Welcome to the Patient Financial Navigator Program. Every hospital can have one! Learn how!
The Patient Challenges with HealthCare

- No one ‘asks’ to come to a hospital.
- Patient’s lives are impacted - they are scared, they feel out of control, they are lost with the overwhelming factors of cost/unknown, multiple providers, and continuing frustration with ‘who knows all of this?’
- Patients are unaware of the many changes with their insurance, government programs, employer’s coverage and all the ‘rules’ associated with getting services paid.
- Patients historically access hospitals once a year or less.

Healthcare is very personal!
Healthcare is personal.
Healthcare is local... but...

► Healthcare can be complex and too complicated
► WHY? Every insurance has their own rules for coverage.
► WHY? Physician directed care may not be insurance approved.
► WHY? Frustration in ‘thinking there is coverage in my plan’ only to be denied as ‘not medically necessary.’
► WHY? Charges and actual payment do not align.
► WHY? Itemized statements from providers are confusing
► WHY? Changing employer plans are adding new items - like Health Savings Accounts - with limited understanding by the employers.  ++++++++
But Patients Don’t Speak the Language of Health Insurance Today…

Figure 10

Consumers Needing Help Understanding Basic Insurance Concepts, 2015

Among your Program’s clients who considered or purchased QHPs, how many needed help understanding basic insurance terms, such as “deductible” or “in-network service”? 

- Most 44%
- All or Nearly All 30%
- Some, but Less than Half 18%
- Few or None 5%
- Don’t Know 3%

NOTE: Data may not sum to 100% due to rounding.
SOURCE: Kaiser Family Foundation, 2015 Survey of Health Insurance Marketplace Assister Programs and Brokers, August 2015.
...and They May Not Identify with the Language of Value-Based Care Tomorrow

<table>

<tbody>
<tr>
<td>Medical home</td>
<td>“It sounds just like a nursing home.”</td>
</tr>
<tr>
<td></td>
<td>“First you go to the medical home, then you go to the funeral home.”</td>
</tr>
<tr>
<td>Integrated care</td>
<td>“It sounds like a sales pitch in a cheap brochure.”</td>
</tr>
<tr>
<td>Accountable</td>
<td>“It’s kind of scary. I am going to go there and something bad is going to happen and someone has to be held accountable for it.”</td>
</tr>
<tr>
<td>Value</td>
<td>“It means things are cost effective. They are going to keep the value down. You aren’t getting the best care.”</td>
</tr>
</tbody>
</table>

Additional ‘factors’ influencing the patient experience = confused = hassle factor

- Electronic medical record / EHR - incentive and penalties *Ransomware*
- Integrated systems between providers/doctors and hospitals but safety with data sharing a concern.
- Quality reporting systems - with rewards and penalties
- Physicians new payment system
- Alternative payment systems for hospitals, doctors, long term care, DME, home health - all in the midst of rolling out with the goal of increased quality, reduced costs and more engaged patients.
- What about a change to ‘privatizing’ Medicare? Voucher program - means?
An Idaho-Based, Family Foundation was created in 2017 - MISSION to meet the local need...

Patient Financial Navigator Foundation Inc.
A Community Outreach Program
Transforming the hassle factor in healthcare—one patient, one family, one employer, one community at a time

Pay It Forward...Thru Education
The PFNF Advisory Board is committed to attacking and transforming the hassle factor—thru education & outreach.

▶ Day Egusquiza, Founder and President
  *38y in healthcare reimbursement; 20y at MVRMC; 18y owner national consulting company.*
▶ Daryl Wert, Vice President
▶ Jenyfer Stokes, Director
▶ Jayme Ketterling, Secretary
▶ Jodyi Wren, Director
▶ Jeremy Egusquiza, Director
▶ Karla Carter, Director
▶ Rosemary Fornshell, Ad-hoc

▶ Special thanks to the volunteers +CSI/strategic partner

Collaboration = Be a “Difference Maker.” The power of One.
What is the PFNF, Inc

A not-for-profit Foundation with the focus on transforming the hassle factor ... thru Education. Answers: What happens now—beyond the clinical care?

Three legs of the Foundation’s Outreach Mission: No cost for any service

- **Community Outreach** - Boot Camps
- **Employer Outreach** - Lunch and Learn for employees
- **Navigator Resource Library** - personal pt/family
- As significant healthcare changes occur along with ongoing ‘Healthcare buzz’ updates in local newspaper.
Three components of this dynamic program - A community outreach program

- **Employer program**
  - Build historical info
  - Lunch & Learn-onsite education with employers
  - HealthCare Buzz
  - EOB - how to read
  - New healthcare changes-national and local
  - Q&A - as requested by the site

- **Community programs**
  - Networking with existing services
  - Creating unique trainings
  - Identify community healthcare legislative changes - educate
  - Turning 65 Bootcamp
  - National ‘new terms:’- HSA, ACO, Quality based, Managed, Medicare, etc.
  - HealthCare Buzz

- **Navigator Resource library * located at local hospital**
  - Employer specific guides
  - Medicare & ME
  - Traditional vs Mgd
  - Translating ‘ease’
  - What to expect when??
  - General Education
  - How to appeal?
  - Networking with existing services
Example of Community Outreach Education - Boot Camps

1) Identify community leaders to participate in the boot camp trainings

2) Identify thru existing community services, additional healthcare related ‘hassle factor’ training.

