to reward those who perform well or to reduce costs; rather, its purpose is to align payment incentives to encourage ongoing improvement in a way that will ensure high quality care for all.”**

**Committee on Redesigning Health Insurance Performance Measures 2006 (IOM)**

# P4P Industry Trends

- **Many programs have emerged over past 5 years**
- **Feds, State, plans, provider groups, and employer coalitions have implemented and continue to refine their programs**
- **Early problems included too many measures, lack of efficient reporting, difficulty in selecting measures all parties value/trust**
- **Difficult to draw conclusions – still not a proven model based on existing data**

# Future Directions

- **P4P is here for the foreseeable future - will continue to evolve and improve over time**
- **Feds and State are moving forward and adopting programs (CMS for Medicare)**
- **Rewards from existing \$; also considering penalties such as enrollment impacts (freezing or reducing assignment)**
- **Data collection is evolving from claims based data to more clinical data and self reported performance data**

# P4P at Community Health Plan

## Performance Evaluation Tool (PET)

- **PET Program 2000 – 2006**
  - **Withhold (\$1pmpm) over past 6 years with some changes in measures**
  - **Tied to clinical outcomes and service quality**
  - **Some years incentive tied to capability building (HEDIS training; chart reviews)**
  - **Targets related to absolute performance thresholds as well as improvement %**
  - **Varying methods of data collection and reporting**

# Evolution of the Program

<u>Year</u>	<u>Measures/Targets</u>	<u>Data Sources</u>	<u>Results</u>
<b>2000</b> (.50ppm)	<ul style="list-style-type: none"> <li>• 22 measures across 3 areas: Quality of Care and Service; Access to Services; Care Management</li> <li>• Points earned for performance thresholds – excellent and standard, as well as improvement</li> <li>• Total pts vs. Possible pts</li> <li>• Long term (3 yr) targets set</li> </ul>	Encounter data/claims data Self reported data NWRG data HEDIS like data	No \$s tied to this year...was a one year “heads up” to program (.50ppm tied to participation in Access Collaborative 19/19 CHCs earned \$.50ppm
<b>2001</b> (\$1ppm)	<ul style="list-style-type: none"> <li>• Same 22 measures and scoring methodology - some refined methodology based on lessons learned prior year</li> </ul>	Encounter data/claims data Self reported data NWRG data HEDIS like data	First year it really counted! 19/19 CHCs earned 85% of (\$1ppm) or above.

# Evolution of the Program

<u>Year</u>	<u>Measures/Targets</u>	<u>Data Sources</u>	<u>Results</u>
<b>2002</b> (\$1ppm)	<ul style="list-style-type: none"> <li>• 22 measures (7 service quality; 15 clinical quality)</li> <li>• Performance thresholds and improvement</li> </ul> <p>Total pts vs. Possible pts</p>	NWRG survey HEDIS specifications	<p>.50ppm tied to pts earned for service quality measures            19/19 of CHCs earned 50% or higher of .50ppm (\$.25)</p> <p>.50ppm tied to clinical measures but scoring problems thus 100% of CHCs earned the other .50ppm for attending a CHP sponsored HEDIS training</p>
<b>2003</b> (\$1ppm)	<ul style="list-style-type: none"> <li>• 21 measures (7 service quality, 14 clinical quality)</li> <li>• Performance thresholds and improvement</li> <li>• Total pts vs. Possible pts</li> </ul>	NWRG survey HEDIS specifications	<p>.50ppm tied to pts earned for service quality measures            16/19 CHCs earned 50% or higher of .50 ppm (\$.25)</p> <p>Other .50ppm tied to “participation in chart abstraction exercise” – all earned</p>

# Evolution of the Program

<u>Year</u>	<u>Measures/Targets</u>	<u>Data Sources</u>	<u>Results</u>
<b>2004</b> (\$1ppm)	<ul style="list-style-type: none"> <li>• 12 measures total (encounter data, service quality and clinical quality)</li> <li>• Reduced to one performance threshold “target”, and improvement</li> <li>*service quality targets moved to focus on only “very” satisfied instead of “somewhat and very”</li> </ul> <p>Changed scoring methodology to where each measure worth .05 or .10</p> <p>Added “best practice” bonus payment for each – now possible to earn more than \$1.00ppm</p>	NWRG survey HEDIS hybrid methodology Claims data	<p>10/19 CHCs earned \$.50ppm or above</p> <p>9/19 CHCs earned less than \$.50ppm</p> <p>1 CHC earned \$1.00ppm</p>

