Integrated Care: Simplified Logic Model

Key Elements of Integrated Care Models (1/2)

- Stratifying patients by severity and social determinants
- Coordinated team-based care emphasizing prevention
- Specially trained nurse care managers to work with complex /high need patients across settings
- Actively engage patients in pre-visit planning, mutual goal setting, and shared decision-making

Key Elements of Integrated Care Models (2/2)

- Wide used of evidence-based guidelines and clinical pathways
- Performance management system with frequent feedback
- Continuous improvement learning-oriented culture