3) Provide education to high schools, colleges, regional and others as requested.”

4) Innovation lab - creating community specific ed.
More Fun!
2018 Projected Community Outreach Education

OUTREACH TO HIGH SCHOOL SENIORS AND COLLEGE STUDENTS/MEDICAL FIELD

- “Insurance 101” - teach Govt and Personal Finance

CONTINUE 3X A YEAR MEDICARE FOCUSED BOOT CAMPS

- “Medicare 101, Social Security Benefits and Assistance for Seniors” Boot Camp - 2x a year

- “Preparing to Turn 65” Boot Camp - 1x year Nov 2, 2018

- All class material is posted on the PFNFinc.com Webpage for immediate and ongoing reference.
More 2018 Community Outreach

- Partnering with the Small Business Development Center at CSI:
  “All Employer Healthcare Summits - 2 x a year.
  Sept 12 5:30-7:30 pm Turf Club

- Presenting “Insurance 201” at the community Safety & Business Fest. Employer focused

- Presenting to service groups - updated. “What does disruption in healthcare look like?” - POWERFUL

- Tell your local story, state story, national story.
Ongoing Education - thru “HealthCare Buzz” articles

- Times News /local bi-monthly educational articles
- All articles are available on our webpage:
  - What does out of network look like?
  - What is a portal and why do I care?
  - Turning 65: Initial wellness visit
  - Turning 65: How does a Medicare inpt actually pay?
  - Turning 65: What is a Medicare Supplemental Insurance plan?
  - Turning 65: What are the Medicare options? **
  - Turning 65: When is Medicare a 2nd payer? **
  - Turning 65: Fall Medicare Mgd Care Enrollment
HEALTHCARE BUZZ

Out of network?

“What does out-of-network mean and how does it impact the patient’s payment?”

Health care payments are driven by contracts between payers such as Medicare, Medicaid, primary insurance and health care providers. The contracts with the health care providers can be optional — such as commercial insurance — or mandatory for Traditional Medicare and Medicaid with physicians, home health, outpatient services and hospitals.

For the patient and the health care provider to receive the best benefit package, there are steps that are occurring in the background.

1) The health care provider enters into a contract for payment. Inpatient is usually based on a flat fee based on the diagnoses called a Diagnostic Related Grouper/DRG. For hospitals under 25 beds, referred to as critical access hospitals, their inpatient payment is a different formula.

2) The payer or their broker will work with the employer to sell a package of inpatient, outpatient, home health, skilled nursing, physician and related health care services. The employer determines which package they want to purchase with deductibles and out of pocket co-insurance amounts negotiated. Essential benefits that were part of the Affordable Care Act/Obamacare are also included.

3) Services purchased by the employer thru the insurance plan are considered in-network. All the providers who agreed to take a reduced payment thru the contract are considered in-network.

4) If the patient or family who are covered goes to health care provider who is not under contract with the employer’s insurance plan, they will pay a much higher out of pocket as this is considered out-of-network.

5) Example: A patient chooses a surgeon who is not in-network due to a long history with the surgeon.

The patient will owe, at a minimum, a yearly in-network deductible of $6,000 as well as a 2nd out-of-network deductible of $6,000 plus the difference between the amount paid by the insurance and billed charges. The health care provider will not have a contract with the provider so full billed charges will likely be due.

ACTION IDEA:

Always ask prior to any health care service — Are you contracted with my insurance? If not, there is an opportunity to work with your insurance prior to the health care service and ask for an exception, but it is rare. Staying within the network allows for the patient’s deductible and co-insurance amount to be the negotiated rate.

Read your employer benefit package to get additional information.

Additional examples are available on the PFNFInc.com webpage.

Day Egusquiza, President and Founder of the Patient Financial Navigator Foundation, Inc. has more than 35 years of health care reimbursement and operation’s experience.
Trusted HealthCare Educator

Participate:

Office on Aging events
Wellness Fairs - Have Ins or Medicare booth “Ask the Expert”

Population Health dialogue/changes = ‘translator’
New transformations in healthcare
Employer work place insurance initiatives
Next generation of healthcare - with partners
School outreach - high school, colleges
As requested
2nd) Example of Employer-Specific “Lunch & Learn”

1. Meet with the HR staff to learn about the employer’s insurance plan.

2. Outline the key elements for education to be covered during the 30 min employee ‘Lunch and Learn.’

3. Hot spots for education (usually): EOB education, out of network, what happens when you are scheduled for a surgery and ‘HealthCare Buzz’ ++ Q&A.

