

# Utilizing Predictive Models to Target for Clinical and Diagnosis Gaps

Stephanie Kreml, MD  
Chief Medical Officer  
Accordion Health

Predictive Modeling Summit  
September 15, 2016

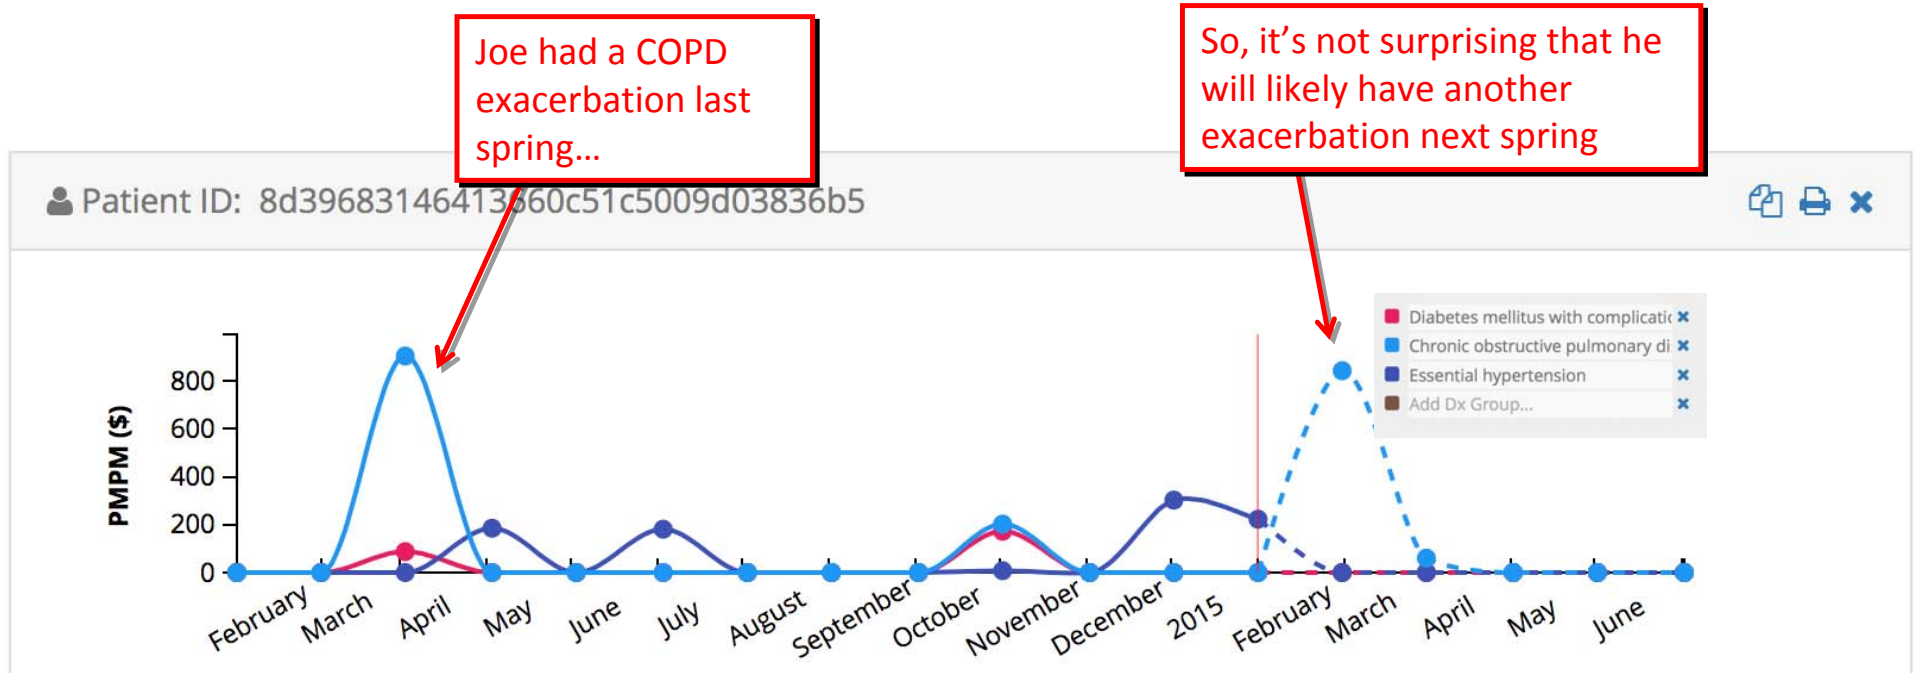

# Clinical Vignettes

# Joe S.

- 69 y/o man with COPD & h/o acute exacerbations
  - Tend to occur annually with seasonal triggers
- Also has DM, HTN which are relatively well-controlled
- Doesn't always get annual influenza vaccine & sometimes forgets to fill his meds

# Joe S.

Most case managers already know about patients like Joe...

What about the nonobvious cases?

# Linda R.

- 76 y/o woman with h/o of well-controlled HTN
- Family h/o CVD
- Recently seen for palpitations, but otherwise asymptomatic

