# The Power of Connected Systems – Technology Supported Patient Engagement

Karen Thomas

March 2014

## The changing times

- New and emerging payment models
- Focus on outcomes and costs savings
- Focus on population health
  
- Do more with less, and do it better

## Population Health

- Patient care beyond the walls of hospitals, doctors offices, and other care venues
- Identifying patients at risk for readmissions, expensive healthcare interventions
- Managing care for patients at risk
- Measuring our successes and challenges with patients
  - Outcomes
  - Utilization
  - Financial performance

## Supporting technologies

- Exchange of data
- A way to save and mine the data
- Ways to identify patients at risk
- Tools for the care manager
- Integration with EMRs
- Tools for patients to engage with providers
- Analytical tools

## It may not be easy

- Many payment models emerging
- Data exchange is still challenging
- Lack of standards
- Multiple Electronic Medical Records
- Claims data –sources
- Patient identification methods
