

Alternative Approaches to Disease Management

What constitutes a full program

-  How to determine whether to “build” or “buy”...or “assemble”
-  Role of eDM in these programs
-  Where eDM is really going to take off...

Alternative Approaches to Disease Management

The Top-Rated 25 Full Programs

- ◆ **Access Health***
- ◆ **Accordant**
- ◆ **AirLogix***
- ◆ **American Disease Management**
- ◆ **Asthma Disease Management (ADMI)**
- ◆ **Baxter RMS**
- ◆ **CorSolutions***
- ◆ **Cardio-Continuum***
- ◆ **Caremark***
- ◆ **Coordinated Care Solutions***
- ◆ **Diabetes Treatment Centers of America***
- ◆ **Franklin Health***
- ◆ **Health Care Solutions 2000**

The Top-Rated 25 Full Programs

- ◆ HMC*
- ◆ Health International
- ◆ Interactive Heart Management
- ◆ LifeMasters*
- ◆ Matria *
- ◆ Optimal Renal Care
- ◆ Paidos
- ◆ Promedex*
- ◆ Quality Oncology
- ◆ Renaissance Health Care
- ◆ Renal Disease Management
- ◆ Vida Health

The Top 25: Success Secrets

<i>Program Component</i>	<i>Of 25 Recommended Vendors...</i>	<i>Other 137 Vendor</i>
Direct Provider Interactions	20	5
Home Education Visits if Needed	19	6
Unscheduled Inbound Calls Taken Live, <i>disease-specific</i>	21	7
Takes 100% Fee Risk or Top-line Risk	21	8
Valid Outcomes Measurement	15	2

Why isn't a Website a Critical Success Factor?

- ✗ In verse Demographics
- ✗ Buyer resistance (actually buyer indifference)

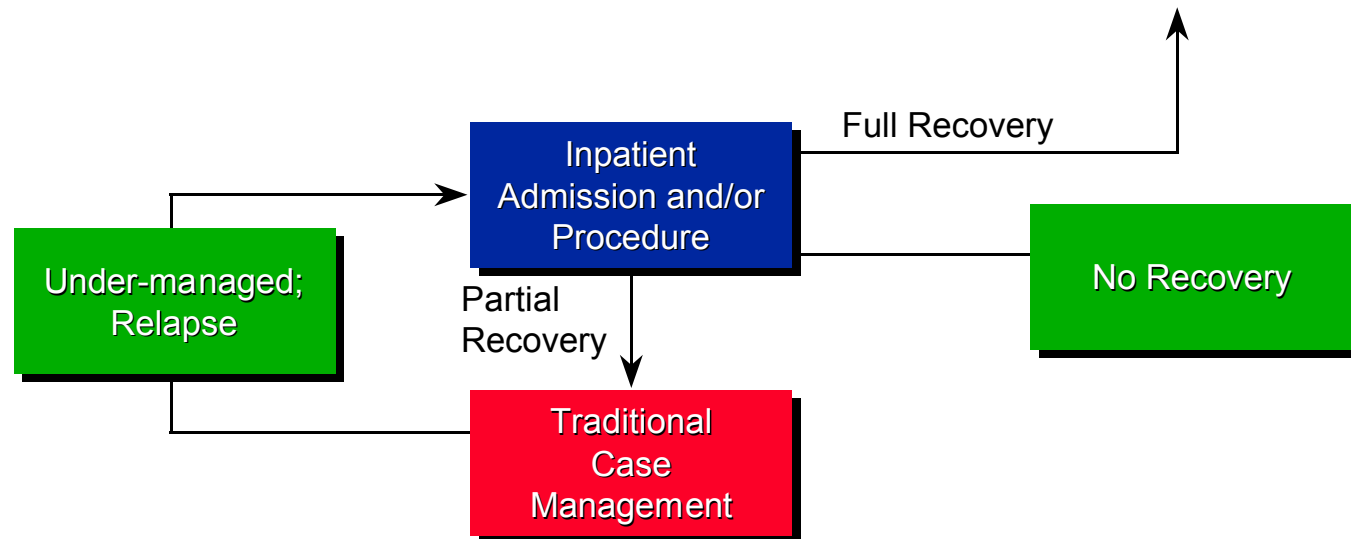

Alternative Approaches to Disease Management

Disease Management: Managing Care Throughout the Delivery Spectrum

Source of Disease Management

Building is dead

- ✍ Assembling “trumps” it
- ✍ No valid outcomes
- ✍ Health plans not set up to do it
- ✍ Building’s “poster child” is Aetna
 - Aetna’s hospitalization rates up
 - Aetna’s own reported DM outcomes well below vendor results

Why is Assembling Growing?