# Linda R.

Although Linda's palpitations are asymptomatic

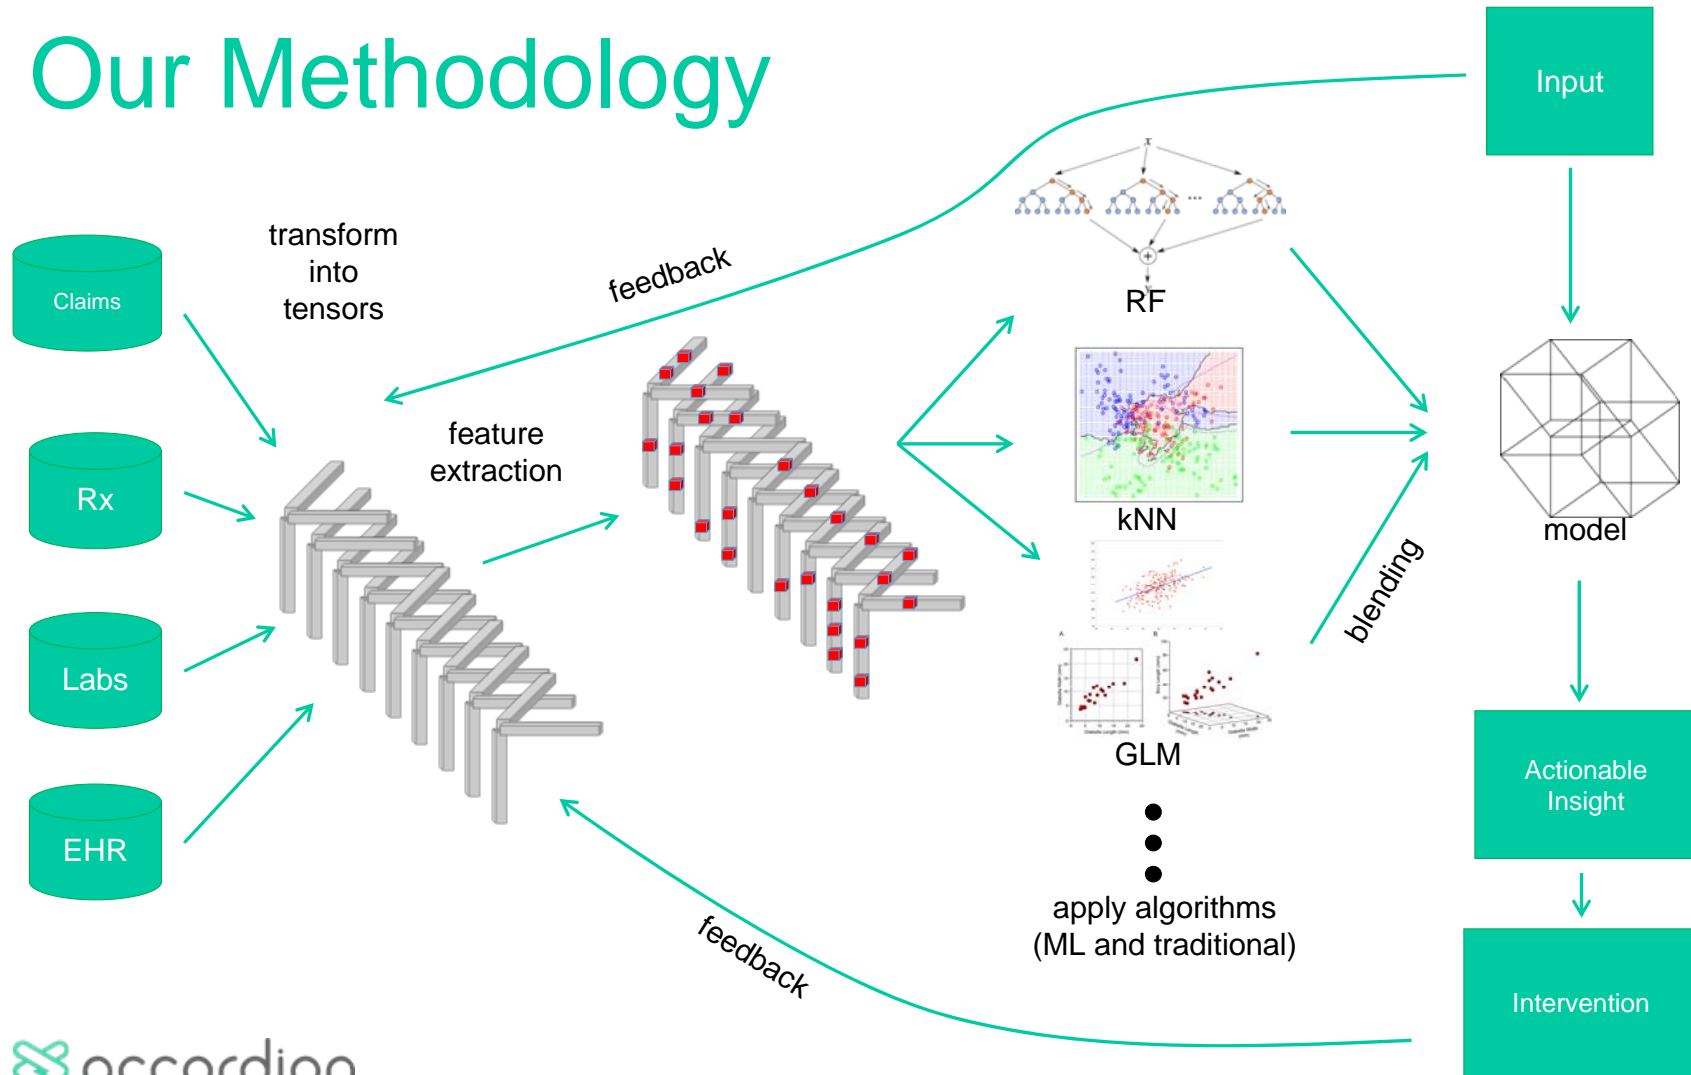

Our model predicts that her palpitations may be indicative of a more severe cardiac dysrhythmia, like atrial fibrillation

