# Medications at Discharge

David Medvedeff, CEO

#### **About VUCA Health**

#### Founded in 2013

 Executives from medical publishing, health information technology and clinical practice

#### Focus on optimizing the medication use process

- CDC estimates 700,000 ED visits/year due to ADE's

#### Our DNA: the combination of content + technology

- Content = video streaming (over 2,200 unique titles)
- Technology = responsive web experience (mobile)

# Almost all patients leave the hospital with a medication prescription

# **Snapshot of Core Measures**

AMI Rx @ D/C

98%

CHF Rx @ D/C

97%

PN Rx @ D/C

95%

Abx Rx @ D/C

# What do patients tell us?

Patients who reported that staff "Always" explained about medicines before giving it to them.

## **Communication About Meds**

# **Sending the Patient Home**

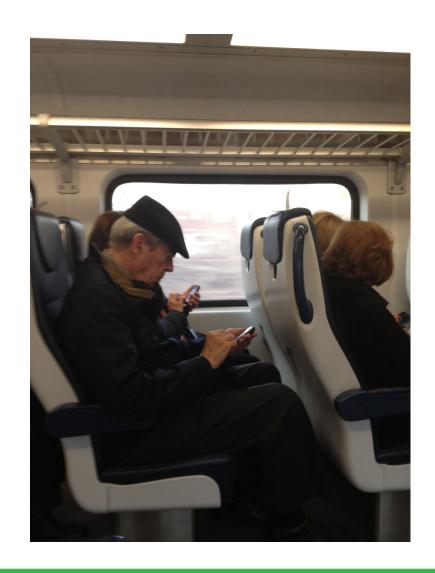

# Patients and Families of Today VUCAHEALTH

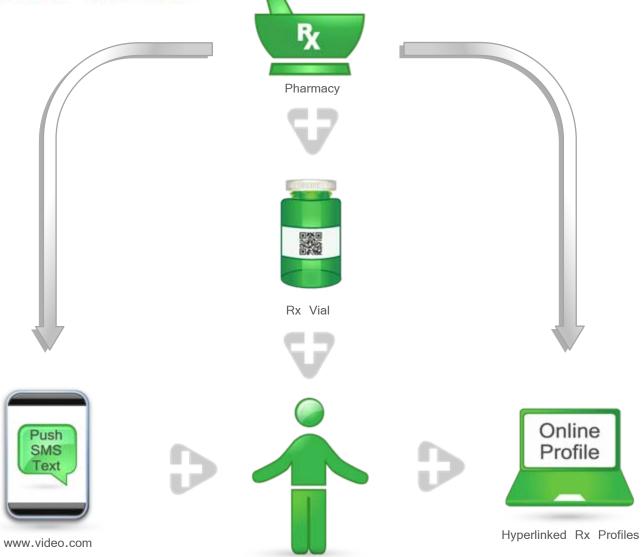

## The New Generation of Med Comm.

## The New Generation of the Rx Label

#### Embracing A New and Consistent Communication Mode

- QR Codes have now been implemented in museums and zoos to expand access to guided tours
  - Audio/video has enabled the sharing of relevant and important information specific to the exhibit on demand

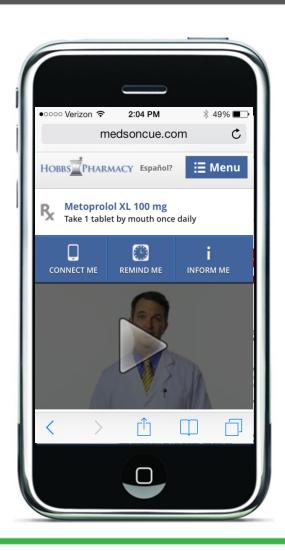

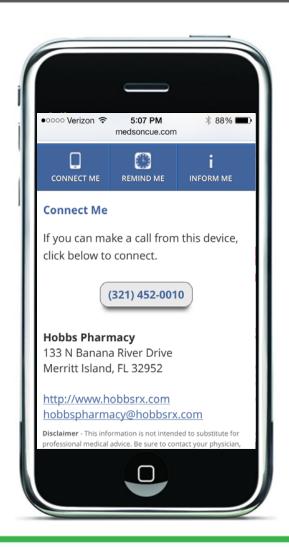

#### Embracing A New and Consistent Communication Mode

- Until MedsOnCue, the labeling for garden herbs and table wines were more sophisticated than Rx's
  - Video tutorials, planting tips and expert feedback

# Value Propositions

- Impacting health literacy
  - Provides an alternative/option for medication information
- Medication adherence
  - Catalyst in the moment for engaged patients
- Gateway to communicate with patients
  - Capture the patient and expose them to other content and condition specific tools (e.g. portals and health apps)
- Involve the family
  - Medication experience is accessible by family and caregivers allowing them to play an active role in therapy management

# Insanity: doing the same thing over and over again and expecting different results.

~ Albert Einstein

# Thank you for your kind attention!