# Evolution of the Program

<u>Year</u>	<u>Measures/Targets</u>	<u>Data Sources</u>	<u>Results</u>
<b>2005</b> (\$1ppm)	<ul style="list-style-type: none"> <li>• Reduced to 6 measures (quality of service, clinical quality and encounter data timeliness)</li> <li>• one performance threshold “target”, or improvement, or “best practice”</li> <li>• Each measure worth \$.20ppm +</li> <li>• Possible to earn more than \$1.20ppm</li> <li>• lowered some service targets</li> </ul>	NWRG survey HEDIS hybrid methodology with over sampling to lower margin of error Claims data	Two clinical measures were thrown out due to methodology error so each CHC got a minimum of \$.40ppm  7/18 CHCs earned \$1ppm or more 7/18 CHCs earned \$.50 - \$.95 4/18 CHCs earned .40 (due to methodology error)
<b>2006</b> (\$1ppm)	<ul style="list-style-type: none"> <li>• Same as 2005</li> </ul>	Same as 2005 – fixed methodology error	TBA August, 2007

# Evolution of the Program

## Six Measures used in 2005 - 2006

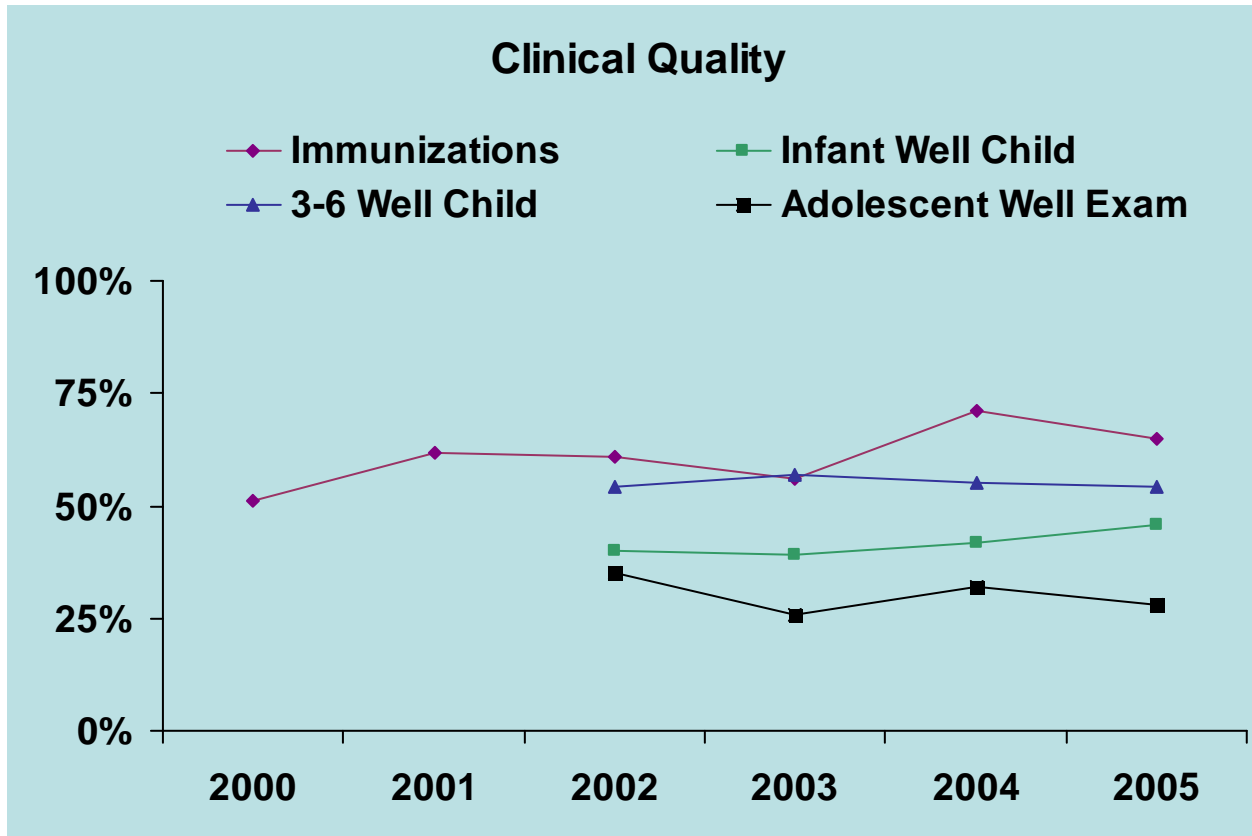

- Routine care access
- Urgent care access
- Well-child visits
- Childhood immunizations
- Courtesy and respect from office staff
- Encounter data timeliness