And the likelihood of a stroke is high

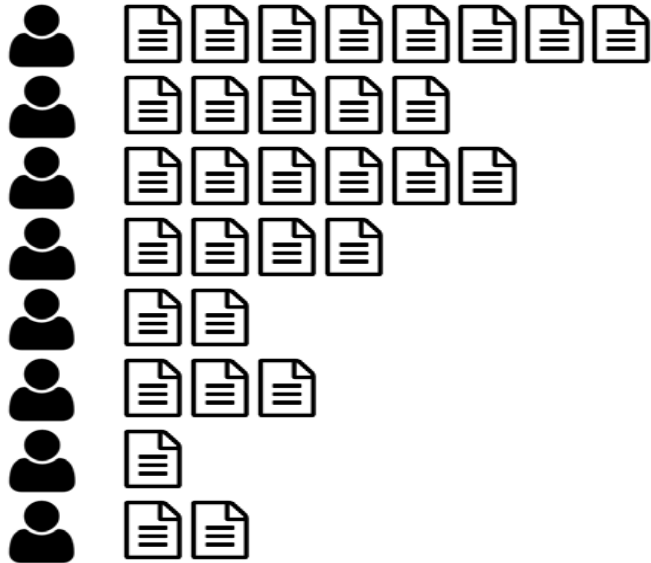

# How to apply Machine Learning

# Our Methodology

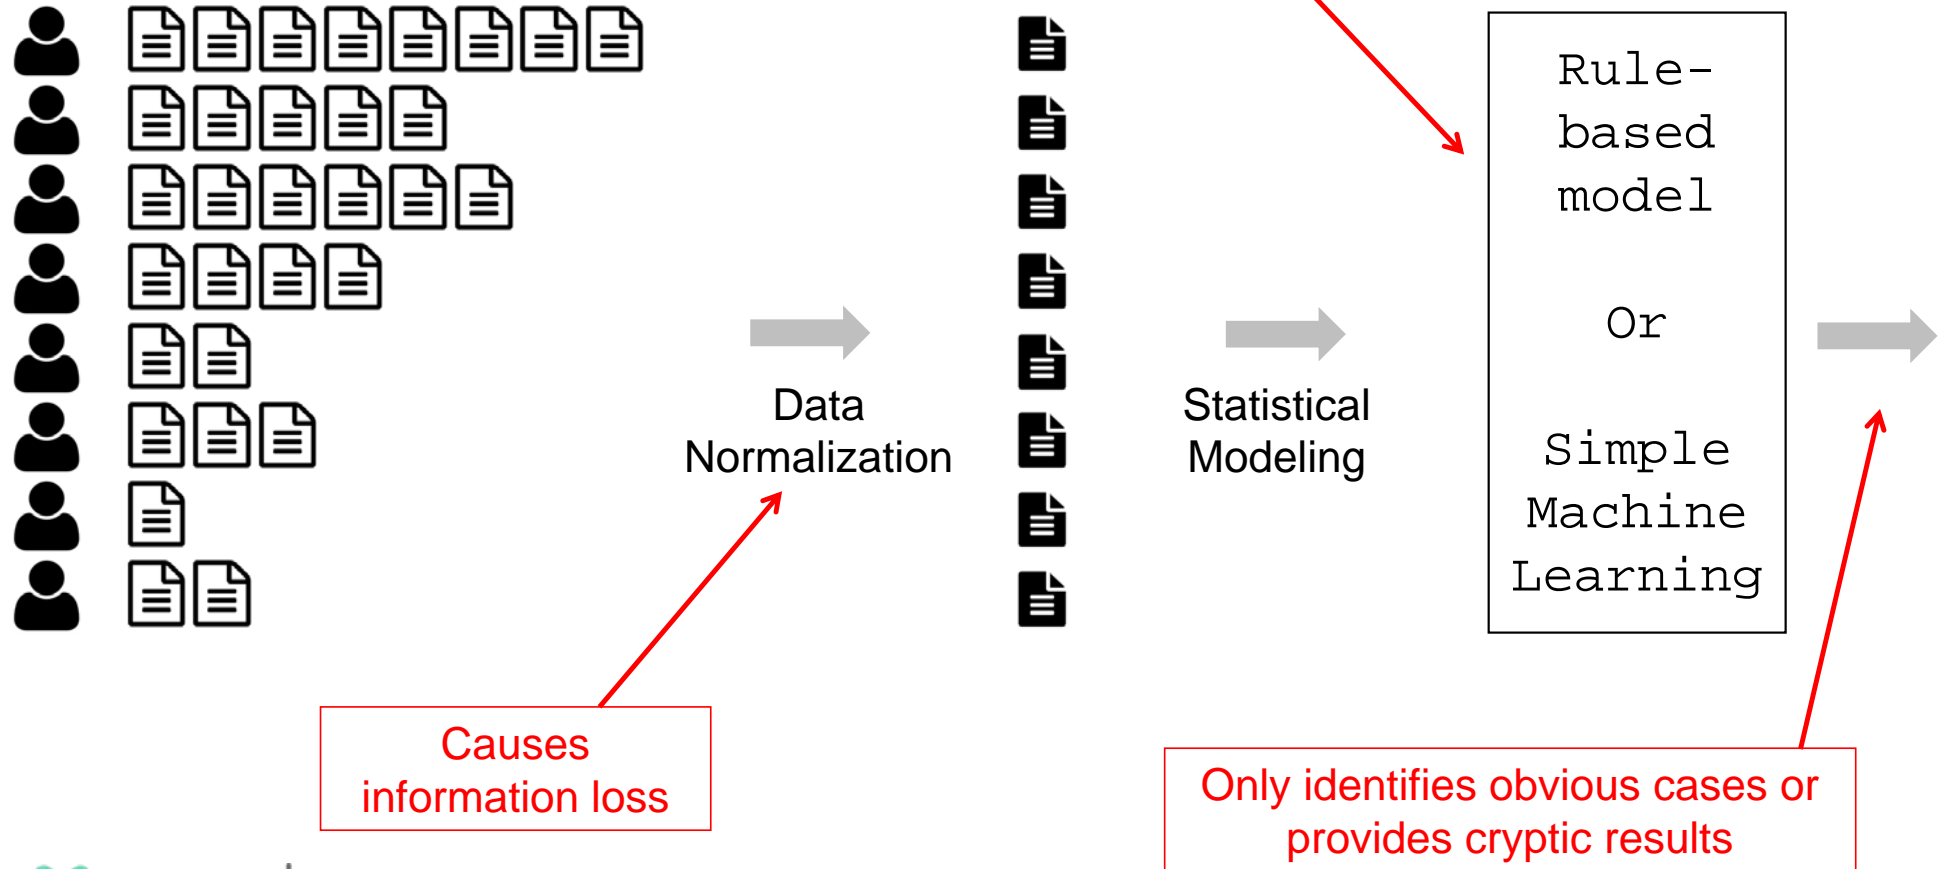

# Dealing with healthcare data

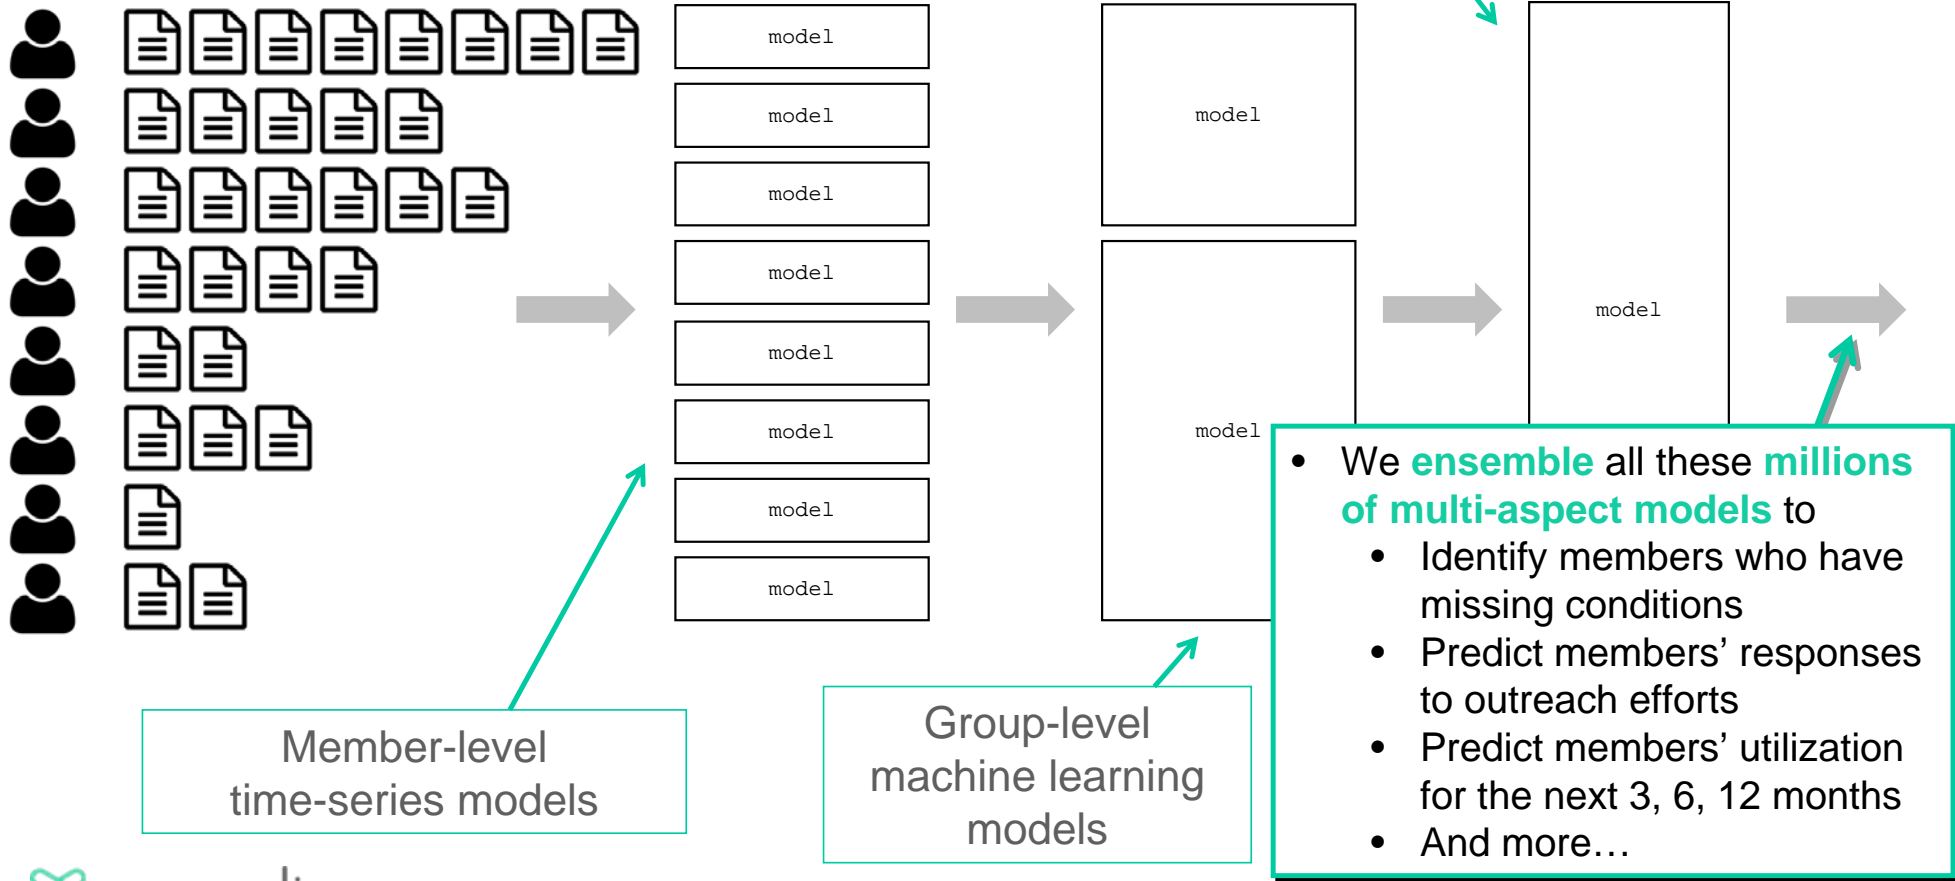

- Member data can be found in multiple sources e.g. claims, electronic health records, lab results, etc.
  - Each source of information has its own (dis)advantages
- Members have different amounts of data
  - Some members may have switched health plans
  - Some members may be sicker than others
- Service utilization can be quite different across regions and plan types
  - HMO vs. PPO
  - Medicare Plans vs. Commercial Plans
  - California vs. Texas