- ✍ Vendors are selling the pure value-added
- ✍ Low external budget required (like “builds”)
- ✍ Guaranteed savings possible (like buys)
- ✍ Health plans have extra nurses if they are scaling back their UR

Recommended “Assemble” Companies in DM²

IVR Companies

- Promedex, Patient InfoSystems

Gadget Companies

- IHMC, Matria, HealthBuddy, LifeChart

Data-gathering Companies

- Alere, LifeMasters, Agilent, CardioCommand

Pure Internet Companies

- PDHI, Predictive Sciences, DiabetesManager

Sorting Companies

- Axonal, CDMS, StatusOne, FranklinHealth

“Infrastructure” companies

- Confer, Landacorp

The Web is NOT NOT NOT a program by itself

-  No physician education
-  No hand-holding
-  Low penetration
-  No home visits
-  No inbound calling
-  No “red zone” intervention

But it's an excellent COMPLEMENT to a program

Complementary Web Role in Assemble Programs (CHF example--oversimplified)

 Class 1

 Class 2

 Class 3

 Class 4

 Web and IVR

 HealthBuddy

 Agilent or Alere
monitoring

 CardioCommand

In each case, sudden weight gain or other
symptoms trigger a live nurse

Builders, Buyers, Assemblers and trends

Build

Kaiser
Aetna

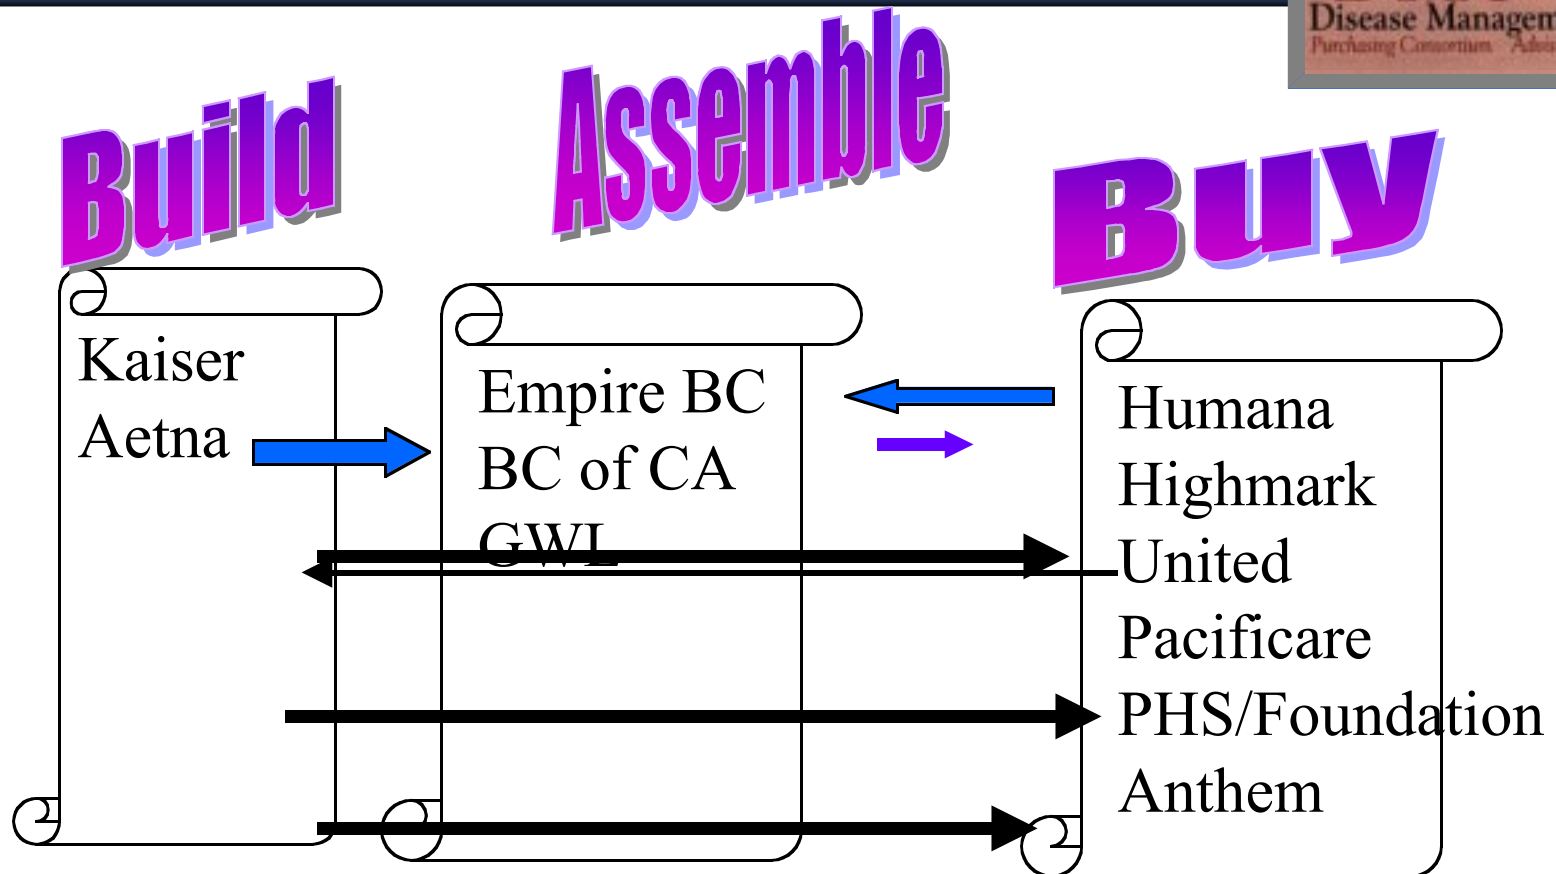

Assemble

Empire BC
BC of CA
GWL

BUY

Humana
Highmark
United
Pacificare
PHS/Foundation
Anthem

Builders, Buyers, Assemblers and trends

Alternative Approaches to Disease Management

- ✍ What constitutes a full program
- ✍ How to determine whether to “build” or “buy”...or “assemble”