4. Innovation lab - taking the education to the employer.
Take the Hassle Out of the Experience

Hassle Map: Elective Surgery for an Insured Patients - who knows to do this?

1. Get a referral to a surgeon
2. Call to get a preauthorization from your health plan (or realize later that you forgot)
3. Worry about whether you will have to pay anything in advance, and if so, how much
4. Find out if the surgeon, anesthesiologist, pathologist, and radiologist are in your network
5. Figure out where your out-of-pocket costs for pre-op tests will be lowest (or don’t think about this until you get the bill)
6. Have the surgery
7. Find out how much the operation will cost you out-of-pocket (or hold your breath until the bill comes)
8. Spend a month dreading getting the final bill in the mail

Source: Based on the hassle-map construct developed by Slywotzky (2011).
So now you need healthcare - Outpt surgery - CARPEL TUNNEL

- Surgeon’s office will contact your insurance carrier to get the surgery pre-authorized. Insurance carrier has their own criteria for medically necessary services. Many times requires ‘negotiation’ with provider and payer.

- **Routine bills for an outpt surgery- usually each sent separately:**
  - Surgeon
  - Anesthesiologist
  - Pre-op testing
  - Procedure location (Hospital, free standing ctr)

**IMPORTANT:** Validate all of the above are within the network that is part of the plan. IN NETWORK
# Your Medical Plan

**NOTES**

XPG: 928.06 CRIMINAL & PHYSICIANS NETWORK DISCOUNT APPLIED. MEMBER NOT IN NETWORK.
Explaination of benefits
This is an overview of claims we processed for you from October 06 - October 06, 2017.

Amount billed $257.00 This is the total amount all the providers billed us for the care received.
Your discounted rate < $114.90 This is the amount the providers have agreed to accept for the care received.
Amount we paid $42.72 This is the total amount we paid based on services covered under your plan.
Amount you owe $72.18 This is the total amount you owe your provider for this care. It's based on any deductible you need to meet, co-insurance percentage you pay toward care, or to cover any services that your benefits don't cover (i.e. may have paid your provider all or part of this amount during your visit).

Who received care: 
Date of care: October 3, 2017
Provider: 

* Difference between $257.00 - $142.72 absorbed by provider, in-network.

* Total amt considered by payer: 
  $114.90 total amt due to provider 
  + $72.18 due by patient 
  = $187.08 billed charge 
  - $142.72 absorbed
  = $44.36 amount due to provider.
Understanding today’s insurance world

- Benefit packages include in network and out of network payments.

- **In network** = Employer or individual insurance plan has contracted with healthcare providers. If you stay in network, there will be a reduction off billed charges. Patient still owes yearly deductible and each visit/hospitalization/outpt service has a co-insurance too.

- **Out of network** - a penalty as there is no contract so full billed charges are normally due.

- ALWAYS ask before going to see any healthcare provider.

**PLUS DISTRUPTIONS IN HEALTHCARE**—Lots of new delivery choices... Web-based, individual businesses do their own, etc.
Understanding today’s insurance world

- Benefit packages include in network and out of network payments.

- **In network** = Employer or individual insurance plan has contracted with healthcare providers. If you stay in network, there will be a reduction off billed charges. Patient still owes yearly deductible and each visit/hospitalization/outpt service has a co-insurance too.

- **Out of network** - a penalty as there is no contract so full billed charges are normally due.

- ALWAYS ask before going to see any healthcare provider.

PLUS DISTRUPITIONS IN HEALTHCARE—Lots of new delivery choices... Web-based, individual businesses do their own, etc.
Think like a pt - out of network
(means what to the pt or family?)

- 40 year old has had emergency foot /ankle surgery approx 8 years ago and taken to a Boise hospital. The surgeon specialized in this type of foot surgery. Both in network at that time.

- 3 surgeries later - still problems with rebuilding the foot to allow the pt to walk.

- July 2013, employer changes plans and now the doctor and hospital who employees the doctor is out of network.

- The pt continues to go to the surgeon who does another surgery Oct 2014 and a follow up minor surgery in 2015. Pt was aware of the change but did not know to do anything different as he was in continuing care.

- Insurance pays significantly lower - no adjustment from charges as out of network/no contract. Pt pays all charges except actual payment to doctors, hospitals, tests. Huge financial hit.

