The Problem : How to Connect / Engage the Patient?

1. For ALL Patients
2. Health-Grade Security
3. Reimbursable

Multi-layered Services

- 1. Panic Button**
- 2. Remote Patient Monitoring**
- 3. Calendar & Compliance**
- 4. 3rd Party Report Card**
- 5. Direct Communication**

Solution Deployment : PCMH Enabler

Solution Overview : Key features

- Remote monitoring of metabolic state
- Designed to run on multiple platforms
- WYSIWYG protocol editor
- Objective and subjective measurements
- Multilingual asymmetrical (patient vs. clinician)
- User interface based on skins
- Real time monitoring console
- Fully integrated with EMR

Clinical Study : Highlights

- Proactively engaging patients in their daily diabetes monitoring and care...
- ...using a very familiar interactive device they already know how to operate: their TV remote control!
- 75-100 diabetic patients receiving primary care in Philadelphia
- Assessed through clinical, behavioral, and psychosocial outcomes
- About 24 million Americans have diabetes, and one-quarter of them do not know they have it.
