

A photograph of a female doctor in a white lab coat with a teal stethoscope, looking down at a smartphone. A male patient is visible on the right side of the frame, looking towards the doctor. The background is a bright, out-of-focus window.

Developing Standards with Population Health Program Accreditation

Margaret E. O'Kane, President, NCQA
Nineteenth Population Health Colloquium
March 18, 2019

Thoughts on Population Health Management's evolution

Metamorphosis

In the beginning...

No population health
management

Focus is on visits,
hospital admissions,
other patient encounters

Increasing costs,
unclear or poor results

Metamorphosis

And then...

Employers know Six Sigma,
turn attention to health care

Employers want systematic
care through accountable
plans (HMOs)

Efforts to include providers n
pop. health leave inefficient
processes intact

Metamorphosis

And then...

Employers champion NCQA
as accountability vehicle

Pop. health management
takes hold among
health plans

PCMH emerges as a
pop. health model

Metamorphosis

And then...

Increasing emphasis on pt.
relationship, not encounters

Accountability is central to
public payers' strategy

CMS' #1 accountability
vehicle: Medicare Advantage

Metamorphosis

Today and beyond...

Population health not yet mastered or well organized

Digital is focus as care mgt. shifts to patient (wearables)

Market in flux, at different development stages

NCQA's job: Ensure managed care is *better* care

Accreditation exists to aid all stages of development

Because needs and capabilities vary and change

Reengineer what's underneath

Adding **pop. health**
management **on top** of
chaotic processes
doesn't work

Medical homes: Population health in action

Conventional View

30 pts. per day
14 have chronic conditions
Unknown health risks
Visits too short for coaching

Population View

2,500 patient population
900 have chronic conditions
1,100-1,250 have mod-high health risk
Care teams leveraged by HIT

Volume-Based/Episodic

Value-Based/Continuous

Help Us Reach the Far Goal

Pop. health
programs
that use
measures

Population Health

The **lens** we
see through

The **water** we
swim in

*Americans were in the
dark about quality.*

**HEDIS TURNED THE LIGHTS ON
USING A POP. HEALTH APPROACH**

Pop. Health:

The way to
optimize
health
and deliver
coherent
care

Now, about NCQA's Population Health programs...

Two new Population Health Management Products

Population Health Program Accreditation	Population Health Management Prevalidation
For organization directly providing population health programs to individuals (i.e. interventions)	For software that helps with population health management
Programs can be based on specific population, conditions, or demographics	A “ pre-check ” of software’s capabilities before a health plan (or other organization) uses it
Focuses on whole-person health: person first, the condition second	Eligible tools include: data aggregators, case management systems, risk stratification tools

PHM Prevalidation for Health IT Vendors

Reviewable elements

**PHM 2A: Data
Integration**

**PHM 2B: Population
Assessment**

**PHM 2D:
Segmentation**

**PHM 5B: Case
Management
Systems**

Eligibility for PHM Prevalidation

Various health IT solutions qualify

*Population
assessment
tools*

*Data
aggregators*

*Risk
stratification
tools*

*Population health
management
tools*

Population Health Program Accreditation

- Accrediting chronic-condition or population focused programs (similar to Disease Management Accreditation)
- Follows PHM model
- Population health programs may contribute to a health plan's overall PHM strategy

Surveys start: July 1, 2019

What's behind the Population Health Program Accreditation

*A model of care that strives to address patients' health needs at **all points along the continuum of care**, including the community setting, by increasing patient participation and engagement and targeting interventions.*

Key features of PHP Accreditation

Accreditation at the organization level

Closely related to the HPA's PHM category of standards

Some standards reviewed by program level; others for the organization as a whole

One file review element, conducted on-site

Offers automatic credit for the PHM standards for HP, MBHO, ACO, CM

Among our early adopters:

Among our early adopters:
Orgs that interact with patients through apps

PHM Accreditation standards

PHP 1: Program Description

PHP 2: Data Integration

PHP 3: Population Assessment

PHP 4: Population Segmentation

PHP 5: Targeted Interventions

PHP 6: Practitioner Support

PHP 7: Measurement and Quality Improvement

PHP 8: Individual Rights and Responsibilities