- What does the employee or pt know of the a) ramifications of out of network, b) prior notice to get approved and c) appeal rights?
Examples from the Onsite/Hospital Navigator Resource Library

1) Thru employer specific meetings, build data base of insurance how to read the EOB, deductibles, etc.
2) 1 on 1 intervention with the patient/family - complete work paper
3) Create glossary of terms
4) Create reference guide for additional community resources
5) Create networking ‘handoffs’ with existing hospital team - payment options, social work, estimates, patient experience, physician offices, others
6) Innovation Lab: After Hours Q&A - Weds 5:00 -6:00 p.m.; using patient portal; tracking and trending improvements/feedback; integration with medical community; face to face and automation.
7) Volunteer staffing plus a full time Manager and an unpaid Director/Foundation
Think like the family who is scared with a new ER visit w/insurance, employer specific

- Daughter has just been admitted thru the ER. (Inpt vs obs means what to the pt?)
- Parents are scared and distraught about the health of their daughter with the unplanned ‘admit.’
- As comforting as the care givers are, the financial questions loom large. What happens now?
- Who has insurance? What was done with the insurance? What is my coverage? “I have never had to use it before, so I don’t know anything!”
- Think Pt Financial Navigator Program referral
Think like a patient - Medicare Part C/Managed Care - comes to the ER

- 86 year old with Humana. What is done in the ER to inform the pt this is not traditional Medicare?
- If the pt is ‘admitting/obs or inpt” - what happens so the pt understands the difference between Traditional Medicare and Part C/Mgd Medicare?
- Now they are in a bed, what happens so the 86 year old understands their out of pocket, what coverage there is with Humana that may be different than Traditional, is this obs or inpt? Who has this information for our sick, confused Sr who does not have anyone to ask?
- Care givers/family - who do they ask about the above?
- Think Pt Financial Navigator Program referral
TODAY: Affordable Care Act 2010/ACA aka Obamacare. Previously = nothing similar.

- Mandates major medical insurance for all Americans.
- **Exchange/Marketplace - Myidaho** for any employer, self employments under 50 employees - usually ‘small.’
- Allows for subsidies with premiums so lower income individuals can get insurance.
- Insurance companies are ‘made whole/or close to whole ‘ thru federal money/taxes. Rates are determined by the Insurance companies.
- Examples of under 50 employees who are not mandated to offer medical insurance.
- CPAs, builders, electricians, individual business owners, small businesses/2-50 employees, farmers, early retirees/prior to turning 65
With the Small Business Development Center/SBDC, created a **Small Employer Insurance Work Group**. Small employers - under 50 employees up to 200 ...

**Census Bureau’s statistics of US Business 2012**

- Employer firms with fewer than 500 workers employed 48.5% of private sector payrolls in 2011
- And Employer firms with fewer than 100 workers employed 34.4% of private sector payrolls
- And Employer firms with less than 20 workers employed 17.5% of private sector payrolls.

“American Business is Overwhelming Small Business” 2012 Census Bureau

- 5.73M employer firms in the US firms with fewer than 500 workers accounted for 99.7% of those businesses
- And businesses with less than 20 workers made up 89%.
- Add in the number of non-employer businesses - there are 23M in 2013 - then the share of businesses with less than 20 workers increase to 97.9%
Making it real - Small Employer Premium “Hits”

- Small employer in Idaho
- Premiums have had 23-25% increase each year/3 years.
- Currently for 2 employees: *Exchange was not cheaper/similar*
  - $1220 monthly premiums
  - High deductible per person: $7200
  - 70/30 coinsurance
  - “Age “ rated ... 60 year old
  - Annual $14,600 in premiums !! UNSUSTAINABLE
- This was before the new GOP plan for up to 5x higher than younger premiums. It is capped at 3x under ACA.
Affordable Care Act 2010 created “ESSENTIAL BENEFITS” - Commercial Ins.

- Every employer’s insurance plan must offer essential benefits - a standard of insurance coverages

<table>

Other ACA major changes/ protections

- **Patient protections** -
  - Coverage for those *with pre-existing conditions*. No cancellations or higher premiums. *THINK CANCER, DIABETES.*
  - **No life-time limits** on essential health care
  - Children can stay on their *parent’s insurance until 26*. Even if they get married, go out of state to college, to work, etc. YAHOO!

**Healthcare Impacts:**

- Medical devices are taxed
- Healthcare providers take a reduced payment to help pay for the subsidies.

Expanded use of **health savings accounts/HSA- Pre-tax benefit**
ER is not the place for routine healthcare. Average bill- think $3000-minimum care.

- **Factoid: Health Exec Mobile  Mon, March 27, 2017**
  “Although only 4% of all doctors are emergency physicians, they provide care for:
  
  28% of all acute care visits
  50% of all Medicaid and CHIP (children) visits
  67% of all acute care to the uninsured patients.

  “An annual health survey conducted by states and Medicare/CMS found that the full ACA reduced the uninsured rate by 44% while also reducing the number of people without a primary care doctor by 12% and those not having an annual check up by 10%.”