- ✍ Role of eDM in these programs
- ✍ Where eDM is really going to take off...
 - best segment
 - best disease

Best segment: Employers

- ✍ More web access (vs. average >65)
- ✍ Proven behavior change for a subset
- ✍ *Perception* of confidentiality
- ✍ reporting of lost work time
- ✍ very inexpensive
 - sites came out at \$0.25 PMPM
 - today they are \$0.05 PMPM

All DM Websites are *Not* Created Equal

- ✍ Disease Information
- ✍ Personal Health Assessment, fear factor
- ✍ Total health information
- ✍ Personal report generation
- ✍ Exception reporting (for health plan)
- ✍ nurse on call immediate switching
- ✍ “push” strategy
- ✍ supply ordering
- ✍ Reporting of (self-reported) lost work time

Best Disease

- What would be by far and away the single best disease...education, monitoring, compliance, and supplies...

Conclusion

- ✍ Web is a great complement but a lousy substitute for a program
- ✍ The best programs are mix-and-match of tools and human contact
- ✍ Web will penetrate first in the employer segment

Hey, Butch, Who *Are* These Guys?

Disease Management Purchasing Consortium members:

- ✍ 57 health plans and employers doing 70% of all contracting
- ✍ Virtually every reputable vendor (and some not-so-reputable ones) is a member
- ✍ Firms which sell to DM companies
- ✍ The White House, NCQA, Harvard School of Public Health, Prof. Herzlinger, Bain, BCG, Ernst & Young, M&R, other marquee names
