

Future of Managed Care and Population Health

The Seventeenth Population Health Colloquium

March 27, 2017

Richard A Bankowitz, MD MBA FACP

Executive Vice President, Clinical Affairs and Center for Policy & Research

Who We Are

America's Health Insurance Plans (AHIP) is the national association whose members provide coverage and health-related services that improve and protect the health and financial security of consumers, families, businesses, communities and the nation.

Our Mission

America's Health Insurance Plans and its members create and accelerate positive change and innovation across the health care system for consumers through market-based solutions and public-private partnerships that advance affordability, value, access and well-being.

The Future of Managed Care and Population Health

Partnering with Providers

Through close collaboration with providers, hospitals, doctors, etc...we can effectively impact population health, personalize care, move from volume to value and improve health outcomes.

- Accountable Care Organizations
- Patient-Centered Medical Homes
- Preventative Services

Addressing Social Determinants

To effectively address chronic disease, we must address the societal factors that impact the health and well-being of individuals, families and communities.

Your zip code is a greater determinant of your health than your genetic code.

Pursuing Clinical Innovation

Health plans are pursuing the promise of clinical innovation, alongside our provider partners across the system.

We are bringing resources together to work more efficiently and effectively for a simpler, more satisfying experience and better outcomes.

Harnessing Data & Health IT

Health Plans have a 360 degree view of how health care functions and how to improve it.

We are harnessing data and technology for better quality and efficiency:

- Data analytics and predictive analysis
- Analyzing health trends
- Telemedicine
- Leveraging devices, apps and even virtual reality

Four Trends in the Future of Managed Care

Partnering with Providers

PCMH
ACOs CCOs
Shared Risk

Social Determinants of Health

Alignment with Communities
Focus on Prevention
Camden Coalition – like intervention

Continued Innovation

Improved Care Delivery
Greater Access
Consumer Engagement

Better Data and Analytics

Targeted Interventions
Better Predictions
Biometric / Genomic Data

Our Vision & the Goals of Population Health

We will shape and drive market-based solutions and public policy strategies to improve health, affordability and financial security by:

Promoting consumer choice and market competition

Simplifying the health care experience for individuals and families

Supporting constructive partnerships with all levels of government

Partnering with health care providers on the journey from volume to value

Addressing the burden of chronic disease and social factors that impact health

Pursuing the promise of clinical innovations while ensuring value

Harnessing data and technology to drive quality, efficiency and consumer satisfaction

Discussion Q & A
