About HQSI

HQSI delivers information, products, and services that enable providers, payers, and the healthcare community to improve healthcare delivery and patient outcomes in the most cost-effective way.

Our Roots

HQSI was founded in 1982 as the Peer Review Organization of New Jersey (PRONJ). We became Healthcare Quality Strategies, Inc. (HQSI) in 2005. Our mission– accelerating healthcare quality improvement through a collaborative and interactive process with the healthcare community– has remained the same.

Experience and Expertise

With over 30 years experience, HQSI provides top-notch independent medical review and appeal services that are timely, cost-effective, and free from conflict of interest. We use a diverse group of U.S.-based, actively practicing, board certified physicians and credentialed or licensed allied health care providers, pairing the correct clinical specialist(s) with each case. We're focused on making the right decision, the first time – every time.

HQSI physician reviewers are board certified, have an active, unrestricted license to practice medicine in the United States, and have privileges in at least one U.S. hospital or healthcare facility.

Security, Privacy & Compliance

We adhere to URAC standards and guarantee that the most stringent protocols are followed with respect to quality assurance, HIPAA/HITECH compliance, and code of ethics. We're always current on the latest regulatory requirements to ensure we deliver this critical service accurately, with proper documentation, both securely and compliantly, regardless of case complexity.

Technology

We use state-of-the-art technology to manage case workflow. Clients access our intuitive, user-friendly client portal to submit cases electronically, upload medical records, and to receive final determination reports.