# Evolution of the Program

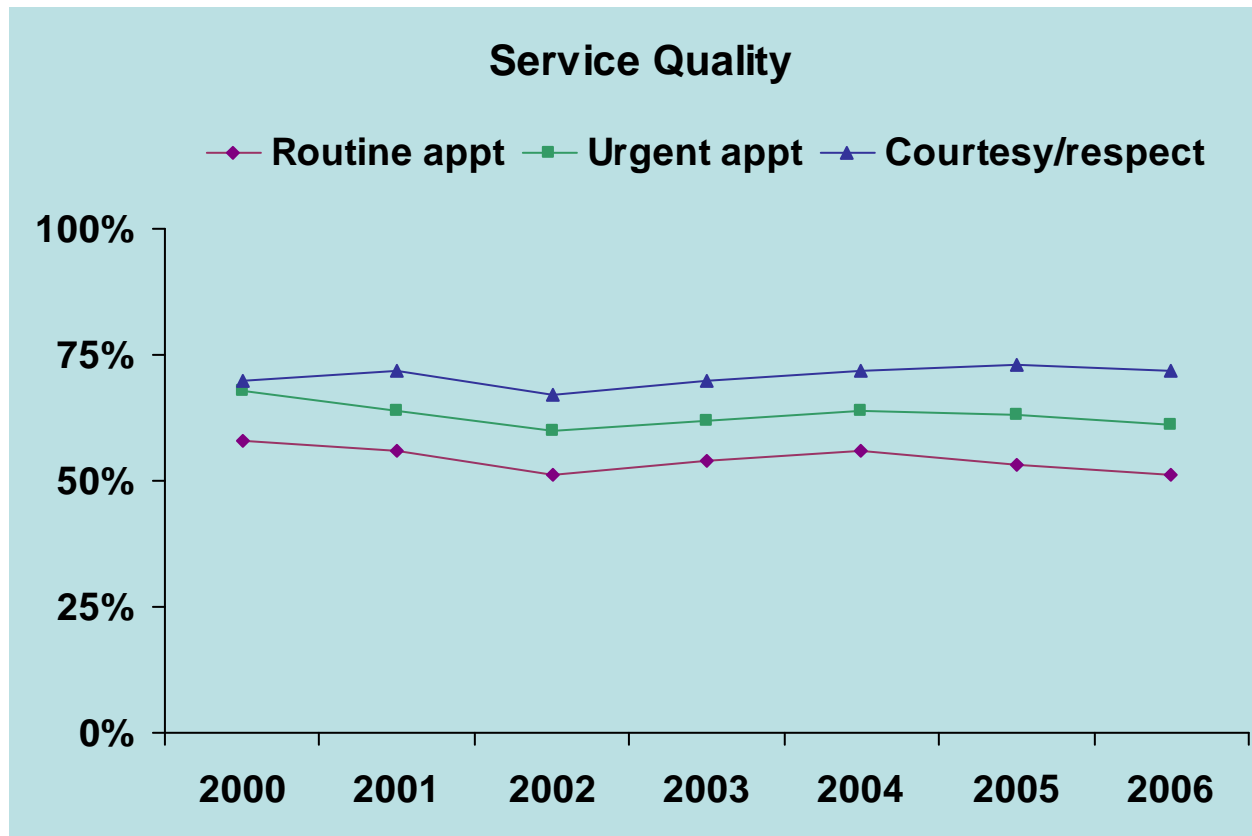

- **Adjusted along the way based on lessons learned and best practices**
- **Went from 22 to 6 measures**
- **Data sources remained constant , methodology changed**
- **Steady rate of \$1.00pmpm funding but added ability to earn more that \$1.00pmpm (bonus structure)**
- **Variable results**
- **Less \$ earned by CHCs over time**
- **No measurable improvement in performance**

# PET Program Results

# PET Program Results

# Lessons Learned

- **Concerns with funding mechanism and amount**
- **# and types of measures – fewer is better**
- **Data integrity issues**
- **Trust issues due to data collection and reporting errors**
- **Inconsistent and insufficient investment in other key strategies – support for QI (technical assistance, training, collaboratives...)**

# From Evolution to Revolution

- **Include providers in design and selection of measures**
- **Use nationally recognized easy to understand measures**
- **Data sources – valid, tested, easily accessible**
- **Reward high performance and improvement**
- **Incentives should be at the provider group level (reward team/system)**
- **Administratively flexible**
- **Ensure other system support mechanisms in place**

# Next Chapter

- **Continue to fund and support grant program**
- **Study and learn from others (other ACAP plans, use of patient incentives...)**
- **Focus on system-level supports**
- **Begin integration with 5 year initiatives...**
  - **Become a 3-star Plan (optimize access and service quality)**
  - **Care Model Re-design**
  - **Create useful, actionable data**

**Thank you!**