# Current State-of-the-Art

## + Suspected Condition Categories

### Current Conditions

- [CC115] Myasthenia Gravis/Myoneural Disorders and Guillain-Barre Syndrome/Inflammatory and Toxic Neuropathy
- [CC3] Central Nervous System Infections, Except Viral Meningitis
- [CC56] Rheumatoid Arthritis and Specified Autoimmune Disorders
- [CC187] Chronic Kidney Disease, Stage 5
- [CC184] End Stage Renal Disease

### Expected Conditions

- [CC183] Kidney Transplant Status

## 🔗 Surfaced Diagnoses (details)

### [CC183] Kidney Transplant Status

#### Overview

- Dx Code: 9-V420
- Dx Description: KIDNEY TRANSPLANT STATUS
- Likelihood of Dx: 0.4
- Likelihood of Dx in Chart: 0.2

#### Evidence from Patient History

- [Rx] Antimetabolite Immunosuppressant (825.82)
- [CC] 184: End Stage Renal Disease (102.37)
- [CC] 187: Chronic Kidney Disease, Stage 5 (57.87)
- [Dx] 9-5856: END STAGE RENAL DISEASE (Begin 2005) (26.01)
- [Pr] 83735: Assay of magnesium (11.15)
- [Pr] 80048: Metabolic panel total ca (8.33)
- [Pr] 84100: Assay of phosphorus (5.84)
- [Pr] 87186: Microbe susceptible mic (5.77)

#### Relevant Charts

1. Claim ID: [REDACTED]
  - Date: [REDACTED]
  - Provider NPI: [REDACTED]
2. Claim ID: [REDACTED]
  - Date: [REDACTED]
  - Provider NPI: [REDACTED]
3. Claim ID: [REDACTED]
  - Date: [REDACTED]
  - Provider NPI: [REDACTED]

## + Suspected Condition Categories

### Current Conditions

- 9: Lung, Brain, and Other Severe Cancers, Including Pediatric Acute Lymphoid Leukemia
- 88: Major Depressive and Bipolar Disorders

### Expected Conditions

- 142: Specified Heart Arrhythmias
  - Expected Risk Gain: 0.2
- 156: Pulmonary Embolism and Deep Vein Thrombosis
  - Expected Risk Gain: 10.19

## 🔗 Suspected Diagnoses (details)

### 156: Pulmonary Embolism and Deep Vein Thrombosis

- **Missing Code:** 9-45340
- **Likelihood:** 0.6
- **Risk gain:** 16.98
- **Claim date:** 20150327
- **Provider ID:** 1861466153
- **Evidence found in Medical/Rx Claims**
  - [dx] Administrative/social admission
  - [dx] Phlebitis; thrombophlebitis and thromboembolism
  - [dx] Other aftercare
  - [rx] Vitamin K Antagonist

Accepted

Rejected

N/A

### 142: Specified Heart Arrhythmias

- **Missing Code:** 9-42731
- **Likelihood:** 0.06
- **Risk gain:** 3.11
- **Claim date:** 20150107
- **Provider ID:** 1871572818
- **Evidence found in Medical/Rx Claims**
  - [dx] Other aftercare
  - [rx] Vitamin K Antagonist

Accepted

Rejected

N/A
